

VSAT satellite connectivity for SCADA communications in Romanian gas transport infrastructure.

Public / Government sector × Regulatory compliance and reporting × Satellite and non-terrestrial networks · OS002 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
47 is the world moving	43 can we play, can we win	MEDIUM 0 named in the evidence	€57.5m observed evidence · per year	NOW budgeted procurement within 1...	L1 5 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€220m €220m – €482m	€57.5m €57.5m – €126m	€690k €690k – €1.5m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€220m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-05
Assumed obtainable share of the serviceable market	1.2 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 34 matching notices, matched on vertical via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Secure VSAT for SCADA

This diagram shows how Orange's managed security and services wrap around a third-party satellite link to deliver a compliant SCADA communication solution.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Why it is hot now — every claim bound to a dated source

- A Romanian gas transport company tenders VSAT satellite communications for its SCADA system. [SIG-ECF8209291DC]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a managed VSAT service for SCADA communications, leveraging Orange Cyberdefense managed services for security monitoring and IoT experts for integration. The engagement would start with a needs assessment, then design a secure satellite connectivity solution, deploy and integrate it with the existing SCADA system, and provide ongoing management and security. Orange's certifications (ISO 27001, SecNumCloud, CISPE) would be highlighted to address sovereignty and compliance concerns.

Why Orange can win

Orange can win by combining its secure managed services with satellite connectivity, offering a sovereign and certified solution. The assets are thin in terms of specific satellite capabilities, but the strength lies in the security and trust layer. Orange's experience with critical infrastructure, as demonstrated by the Grand Paris Sud reference, adds credibility. However, the lack of a named satellite asset means Orange would need to partner or resell, which could be a weakness.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Orange Cyberdefense managed services	offer	L1	offer addresses the use case but not this technology	unconfirmed
ISO 27001	certification	SUP	certification Orange holds is required by this vertical	unconfirmed

SecNumCloud	certification	SUP	certification Orange holds is required by this vertical	unconfirmed
CISPE	certification	SUP	certification Orange holds is required by this vertical	unconfirmed
IoT experts	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed
Digital experts	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed
Defense and security experts	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed
Orange Group researchers	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed
Grand Paris Sud	reference	SUP	published reference in this vertical, different use case	unconfirmed

Competitive landscape

MEDIUM competitive intensity (score 6.0; 0 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

Competitors include satellite operators like Eutelsat OneWeb, Marlink, and SpaceX Starlink, who have native satellite infrastructure and can offer direct connectivity. Telecom peers like Vodafone Business also compete on connectivity solutions. Security specialists like Airbus Protect and Leonardo are active in the public sector and may offer integrated solutions. Global systems integrators like Accenture and Atos/Eviden could bundle satellite with broader IT services. The customer will compare on price, reliability, security, and sovereignty.

Competitor	Category	Position here	Basis	Evidence
Vodafone Business	Telecom operator peer	sells Satellite and non-terrestrial networks; competes in Connectivity Solutions	structural	—
Airbus Protect	Security specialist	sells Satellite and non-terrestrial networks; active in Public / Government sector	structural	—
Leonardo	Security specialist	sells Satellite and non-terrestrial networks; active in Public / Government sector	structural	—
Eutelsat OneWeb	Satellite operator	sells Satellite and non-terrestrial networks; competes in Connectivity Solutions	structural	—
Marlink	Satellite operator	sells Satellite and non-terrestrial networks; competes in Connectivity Solutions	structural	—
SpaceX Starlink	Satellite operator	sells Satellite and non-terrestrial networks; competes in Connectivity Solutions	structural	—
Accenture	Global systems integrator	active in Public / Government sector	structural	—
Atos / Eviden	Global systems integrator	active in Public / Government sector	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What are the specific SCADA sites that need connectivity, and what are their current communication methods?
- 2 What are the availability and latency requirements for the SCADA communications?
- 3 Are there any regulatory or sovereignty requirements for the data transmitted over the satellite link?
- 4 What is the expected duration of the contract and the service level agreements you require?
- 5 Have you considered hybrid solutions combining terrestrial and satellite?
- 6 What is your budget range for this procurement?

Objections you will meet

They will say	You can answer
We already have a satellite provider; why should we consider Orange?	That's fair. However, Orange brings a unique combination of secure managed services and certifications (ISO 27001, SecNumCloud) that can add a layer of security and compliance to your SCADA communications. We can also integrate with your existing infrastructure and provide end-to-end accountability.
Orange doesn't own satellites; how can you compete with dedicated satellite operators?	You're right that we don't own satellites. But we can partner with leading satellite operators to deliver the connectivity, while we focus on the managed service, security, and integration. This gives you the best of both worlds: reliable satellite links and robust security.
Your solution sounds more expensive than a direct satellite service.	Cost is important. While our upfront cost may be higher, the total cost of ownership could be lower due to reduced downtime, integrated security, and simplified management. We can provide a detailed cost-benefit analysis to show the long-term value.

Risks and unknowns

The main risk is that Orange lacks a proprietary satellite asset, which could make the offer less competitive on cost or lead time. There is also uncertainty about the specific technical requirements of the SCADA system and the regulatory environment. The tender may have strict criteria that favor incumbents or specialized satellite providers. Additionally, the geopolitical situation could affect satellite service availability.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief that leverages Orange Cyberdefense managed services and the Grand Paris Sud reference to demonstrate how we meet regulatory compliance for SCADA in gas transport, highlighting our ISO 27001 and SecNumCloud certifications.
Sales	In a meeting with the head of IT or operations at the Romanian gas transport company, say: 'We understand you're tendering VSAT for your SCADA system—our managed services, backed by ISO 27001 and SecNumCloud, can ensure secure, compliant connectivity.'
Strategist / Innovator	Commission a deep-dive brief on the Romanian gas transport VSAT tender, mapping Orange's IoT and defense/security expertise against the SCADA compliance requirements, and validating the relevance of ISO 27001 and SecNumCloud certifications for the bid.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: summary (named entities that were never supplied: Transgaz); what_is_changing (named entities that were never supplied: Transgaz); who_buys_and_why (named entities that were never supplied: Transgaz)
