

SIEM and SOC services for Malta's Water Services Corporation to monitor and respond to security threats.

Public / Government sector × Threat detection and response × SIEM and SOAR · OS028 v3 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
65 is the world moving	76 can we play, can we win	MEDIUM 0 named in the evidence	€7.0m observed evidence · per year	NOW budgeted procurement within 1...	L0 18 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€50.5m €50.5m – €184m	€7.0m €7.0m – €25.4m	€419k €419k – €1.5m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€50.5m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-05
Assumed obtainable share of the serviceable market	6.0 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 16 matching notices, matched on use case via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Managed SIEM and SOC for Water Utility

This diagram shows how Orange delivers a fully managed SIEM and SOC service, integrating customer IT and OT data with partner technology and Orange's certified expertise to secure water services.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Why it is hot now — every claim bound to a dated source

- The Local Government Management Agency is procuring a single-party framework for a National Security Operations Centre (SOC), indicating a centralised threat detection and response capability for Irish local government.

[SIG-8974405096C5]

- Water Services Corporation in Malta is tendering a framework for the provision and installation of SIEM and SOC services, indicating a need for security monitoring and incident response for a critical utility. [SIG-DA67B1A3D4CA]
- Water Services Corporation in Malta is establishing a framework for SIEM and SOC services. [SIG-DA67B1A3D4CA]
- The Water Services Corporation in Malta is tendering a framework for SIEM and SOC services. [SIG-DA67B1A3D4CA]
- Water Services Corporation in Malta is tendering a framework for SIEM and SOC services. [SIG-DA67B1A3D4CA]
- Malta's Water Services Corporation is procuring SIEM and SOC services. [SIG-018E7696A719]
- The Polish Ministry of State Assets is procuring a Security Operations Center service. [SIG-7A1BC349557D]
- CISA directs federal agencies to prioritize security patches based on risk, indicating a regulatory push for effective patch management. [SIG-A8721B176427]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would deliver a managed SIEM and SOC service built on Orange Cyberdefense managed services, leveraging our ISO 27001 certified processes and SecNumCloud-certified infrastructure for sovereign operations. The engagement would start with a security assessment and architecture design, then deploy SIEM technology (potentially in partnership

with Palo Alto Networks) to collect and correlate logs from the corporation's IT and OT systems. Orange's Cybersecurity experts would provide 24/7 monitoring, threat detection, and incident response, with escalation procedures defined. The service would be delivered under a framework agreement, ensuring flexibility and scalability.

Why Orange can win

Orange can win because of its certified and sovereign delivery capabilities: ISO 27001 and SecNumCloud certifications provide the trust required for a critical national utility. The Orange Cyberdefense managed services offer is a proven, comprehensive solution, and our partnership with Palo Alto Networks strengthens our technology stack. Additionally, our reference with Grand Paris Sud demonstrates successful delivery of similar security services to public sector clients. However, the competitive landscape is intense, and we must differentiate on our ability to provide a fully managed, sovereign service tailored to the utility's needs.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Orange Cyberdefense managed services	offer	L0	offer addresses the use case AND provides the technology	unconfirmed

Competitive landscape

MEDIUM competitive intensity (score 7.1; 0 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

Competitors include global systems integrators like Atos/Eviden, telecom peers BT Business and Telefonica Tech, and security specialists such as Airbus Protect, CrowdStrike, Leonardo, and Palo Alto Networks (who is also our partner). Nomios, a regional integrator, may also bid. Each brings strengths: Atos/Eviden and Telefonica Tech have strong public sector relationships; CrowdStrike is known for its advanced endpoint detection; Palo Alto Networks offers leading SIEM technology. The customer will likely compare on technology maturity, local presence, and price. Orange must highlight its sovereign, certified offering and existing partner ecosystem to stand out.

Competitor	Category	Position here	Basis	Evidence
Atos / Eviden	Global systems integrator	sells SIEM and SOAR; active in Public / Government sector; competes in Cybersecurity	structural	—
BT Business	Telecom operator peer	sells SIEM and SOAR; competes in Cybersecurity	structural	—
Telefonica Tech	Telecom operator peer	sells SIEM and SOAR; active in Public / Government sector; competes in Cybersecurity	structural	—
Airbus Protect	Security specialist	sells SIEM and SOAR; active in Public / Government sector; competes in Cybersecurity	structural	—
CrowdStrike	Security specialist	sells SIEM and SOAR; competes in Cybersecurity	structural	—

Leonardo	Security specialist	sells SIEM and SOAR; active in Public / Government sector; competes in Cybersecurity	structural	—
Palo Alto Networks	Security specialist	sells SIEM and SOAR; competes in Cybersecurity — also an Orange partner	structural	—
Nomios	Regional integrator or reseller	sells SIEM and SOAR; competes in Cybersecurity	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is the current state of your security operations – do you have an in-house SOC or are you fully outsourced?
- 2 Which critical systems (e.g., SCADA, billing, customer data) are most in need of monitoring, and what are the current gaps in visibility?
- 3 What regulatory or compliance requirements (e.g., NIS, GDPR) are driving the need for SIEM and SOC services?
- 4 What is the expected timeline for the framework award and go-live, and are there any constraints on deployment (e.g., data residency, on-premise vs cloud)?
- 5 Have you previously engaged with any of the potential bidders, and what were the outcomes or lessons learned?
- 6 What is the budget range for this framework, and how does it align with your overall security investment plan?

Objections you will meet

They will say	You can answer
We are concerned about the cost of a managed SOC service compared to building our own capability.	That is a valid concern. Building an in-house SOC requires significant investment in technology, hiring, and training, plus ongoing operational costs. Our managed service provides a predictable subscription model, and we can scale up or down based on your needs. Additionally, our ISO 27001 and SecNumCloud certifications ensure we meet the highest security standards, reducing the risk of costly breaches.
We already have a security partner; why should we switch?	We understand you have existing relationships. However, our Orange Cyberdefense managed services are backed by a global team of experts and a proven track record with public sector clients like Grand Paris Sud. We also offer a sovereign, certified solution that may better align with your regulatory requirements. We would be happy to conduct a gap analysis to show where we can add value.
How do you ensure the security of our data, especially given the sensitive nature of water infrastructure?	Data security is paramount. Our services are delivered on SecNumCloud-certified infrastructure, ensuring sovereign and compliant handling of your data. We are ISO 27001 certified, and our processes are designed to meet the strictest requirements. We also work with trusted partners like Palo Alto Networks, but the data remains under our control, and we can provide detailed information on data residency and access controls.

Risks and unknowns

A key risk is that the tender may favor a local or lower-cost provider, given the framework nature. There is also uncertainty about the specific scope and whether the customer will require on-premise or cloud-based SIEM, and whether they will accept a partner-delivered solution. Additionally, the timeline for award and implementation is not yet known, and the customer's existing security infrastructure is not detailed in the evidence. These unknowns could affect the solution design and competitive positioning.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for the Water Services Corporation tender, differentiating our offer by highlighting Orange Cyberdefense managed services, ISO 27001 and SecNumCloud certifications, and the Palo Alto Networks partnership, while referencing the Grand Paris Sud deployment as a proof point.
Sales	In a meeting with the Water Services Corporation's IT security lead, open with: 'Given your upcoming SIEM and SOC framework, Orange Cyberdefense's managed services, backed by ISO 27001 and our partnership with Palo Alto Networks, can provide a robust threat detection and response capability tailored for a critical utility.'
Strategist / Innovator	Commission a deep-dive brief on how Orange Cyberdefense managed services can be positioned for the Maltese Water Services Corporation's SIEM and SOC tender, leveraging the ISO 27001 and SecNumCloud certifications and the Palo Alto Networks partnership.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: summary (named entities that were never supplied: Water Services Corporation, Local Government Management Agency, Ministerstwo Aktywow Panstwowych); what_is_changing (named entities that were never supplied: Water Services Corporation, Local Government Management Agency, Ministerstwo Aktywow Panstwowych); who_buys_and_why (named entities that were never supplied: Water Services Corporation, Local Government Management Agency, Ministerstwo Aktywow Panstwowych)
