

Offer EHDS-compliant health data platforms for European hospital groups to achieve EHR interoperability and secondary-use readiness.

Healthcare × Clinical data interoperability × Cloud data platform · OS024 v3 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
80 is the world moving	64 can we play, can we win	HIGH 0 named in the evidence	€817m partial evidence · per year	NOW budgeted procurement within 1...	L1 20 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

We offer EHDS-compliant health data platforms for European hospital groups, enabling EHR interoperability and secondary-use readiness. This opportunity exists now because the European Health Data Space regulation is defining common specifications for EHR systems and a European Electronic Health Exchange Format, pushing hospitals to adapt. Our solution leverages Orange's secure cloud and healthcare expertise to help hospitals meet these new requirements.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€1.3bn €109m – €6.3bn	€817m €67.0m – €3.9bn	€22.9m €1.9m – €109m	partial
Observed: tendered contract value, annualised	€70.8m	€70.8m	€2.0m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Healthcare (EU27_2020)	46,762 enterprises	observed	Eurostat · sbs_sc_ovw	2024
Enterprises adopting Cloud data platform	24.0 % of enterprises (10+ employees)	proxy	Eurostat · isoc_cicce_usen2 · E_CC_PDB	2025
Annual value of one engagement	€970k per enterprise per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-07-22
Size-weighted buyer base	5,698 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Adoption rate is a declared proxy. Cloud-hosted database Part of this vertical is not covered separately by the enterprise ICT survey, so the all-activities rate was used for those slices. Contract values are observed from EU public procurement (TED). For private-sector verticals they are used as a proxy for comparable enterprise deal size: the buying entity differs, the scope of work is comparable. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders. Sector adoption is read from Eurostat's all-activities aggregate for part of this vertical, which the enterprise ICT survey does not cover separately: PROXY — ICT survey excludes health activities; PROXY — residential care

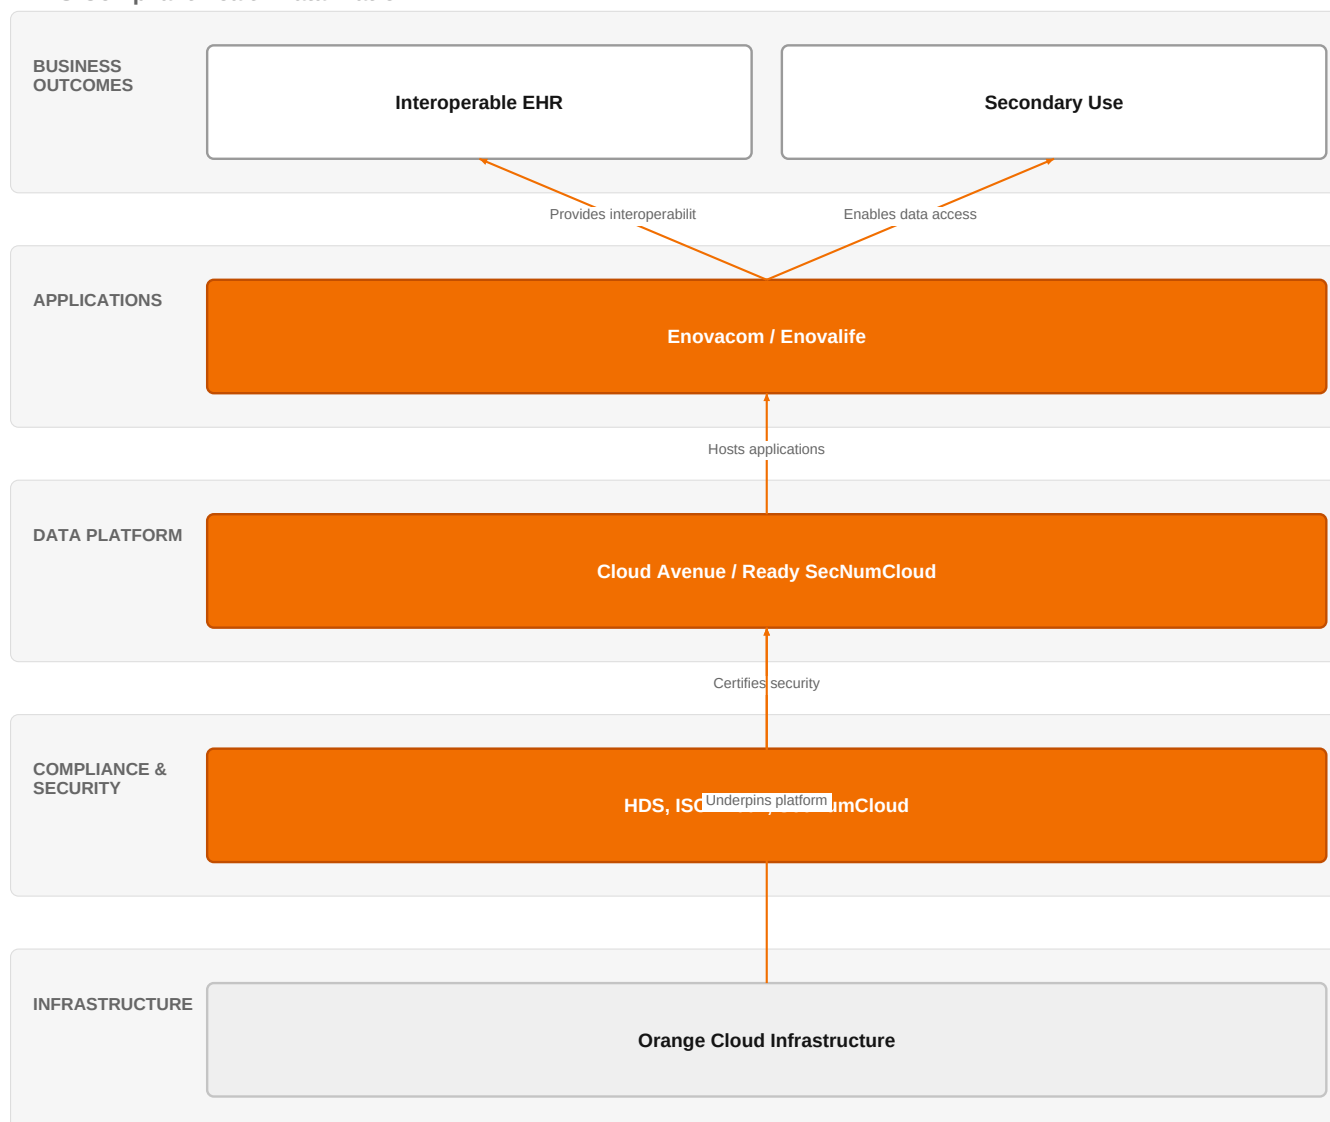

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€70.8m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-07-22
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 7 matching notices, matched on vertical via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

EHDS-Compliant Health Data Platform

■ Orange asset ■ Partner ■ Customer-owned ■ Third party / to be sourced

This diagram shows how Orange's certified cloud and healthcare interoperability platform deliver EHDS-compliant EHR interoperability and secondary-use readiness.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Who buys, and why now

The chief information officer or chief medical information officer of a European hospital group signs the contract, but the pain is felt by the clinical IT team and data governance officers who struggle with fragmented EHR systems and lack of standardized data exchange. The trigger is the upcoming EHDS compliance deadlines, which force hospitals to upgrade their data platforms to meet common specifications and secure processing requirements. They need to enable seamless EHR interoperability for patient care and prepare for secondary use of health data for research and innovation.

Why it is hot now — every claim bound to a dated source

- The European Health Data Space introduces common specifications for EHR systems and a European Electronic Health Exchange Format. [SIG-05DBE1C737A9, SIG-E02F419156FA]

- The EHDS defines requirements for secure processing environments for health data. [SIG-8D64FD10F3A7]
- The European Health Data Space is issuing common specifications for harmonised software components of EHR systems. [SIG-E02F419156FA]
- The European Health Data Space defines a European Electronic Health Exchange Format. [SIG-05DBE1C737A9]
- The European Health Data Space sets requirements for secure processing environments. [SIG-8D64FD10F3A7]
- The European Health Data Space is defining common specifications for EHR system components and secure processing environments, driving demand for compliant data platforms. [SIG-8D64FD10F3A7, SIG-E02F419156FA]
- The European Health Data Space regulation introduces common specifications for harmonised EHR system components. [SIG-E02F419156FA]
- The European Electronic Health Exchange Format specifications define exchange requirements for health data. [SIG-05DBE1C737A9]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a solution using its Cloud Avenue / Ready SecNumCloud as the secure cloud foundation, certified with HDS, ISO 27001, and SecNumCloud. On top of this, Enovacom / Enovalife would provide healthcare-specific interoperability and data integration capabilities. Orange's AI / Data / Cloud experts and Healthcare experts would design and implement the platform, ensuring compliance with EHDS common specifications and secure processing environments. The engagement would start with an assessment of the hospital's current EHR landscape, followed by a roadmap to achieve interoperability and secondary-use readiness, then deploy the platform and integrate with existing systems.

Why Orange can win

Orange can win because it combines sovereign, certified cloud infrastructure (Cloud Avenue / Ready SecNumCloud with HDS, ISO 27001, SecNumCloud) with healthcare-specific expertise (Enovacom / Enovalife) and a pool of AI/Data/Cloud and Healthcare experts. This dual capability is rare among competitors, who either offer generic cloud platforms or lack healthcare domain depth. Orange's certifications are particularly relevant for health data sovereignty and trust, which is a cross-cutting axis for the Group.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator

Competitive landscape

HIGH competitive intensity (score 8.6; 0 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitors include hyperscalers AWS, Google Cloud, and Microsoft, who offer cloud data platforms but may lack healthcare-specific compliance and interoperability features. Global systems integrators like Accenture, Capgemini, DXC Technology, Infosys, and Sopra Steria also compete, bringing integration expertise but often relying on third-party cloud infrastructure. The customer will compare Orange's sovereign, certified cloud and healthcare domain knowledge against these alternatives, which may be stronger in generic cloud capabilities but weaker in healthcare-specific compliance and trust.

Competitor	Category	Position here	Basis	Evidence
AWS	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Google Cloud	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Accenture	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Capgemini	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
DXC Technology	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Infosys	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Sopra Steria	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is your current EHR interoperability maturity, and have you started mapping your systems against the EHDS common specifications?
- 2 Do you have a timeline for achieving EHDS compliance, and who in your organization is accountable for it?
- 3 What is your current approach to secondary use of health data, and do you have a secure processing environment in place?
- 4 Which of your existing systems are causing the biggest interoperability pain points?
- 5 Have you already engaged with any vendors on EHDS readiness, and what did you learn from that?
- 6 What are your data sovereignty and hosting requirements, and do you require a certified cloud provider?

Objections you will meet

They will say	You can answer
We already have a cloud platform from a hyperscaler; why do we need Orange?	That's a fair point. Hyperscalers offer strong cloud capabilities, but they may not have healthcare-specific certifications like HDS or the deep healthcare interoperability expertise that Orange brings with Enovacom. Orange can provide a sovereign, certified environment that meets EHDS requirements out of the box.
EHDS is still evolving; we can wait until the final specifications are published.	You're right that specifications are still evolving, but the direction is clear. Starting now with a flexible platform that can adapt to final requirements puts you ahead of the curve and avoids a last-minute scramble. Orange's experts stay on top of these changes and can help you future-proof your investment.

We have internal IT teams that can handle this.	Your internal teams are certainly capable, but EHDS compliance requires specialized knowledge of the regulations and secure processing environments. Orange brings certified infrastructure and healthcare domain expertise that can accelerate your timeline and reduce risk, allowing your team to focus on patient care.
---	---

Risks and unknowns

The main risk is that EHDS specifications are still evolving, and hospitals may delay investment until final requirements are clear. There is also uncertainty about how strictly enforcement will be applied and what the actual certification process will entail. Additionally, the competitive landscape is intense, with hyperscalers and global SIs offering strong alternatives. Orange's assets are strong but not unique; the differentiation must be proven in practice.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for a European hospital group's EHDS compliance project, highlighting how Enovacom / Enovalife enables EHR interoperability and how Cloud Avenue / Ready SecNumCloud provides a secure, certified environment for secondary use of health data, referencing our ISO 27001, SecNumCloud, and HDS certifications.
Sales	In a meeting with a European hospital group's chief information officer, say: 'We can help you prepare for EHDS compliance by leveraging our Enovacom solutions for EHR interoperability and our Cloud Avenue platform with HDS and SecNumCloud certifications to ensure secure processing of health data.'
Strategist / Innovator	Deep-dive on the EHDS technical specifications for EHR interoperability and secondary use, mapping them against the capabilities of Cloud Avenue / Ready SecNumCloud and Enovacom / Enovalife to identify gaps and investment priorities for the next quarter.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: what_is_changing (named entities that were never supplied: TriNetX); diagram (1 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
