

WAN optimization and management for national postal and research networks.

Public / Government sector × Network automation and assurance × SD-WAN · OS014 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
60 is the world moving	84 can we play, can we win	HIGH 0 named in the evidence	€55.0m observed evidence · per year	NOW budgeted procurement within 1...	L0 3 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity targets national postal operators and research institutions in Europe that need to modernize their wide area networks. With recent public tenders for SD-WAN services and research network connectivity, there is a clear demand for managed, secure, and high-performance WAN solutions. Orange Business can address this with its Flexible SD-WAN offer, Evolution Platform, and strong security credentials.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€220m €220m – €482m	€55.0m €55.0m – €120m	€3.3m €3.3m – €7.2m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€220m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-05
Assumed obtainable share of the serviceable market	6.0 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 34 matching notices, matched on vertical via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Managed SD-WAN for Public Sector

This diagram shows how Orange's managed SD-WAN integrates with customer sites and research networks, secured by certifications and automated via the Evolution Platform.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Who buys, and why now

The buyer is typically the CIO or IT director of a national postal operator or a research institution. The pain is managing a complex, legacy WAN that is costly to operate and lacks flexibility to support new digital services. The trigger is often a public tender for network services, as seen with Poczta Polska and the Bulgarian institute, or a mandate to improve digital service delivery to citizens.

Why it is hot now — every claim bound to a dated source

- Procurement for SD-WAN services for Poczta Polska signals demand for modern WAN management in public enterprises. [SIG-FC4EFC7761FF]
- Procurement for connectivity to the GEANT research network indicates needs for specialized WAN services in research institutions. [SIG-7D8D452993E3]

What Orange would deliver, and why it can win

Why Orange can win

Orange is a Leader in Global WAN Services, with a strong portfolio including Flexible SD-WAN and the Evolution Platform. Its certifications (ISO 27001, SecNumCloud, CISPE) address trust and sovereignty concerns critical for public sector clients. The reference of Grand Paris Sud demonstrates successful implementation in a public context. However, the assets are not unique; competitors also offer SD-WAN, so differentiation must come from the integration of security, automation, and public sector experience.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Evolution Platform	offer	L0	offer addresses the use case AND provides the technology	unconfirmed
Flexible SD-WAN	offer	L0	offer addresses the use case AND provides the technology	unconfirmed
Cisco	partner	L2	partner provides the required technology	unconfirmed
ISO 27001	certification	SUP	certification Orange holds is required by this vertical	unconfirmed
SecNumCloud	certification	SUP	certification Orange holds is required by this vertical	unconfirmed
CISPE	certification	SUP	certification Orange holds is required by this vertical	unconfirmed
Leader — Global WAN Services	analyst position	SUP	analyst recognition covers this technology or use case	unconfirmed

Orange Group researchers	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed
Grand Paris Sud	reference	SUP	published reference in this vertical, different use case	unconfirmed

Competitive landscape

HIGH competitive intensity (score 8.0; 0 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitors include major telecom operators like BT, Colt, Deutsche Telekom, Lumen, Proximus, Swisscom, and Verizon, all offering SD-WAN. They are strong in connectivity and have existing relationships with public sector clients. NTT DATA, as a global systems integrator, brings strong integration capabilities. The customer will compare on price, service level, security certifications, and local presence. Orange must leverage its leadership position and security credentials to stand out.

Competitor	Category	Position here	Basis	Evidence
BT Business	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—
Colt Technology Services	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—
Deutsche Telekom / T-Systems	Telecom operator peer	sells SD-WAN; active in Public / Government sector; competes in Connectivity Solutions	structural	—
Lumen Technologies	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—
NTT DATA	Global systems integrator	sells SD-WAN; competes in Connectivity Solutions	structural	—
Proximus	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—
Swisscom	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—
Verizon Business	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What are the main challenges with your current WAN in terms of performance, cost, or management?
- 2 Are you planning to expand or transform your network to support new digital services for citizens or researchers?
- 3 Do you have any specific security or sovereignty requirements for your network services?
- 4 What is your timeline for procuring new WAN services, and is there a formal tender process?
- 5 How many sites do you need to connect, and what are the bandwidth requirements?
- 6 Are you considering integrating with research networks like GEANT, and what are the technical constraints?

Objections you will meet

They will say	You can answer
Your solution seems more expensive than other SD-WAN offers.	While our upfront costs may be higher, our managed service includes advanced automation and security features that reduce operational overhead and risk, providing a lower total cost of ownership over time.
We already have a preferred telecom provider for our network.	We understand that. However, our leadership in WAN services and our security certifications (ISO 27001, SecNumCloud) can add value beyond basic connectivity, especially for public sector entities with strict compliance needs.
Our research network requires very specialized connectivity to GEANT.	We have experience with large-scale network integration and can leverage our Orange Group researchers and partners to design a solution that meets the specific performance and reliability requirements of research networks.

Risks and unknowns

The main risk is that the customer may prioritize cost over value, leading to a price war with competitors. There is also uncertainty about the specific technical requirements of the research network connectivity, which may require specialized expertise. Additionally, the public procurement process can be lengthy and bureaucratic, potentially stalling the deal. It is not yet known if the customer has a preference for a particular technology partner, which could affect the solution design.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for a national postal operator or research network, incorporating the Evolution Platform and Flexible SD-WAN offers, and referencing the Grand Paris Sud case study to demonstrate our capability in public sector network transformation.
Sales	In a meeting with a national postal operator's IT director, say: 'Our Flexible SD-WAN offer, backed by our Leader position in Global WAN Services and ISO 27001 certification, can modernize your network while ensuring security and compliance.'
Strategist / Innovator	Commission a deep-dive brief on SD-WAN opportunities in the public sector, leveraging the Evolution Platform and Flexible SD-WAN offers, and the Leader position in Global WAN Services, to define a go-to-market strategy for postal and research networks.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: what_is_changing (named entities that were never supplied: Poczta Polska S.A., , GEANT); what_orange_would_deliver (named entities that were never supplied: Poczta Polska S.A., , GEANT)
