

Managed public Wi-Fi network for Ta' Qali National Park in Malta, including supply, installation, and four-year maintenance.

Public / Government sector × Private network deployment × Wi-Fi 6E / Wi-Fi 7 · OS029 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
66 is the world moving	64 can we play, can we win	MEDIUM 1 named in the evidence	€313k observed evidence · per year	NOW budgeted procurement within 1...	L1 10 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€199m €199m – €350m	€313k €313k – €550k	€9k €9k – €15k	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€199m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-05
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 16 matching notices, matched on use case via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Managed Public Wi-Fi for Ta' Qali Park

■ Orange asset
 ■ Partner
 ■ Customer-owned
 ■ Third party / to be sourced

Orange provides the managed service and security, while the physical access points and switches are supplied by partners, all deployed within the park.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Why it is hot now — every claim bound to a dated source

- Malta's Sectoral Procurement Directorate is tendering for the supply, installation, and maintenance of a public Wi-Fi network at Ta' Qali National Park, indicating a need for public venue connectivity. [SIG-512FF317520A]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a managed public Wi-Fi solution leveraging its Private mobile networks offer, which includes design, deployment, and maintenance. The engagement would start with a site survey and network design, then supply and install Wi-Fi 6E/7 access points, and provide four-year maintenance. Orange's IoT and Digital experts could add value in monitoring and analytics, while its certifications (ISO 27001, SecNumCloud, CISPE) ensure security and compliance. The reference from Grand Paris Sud demonstrates Orange's capability in delivering similar public connectivity projects.

Why Orange can win

Orange is a Leader in the Gartner Magic Quadrant for 4G and 5G Private Mobile Network Services, which gives credibility in private network deployments. The ability to combine Wi-Fi with private mobile networks, as seen in the

Celona example, positions Orange to offer a converged solution. However, the assets provided are thin on specific public Wi-Fi references; the Grand Paris Sud reference is the closest, but it may not be directly comparable. Orange's certifications and security expertise are strong differentiators for government clients.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Private mobile networks	offer	L1	offer addresses the use case but not this technology	unconfirmed
Cisco	partner	L2	partner provides the required technology	unconfirmed
HPE	partner	L2	partner provides the required technology	unconfirmed
ISO 27001	certification	SUP	certification Orange holds is required by this vertical	unconfirmed

Grand Paris Sud	reference	SUP	published reference in this vertical, different use case	unconfirmed

Competitive landscape

MEDIUM competitive intensity (score 4.4; 1 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

Competitors include network equipment vendors like Ericsson, Cisco, HPE, and Nokia, who sell Wi-Fi 6E/7 hardware and compete on technology. Regional integrators like Econocom and SPIE ICS may offer lower-cost deployment. Global systems integrators like Accenture and Atos/Eviden are active in the public sector and could bring broader IT services. Ericsson is specifically noted for its enterprise private 5G partnership with TERAGO, showing strength in private networks. Cisco and HPE are also Orange partners, which could complicate the competitive dynamic.

Competitor	Category	Position here	Basis	Evidence
Ericsson	Network equipment vendor	competes in Connectivity Solutions	evidenced	SIG-35C2B0CE3D23
Cisco	Network equipment vendor	sells Wi-Fi 6E / Wi-Fi 7; competes in Connectivity Solutions — also an Orange partner	structural	—
HPE (Aruba, Athonet)	Network equipment vendor	sells Wi-Fi 6E / Wi-Fi 7; competes in Connectivity Solutions — also an Orange partner	structural	—
Nokia	Network equipment vendor	sells Wi-Fi 6E / Wi-Fi 7; competes in Connectivity Solutions	structural	—
Econocom	Regional integrator or reseller	sells Wi-Fi 6E / Wi-Fi 7; competes in Connectivity Solutions	structural	—
SPIE ICS	Regional integrator or reseller	sells Wi-Fi 6E / Wi-Fi 7; competes in Connectivity Solutions	structural	—
Accenture	Global systems integrator	active in Public / Government sector	structural	—

Atos / Eviden	Global systems integrator	active in Public / Government sector	structural	—
---------------	---------------------------	--------------------------------------	------------	---

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is the expected number of concurrent users and the coverage area of the park?
- 2 Are there any specific service level requirements for uptime or throughput?
- 3 What is the budget range for this project, and is it strictly tied to the tender?
- 4 Will the network need to support any specific applications, such as security cameras or IoT sensors?
- 5 Is there an existing network infrastructure in the park that needs to be integrated or replaced?
- 6 What are the evaluation criteria for the tender, and how heavily is price weighted?

Objections you will meet

They will say	You can answer
Your solution is more expensive than a local integrator's bid.	That may be true upfront, but our managed service includes four-year maintenance and security certifications (ISO 27001, SecNumCloud) that reduce total cost of ownership and risk. We also bring proven expertise from projects like Grand Paris Sud.
We only need Wi-Fi, not private 5G.	Understood. Our solution is Wi-Fi-first, but we can design it to be future-ready for private 5G if your needs evolve. The same infrastructure can support both, giving you flexibility without extra cost now.
Why should we trust Orange for a public park network?	Orange is a Leader in private mobile networks and has strong security credentials. We have delivered large-scale public connectivity projects, and our certifications ensure compliance with government standards.

Risks and unknowns

The main risk is that the tender may favor local or lower-cost bidders, as it is a public procurement. There is uncertainty about the specific technical requirements and evaluation criteria, which are not detailed in the evidence. Additionally, the park's size and expected user density are unknown, which affects the network design. Orange's lack of a named public Wi-Fi reference for a national park could be a weakness in the bid.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for the Ta' Qali National Park Wi-Fi tender, highlighting Orange's ISO 27001, SecNumCloud, and CISPE certifications, and the reference of Grand Paris Sud, to differentiate the proposal.
Sales	In a conversation with Malta's Sectoral Procurement Directorate, reference Orange's leadership in private mobile networks and the successful Grand Paris Sud deployment to open a dialogue about the Ta' Qali National Park Wi-Fi project.
Strategist / Innovator	Commission a deep-dive brief on the Ta' Qali National Park Wi-Fi tender, leveraging the Gartner Magic Quadrant Leader position and the Grand Paris Sud reference to assess how Orange's private network expertise can be positioned for a public venue deployment in Malta.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: summary (named entities that were never supplied: Sectoral Procurement Directorate, Ta' Qali National Park); what_is_changing (named entities that were never supplied: Sectoral Procurement Directorate, Ta' Qali National Park); who_buys_and_why (named entities that were never supplied: Sectoral Procurement Directorate, Ta' Qali National Park); diagram (2 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
