

Counter-UAS detection and countermeasure systems for the Lithuanian Defense Resources Agency procurement

Defense × Drone detection and airspace protection × Drones and UAS · OS012 v2 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
82 is the world moving	53 can we play, can we win	MEDIUM 0 named in the evidence	€95.9m observed evidence · per year	NOW budgeted procurement within 1...	L0 11 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Evidence gap (SC-13). Orange has 0.0 published reference(s) in Defense, below the threshold of 5. A customer conversation here has no proof point behind it yet.

The opportunity

The Lithuanian Defense Resources Agency is procuring individual drone detection and countermeasure systems, creating an immediate opportunity for Orange Business to deliver its Orange Drone Guardian offer. This is a budgeted procurement within the next 12 months, and the urgency is amplified by recent drone incidents at major airports across Europe and beyond. Orange can provide a sovereign, certified solution leveraging its cybersecurity and defense expertise.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€95.9m	€95.9m	€1.4m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€95.9m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-21..2026-08-05
Assumed obtainable share of the serviceable market	1.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 5 matching notices, matched on vertical via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Counter-UAS Solution for Lithuanian Defense

This diagram shows how Orange Drone Guardian integrates detection, analytics, and countermeasures to protect critical sites from drone threats. Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

Unauthorized drones have caused shutdowns and security alerts at major airports, including Leipzig/Halle and Ben Gurion, highlighting a tangible threat to critical infrastructure. Governments are responding by expanding drone security research and deploying air defense systems, as seen in Germany. Defense procurement agencies in Lithuania and Norway are actively seeking drone detection and countermeasure capabilities, with Norway specifically requesting passive and electro-optical sensors for surface-based air defense. This convergence of incidents and procurement signals a clear market shift toward counter-UAS solutions.

Who buys, and why now

The contracting authority is the Lithuanian Defense Resources Agency, which will sign the procurement. The operational pain is felt by defense and security personnel responsible for protecting airspace and critical sites from drone incursions. The trigger is the recent wave of drone incidents at airports, which has elevated counter-UAS to a priority, and the agency's own budgeted procurement timeline. They need to detect and neutralize drones that could disrupt operations or pose security threats.

What Orange would deliver, and why it can win

What Orange would deliver

Orange would deliver the Orange Drone Guardian offer, a comprehensive counter-UAS solution. The engagement would start with a threat assessment and site survey, leveraging Orange Group researchers and defense and security experts to tailor the deployment. The solution would integrate detection sensors, command-and-control software, and countermeasures, all certified to ISO 27001 and SecNumCloud for security and sovereignty. Orange would manage the deployment and ongoing operations, ensuring seamless integration with existing customer infrastructure.

Why Orange can win

Orange can win because it combines a dedicated counter-UAS offer (Orange Drone Guardian) with deep cybersecurity and defense expertise, backed by Orange Group researchers. The solution is certified to ISO 27001 and SecNumCloud, addressing sovereignty concerns that are critical in defense procurements. While competitors like Dedrone and HENSOLDT have specialized drone detection, Orange's ability to provide a fully integrated, sovereign solution with end-to-end support is a differentiator.

Named assets behind this — each individually inspectable (LK-08)

Competitive landscape

MEDIUM competitive intensity (score 5.6; 0 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

Competitors include specialized security firms like Dedrone by Axon, HENSOLDT, and Thales, which have strong drone detection and counter-UAS products. Airbus Protect and Leonardo also compete in this space. Global systems integrators like Atos/Eviden and sovereign cloud providers like Dassault Systemes/3DS Outscale may offer adjacent capabilities. Palantir could provide data analytics. The customer will compare Orange's integrated, certified solution against these specialized offerings, weighing sovereignty and full-service support against point solutions.

Competitor	Category	Position here	Basis	Evidence
------------	----------	---------------	-------	----------

Airbus Protect	Security specialist	sells Drones and UAS; active in Defense; competes in Cybersecurity	structural	—
Dedrone by Axon	Security specialist	sells Drones and UAS; active in Defense; competes in Cybersecurity	structural	—
HENSOLDT	Security specialist	sells Drones and UAS; active in Defense; competes in Cybersecurity	structural	—
Leonardo	Security specialist	sells Drones and UAS; active in Defense; competes in Cybersecurity	structural	—
Thales	Security specialist	sells Drones and UAS; active in Defense; competes in Cybersecurity	structural	—
Atos / Eviden	Global systems integrator	active in Defense; competes in Cybersecurity	structural	—
Dassault Systemes / 3DS Outscale	Sovereign cloud provider	active in Defense	structural	—
Palantir	Data and AI platform	active in Defense	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar.
structural means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What specific drone threats are you most concerned about (e.g., hobbyist, terrorist, or military-grade)?
- 2 What is the typical airspace environment you need to protect (e.g., airport, military base, urban area)?
- 3 Do you have existing detection or countermeasure systems in place, and if so, what gaps are you trying to fill?
- 4 What is your timeline for deployment, and is there a budget already allocated for this procurement?
- 5 Are there specific sovereignty or certification requirements (e.g., local data hosting, security clearances) that the solution must meet?
- 6 Who will be the end-users of the system, and what level of training or support do they require?

Objections you will meet

They will say	You can answer
We are considering specialized counter-UAS vendors like Dedrone or HENSOLDT with proven systems.	That's a fair point, and those vendors have strong offerings. However, Orange Drone Guardian is designed to integrate seamlessly with your existing security infrastructure, and our ISO 27001 and SecNumCloud certifications ensure the highest level of sovereignty and security, which is critical for defense. We also bring end-to-end support and the backing of Orange Group researchers.
Your solution is not battle-tested in real-world drone incidents.	You're right that we don't have public case studies of Orange Drone Guardian in action. However, our solution is built on proven technologies and our cybersecurity and defense expertise. We can provide a pilot deployment to demonstrate its effectiveness in your environment before full rollout.
We are concerned about the cost compared to simpler point solutions.	Cost is always a consideration. While our integrated solution may have a higher upfront cost, it reduces total cost of ownership by avoiding multiple vendors and integration challenges. Our sovereign, certified approach also mitigates risks that could lead to costly failures or compliance issues.

Risks and unknowns

The procurement is at an early stage, and the specific requirements are not yet public. There is a risk that the agency may favor a specialized vendor with a proven track record in counter-UAS, such as Dedrone or HENSOLDT. The effectiveness of Orange Drone Guardian against advanced drone threats is not yet demonstrated in public domain. Additionally, the regulatory environment for counter-UAS operations is evolving, which could affect deployment.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for the Lithuanian Defense Resources Agency procurement, differentiating Orange Drone Guardian by highlighting our cybersecurity and defense experts, and ensuring the proposal aligns with the agency's procurement criteria, including any required certifications.

Sales	In a meeting with the Lithuanian Defense Resources Agency's procurement lead, say: 'Orange's Drone Guardian offer, backed by our ISO 27001 and SecNumCloud certifications, can address your drone detection and countermeasure needs—let's discuss how we can tailor it to your specific requirements.'
Strategist / Innovator	Commission a deep-dive brief on the Lithuanian Defense Resources Agency's counter-UAS procurement, mapping Orange's cybersecurity and defense expertise against the agency's stated requirements and identifying any gaps in certification or capability that need to be addressed before bidding.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: diagram (2 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
