OPPORTUNITY BRIEF · SALES AND PRESALES

Automated customs duty management for retailers importing under autonomous tariff suspensions and quotas.

Retail × Supply chain risk monitoring × API and integration platform · OS061 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
42 is the world moving	**56** can we play, can we win	**MEDIUM** 0 named in the evidence	**€245m** modelled evidence · per year	**NEXT** regulation adopted or propose...	**L1** 2 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity helps EU retailers automate customs duty management for goods imported under autonomous tariff suspensions and quotas, reducing compliance risk and cost. With the EU evaluating this scheme and considering changes to tariff rate quotas for outermost regions, importers face uncertainty that demands agile, automated responses. Orange Business can assemble a solution using its integration and AI capabilities to monitor regulatory changes and adjust duty calculations in real time.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	**€454m** €85.8m – €2.1bn	**€245m** €46.3m – €1.1bn	**€6.9m** €1.3m – €31.7m	modelled

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

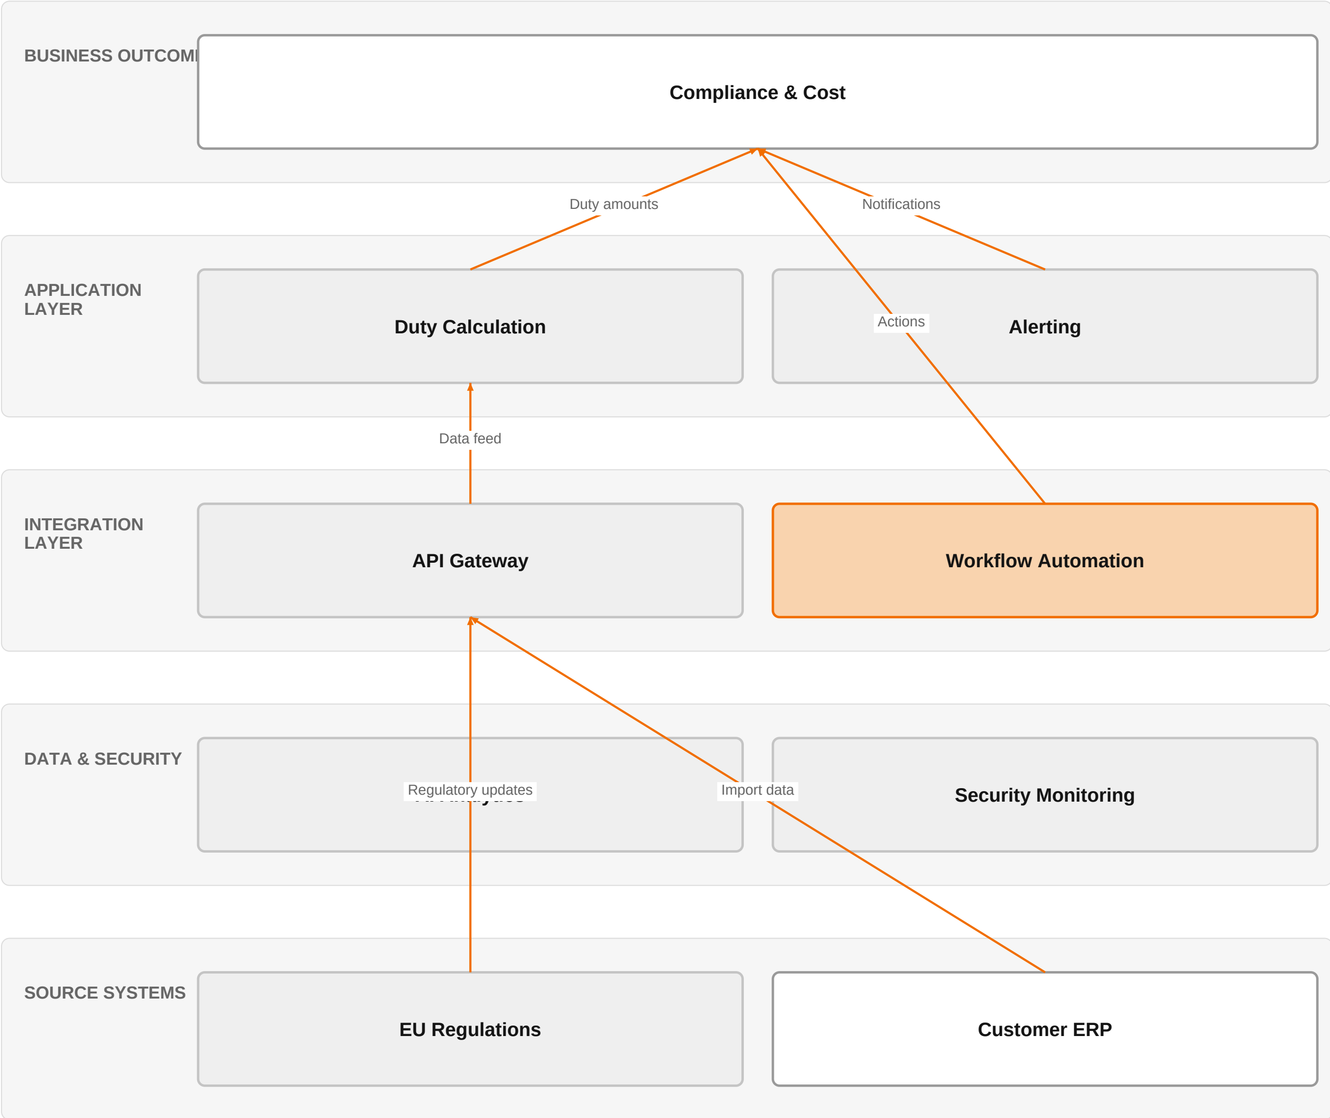
Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Retail (EU27_2020)	195,962 enterprises	observed	Eurostat · sbs_sc_ovw	2024
Enterprises adopting API and integration platform	11.0 % of enterprises (10+ employees)	proxy	Eurostat · isoc_cicce_usen2 · E_CC_PDEV	2025
Annual value of one engagement	€200k per enterprise per year	assumption	config/sizing.yaml · fallback_bands_eur	size-2026-08-a
Size-weighted buyer base	20,550 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Adoption rate is a declared proxy. Cloud computing services by NACE Rev. 2 activity series E_CC_PDEV is used as a proxy for API and integration platform: Development and integration platform as nearest series. Contract value is a configured assumption, not observed. Only 0 matching tender notices, below the 6 needed for a robust median, so the configured band for this business domain is used. It is an assumption owned by innovation-radar-curator, not evidence. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders.

The solution, in one picture

Automated Customs Duty Management



■ Orange asset ■ Partner ■ Customer-owned ■ Third party / to be sourced

This solution automates the monitoring of EU tariff regulations and calculates duties accurately, with alerts and workflows to keep the retailer compliant and cost-efficient.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

The EU is evaluating the industrial and agricultural autonomous tariff suspensions and quotas scheme, which directly affects importers of goods into the EU. Additionally, the EU is considering excluding duty-free imports to outermost regions from reference quantity for some tariff rate quotas, impacting specific trade flows. These regulatory evaluations signal potential changes in duty rates and quota allocations, creating a need for importers to adapt their customs processes quickly.

`Sources: SIG-96BAC201756E ec.europa.eu 2026-07-29; SIG-255AA4546DD8 ec.europa.eu 2026-02-10`

Who buys, and why now

The buyer is typically the Chief Financial Officer or Head of Customs and Trade Compliance at a retail importer. The pain is operational: manual tracking of tariff suspensions and quotas is error-prone, leading to overpayment of duties or compliance penalties. The trigger is the EU's evaluation of the scheme, which creates uncertainty about future duty rates and quota availability, prompting a need for automated monitoring and calculation.

Why it is hot now — every claim bound to a dated source

- The EU is evaluating the industrial and agricultural autonomous tariff suspensions and quotas scheme, which affects importers of goods into the EU. [SIG-96BAC201756E]
- The EU is also considering excluding duty-free imports to outermost regions from reference quantity for some tariff rate quotas, impacting specific trade flows. [SIG-255AA4546DD8]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a solution using its AI/Data/Cloud experts and Digital experts to build a customs duty management platform. The platform would integrate with the customer's existing ERP and customs systems via APIs, pulling in regulatory updates from EU sources. It would use AI to analyze changes and automatically adjust duty calculations, with alerts sent through Orange's Contact Center Access for proactive notifications. The engagement would start with a discovery workshop, followed by integration design, implementation, and managed services from Orange Cyberdefense for security.

Why Orange can win

Orange can win by leveraging its AI/Data/Cloud experts to build a tailored solution, its Digital experts for user experience, and its Orange Cyberdefense managed services to ensure security. The integration with ServiceNow could provide a workflow automation layer. However, the assets are thin; there is no specific customs domain expertise or pre-built solution, so Orange must differentiate through its ability to integrate and secure the solution.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Contact Center Access	offer	L1	offer provides the technology in a matching domain	unconfirmed
Orange Cyberdefense managed services	offer	L1	offer addresses the use case but not this technology	unconfirmed
ServiceNow	partner	L2	partner provides the required technology	unconfirmed

Competitive landscape

MEDIUM competitive intensity (score 4.0; 0 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

Competitor	Category	Position here	Basis	Evidence
Sopra Steria	Global systems integrator	sells API and integration platform; competes in Cloud	structural	—
Salesforce	Customer-experience platform	sells API and integration platform; competes in CX: Customer Experience	structural	—
Econocom	Regional integrator or reseller	sells API and integration platform	structural	—
Accenture	Global systems integrator	active in Retail; competes in Cloud, CX: Customer Experience	structural	—
Telefonica Tech	Telecom operator peer	active in Retail; competes in Cloud	structural	—
Vodafone Business	Telecom operator peer	active in Retail	structural	—
AWS	Hyperscaler	competes in Cloud — also an Orange partner	structural	—
Google Cloud	Hyperscaler	competes in Cloud, CX: Customer Experience — also an Orange partner	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

1. How do you currently track changes to autonomous tariff suspensions and quotas that affect your imports?
2. What is your process for calculating duties on goods imported under these schemes, and how often do you update it?
3. Have you experienced any compliance issues or overpayments due to missed regulatory changes in the past year?
4. Do you import goods from or to the EU's outermost regions? If so, how would a change in reference quantities impact your operations?
5. What is your current IT landscape for customs and trade compliance, and how open are you to integrating with external APIs?

Objections you will meet

They will say	You can answer
We already have a customs broker who handles this manually.	That's true, and brokers are valuable. But manual processes are slow and error-prone, especially with regulatory changes. Our solution automates monitoring and calculation, reducing risk and freeing your team to focus on exceptions.
The EU evaluation is just a review; nothing will change soon.	You're right that it's a review, but the evaluation itself signals potential changes. Preparing now with an automated system means you can adapt quickly if changes are adopted, avoiding disruption.
We don't have the budget for a custom solution.	Understood. But consider the cost of non-compliance or overpaying duties. Our solution can be phased, starting with monitoring and alerts, which is lower cost and delivers immediate value.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for a retail importer that differentiates our API and integration platform by showing how it can ingest customs and trade data to automate duty calculations and monitor quota usage, using our AI and data experts and referencing our work with Boulanger.
Sales	In a meeting with a retail importer's customs or trade compliance lead, say: 'We can help you monitor the EU's autonomous tariff suspensions and quotas so you can plan imports and avoid duty surprises—our AI and data experts can build a dashboard that flags changes as they happen.'
Strategist / Innovator	Commission a deep-dive brief on the EU's autonomous tariff suspensions and quotas scheme, mapping the affected retail import flows and the data sources needed to monitor them, to decide whether to invest in a supply-chain risk monitoring prototype next quarter.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

Signal	Date	Publisher	T	Title and link
SIG-96BAC201756E	2026-07-29	ec.europa.eu	1	Evaluation of the industrial and agricultural autonomous tariff suspensions and quotas scheme
SIG-255AA4546DD8	2026-02-10	ec.europa.eu	1	Exclusion of duty-free imports to the outermost regions of the Union from reference quantity fo...

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: competitive_landscape (no claim survived evidence binding); risks_and_unknowns (missing from the model output); diagram (5 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
