

SD-WAN managed services for national postal and research networks.

Public / Government sector × Multi-site connectivity and resilience × SD-WAN · OS031 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
58 is the world moving	84 can we play, can we win	MEDIUM 1 named in the evidence	€13.0m observed evidence · per year	NOW budgeted procurement within 1...	L0 5 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity targets national postal operators and research institutions that need resilient, high-performance WAN connectivity. With a postal operator already procuring SD-WAN services and a research institute seeking connection to the pan-European GEANT network, there is a clear, immediate demand. Orange Business can deliver managed SD-WAN solutions that ensure reliable, secure multi-site connectivity.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€112m €112m – €258m	€13.0m €13.0m – €29.9m	€781k €781k – €1.8m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€112m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-06
Assumed obtainable share of the serviceable market	6.0 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 24 matching notices, matched on use case via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Managed SD-WAN for Public Sector

This diagram shows how Orange's managed SD-WAN connects postal and research sites securely, with centralized management and security. Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

National postal operators are modernizing their networks to support digital services and operational efficiency, as evidenced by the Polish postal operator's procurement of SD-WAN services. Research institutions are seeking dedicated connectivity to pan-European research networks like GEANT, as shown by the Bulgarian institute's tender. The market is shifting towards unified SASE solutions that converge SD-WAN and security, as highlighted by Palo Alto Networks, and enterprises are evaluating top SD-WAN solutions to meet these evolving needs.

Sources: SIG-FC4EFC7761FF ted.europa.eu 2026-08-04; SIG-7D8D452993E3 ted.europa.eu 2026-08-04; SIG-CCD333959C59 Palo Alto Networks 2026-04-30; SIG-2D8CA832FED0 ET CIO 2026-04-23

Who buys, and why now

The buyer is typically the CIO or head of network operations at a national postal operator or a research institution. The pain is operational: aging MPLS networks are costly and inflexible, hindering the rollout of digital services and secure collaboration. The trigger is a budgeted procurement cycle, as seen in the tenders, or a mandate to connect to a research network like GEANT. They need a partner to manage the complexity of multi-site connectivity, ensure uptime, and provide secure access to cloud and research resources.

Why it is hot now — every claim bound to a dated source

- A national postal operator is procuring SD-WAN operator services. [SIG-FC4EFC7761FF]
- A research institute is procuring wide area network connectivity to a pan-European research network. [SIG-7D8D452993E3]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would deliver a managed SD-WAN service built on Flexible SD-WAN, leveraging the Evolution Platform for orchestration and analytics. The engagement starts with a network assessment, then designs a secure, multi-site SD-WAN architecture, integrating with existing infrastructure. Orange's IoT and digital experts can support edge connectivity, while defense and security experts ensure compliance with certifications like ISO 27001 and SecNumCloud. The service includes 24/7 monitoring, proactive management, and continuous optimization.

Why Orange can win

Orange is a Leader in Global WAN Services, with a strong portfolio including Flexible SD-WAN and the Evolution Platform. Our certifications (ISO 27001, SecNumCloud, CISPE) provide the trust needed for public sector and research networks. We have deep expertise from our IoT, digital, and defense/security teams, and a proven track record with references like Grand Paris Sud. Our partnership with Cisco strengthens our technology stack, and our ability to deliver sovereign, secure solutions is a key differentiator.

Competitive landscape

MEDIUM competitive intensity (score 7.3; 1 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

Competitors include telecom operators like BT, Colt, Deutsche Telekom, Lumen, Proximus, and Swisscom, who all offer SD-WAN services and compete on connectivity. Palo Alto Networks, a security specialist and Orange partner, is strong in SASE convergence, as noted in their own content. NTT DATA, a global systems integrator, brings strong integration capabilities. The customer will compare on price, security features, and the ability to manage complex multi-site networks. Orange's leadership position and sovereign credentials are key differentiators.

Competitor	Category	Position here	Basis	Evidence
Palo Alto Networks	Security specialist	named in this topic's evidence — also an Orange partner	evidenced	SIG-CCD333959C59
BT Business	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—
Colt Technology Services	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—

Deutsche Telekom / T-Systems	Telecom operator peer	sells SD-WAN; active in Public / Government sector; competes in Connectivity Solutions	structural	—
Lumen Technologies	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—
NTT DATA	Global systems integrator	sells SD-WAN; competes in Connectivity Solutions	structural	—
Proximus	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—
Swisscom	Telecom operator peer	sells SD-WAN; competes in Connectivity Solutions	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is your current WAN architecture, and what are the main pain points (cost, performance, security) you are experiencing?
- 2 Are you planning to connect to a pan-European research network like GEANT, and if so, what are the specific connectivity and security requirements?
- 3 What is your timeline for procuring new WAN services, and is there a budget already allocated for this initiative?
- 4 How many sites do you need to connect, and what is the geographic distribution?
- 5 Do you have any specific compliance or sovereignty requirements (e.g., data residency, certifications) that the solution must meet?
- 6 What is your current security posture, and are you considering converging SD-WAN with SSE for a SASE architecture?

Objections you will meet

They will say	You can answer
We already have a reliable MPLS network; why should we switch to SD-WAN?	That's a fair point. MPLS has been the backbone for years. However, SD-WAN offers greater flexibility, lower cost for bandwidth, and better cloud connectivity. With your digital transformation initiatives, SD-WAN can provide the agility you need, and we can manage the migration to minimize disruption.
We are concerned about the security of SD-WAN compared to traditional WAN.	Security is a valid concern. Our SD-WAN solution integrates with leading security platforms, and we hold certifications like ISO 27001 and SecNumCloud. We can also converge with SSE to provide a SASE architecture, ensuring end-to-end security. We'll work with you to meet your specific compliance needs.
We have an existing relationship with another telecom provider; why should we consider Orange?	We understand the value of existing relationships. But Orange is a Leader in Global WAN Services, and we bring unique strengths in sovereign, secure solutions. Our references, like Grand Paris Sud, demonstrate our ability to deliver complex projects. We'd be happy to provide a proof of concept to show the value we can add.

Risks and unknowns

The main risk is that the customer may have existing relationships with incumbent telecom providers, making it hard to displace them. There is also uncertainty about the specific technical requirements of the research network (GEANT) and whether Orange's solution can seamlessly integrate. Additionally, the procurement process may be lengthy, and budget constraints could delay decisions. We need to validate the customer's willingness to switch and their specific security and compliance needs.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for the research institute opportunity, highlighting how Flexible SD-WAN and Evolution Platform can support connectivity to the pan-European research network, and incorporate the certifications (ISO 27001, SecNumCloud, CISPE) and the reference from Grand Paris Sud to demonstrate credibility.
Sales	In a meeting with the head of IT at a national postal operator, say: 'Given your need for multi-site connectivity and resilience, our Flexible SD-WAN offer, backed by our Leader position in Global WAN Services and our ISO 27001 and SecNumCloud certifications, can provide a secure and reliable managed service.'

Strategist / Innovator	Commission a deep-dive brief on the SD-WAN managed services opportunity for national postal and research networks, leveraging the Leader position in Global WAN Services and the Flexible SD-WAN offer, and including an assessment of how to differentiate with ISO 27001, SecNumCloud, and CISPE certifications.
------------------------	--

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: diagram (1 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
