

Deploy drone detection and neutralization systems at airports to counter unauthorized incursions.

Aerospace and defense industry × Drone detection and airspace protection × Drones and UAS · OS034 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
82 is the world moving	45 can we play, can we win	MEDIUM 0 named in the evidence	€5.7m modelled evidence · per year	NEXT regulation adopted or propose...	L0 20 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Evidence gap (SC-13). Orange has 0.0 published reference(s) in Aerospace and defense industry, below the threshold of 5. A customer conversation here has no proof point behind it yet.

The opportunity

Airports worldwide face a growing threat from unauthorized drone incursions, which have caused shutdowns and security reviews. Orange Business can deploy its Orange Drone Guardian solution, combining detection and neutralization capabilities, to protect airspace and ensure operational continuity. This opportunity is urgent now because regulators are proposing mandates and incidents are escalating.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€6.9m €1.2m – €32.6m	€5.7m €1.0m – €26.9m	€86k €15k – €404k	modelled
Observed: tendered contract value, annualised	€45.7m	€45.7m	€686k	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Aerospace and defense industry (EU27_2020)	3,354 enterprises	observed	Eurostat · sbs_sc_ovw	2024
Enterprises adopting Drones and UAS	4.9 % of enterprises (10+ employees)	proxy	Eurostat · isoc_eb_ain2 · E_AI_TAR	2025
Annual value of one engagement	€180k per enterprise per year	assumption	config/sizing.yaml · fallback_bands_eur	size-2026-08-a
Size-weighted buyer base	780 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	1.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Adoption rate is a declared proxy. Artificial intelligence by NACE Rev. 2 activity series E_AI_TAR is used as a proxy for Drones and UAS: Autonomous machines — includes autonomous drones. Contract value is a configured assumption, not observed. Only 0 matching tender notices, below the 6 needed for a robust median, so the configured band for this business domain is used. It is an assumption owned by innovation-radar-curator, not evidence. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders. 3 of 5 declared geographies are outside the European reference data (IL, US, VN); the estimate covers the European footprint only.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€45.7m per year	observed	TED (Tenders Electronic Daily) · ted	2026-07-07..2026-07-08
Assumed obtainable share of the serviceable market	1.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 3 matching notices, matched on vertical via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in

this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size. 3 of 5 declared geographies are outside the European reference data (IL, US, VN); the estimate covers the European footprint only.

The solution, in one picture

Airport Drone Defense Architecture

■ Orange asset ■ Partner ■ Customer-owned ■ Third party / to be sourced

This diagram shows how Orange Drone Guardian integrates detection and neutralization with airport security operations to ensure safe airspace. Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

Unauthorized drone incursions at airports are increasing, with notable incidents at Ben Gurion, Leipzig/Halle, and Tan Son Nhat, forcing security reviews and new measures. Vietnam's Civil Aviation Authority has proposed investing in detection and neutralization systems, and Vietnam has admitted its airports lack such gear, relying on manual observation. Germany has expanded drone security research after an explosive drone was found at an airport, and an air defense system was deployed at Leipzig. These events, combined with regulatory proposals, are pushing airports to move from reactive to proactive drone defense.

Sources: SIG-7214FADD192F Vietnam.vn 2026-08-12; SIG-A776E54DD2E6 Tech Times 2026-08-12; SIG-7E90A97DA15B Tekedia 2026-08-09; SIG-CBC989FFDC45 JFeed 2026-08-11; SIG-F33C1CE85035 Expat.cz 2026-08-07; SIG-FDBC54B7D40 Vietnam.vn 2026-08-12

Who buys, and why now

The airport operations director or head of security signs, but the pain is felt by air traffic control and safety teams who face flight disruptions and safety risks. The trigger is a specific incursion or a regulatory mandate, such as Vietnam's proposal or a near-miss that forces a shutdown. They need to detect drones early and neutralize them without disrupting airport operations.

Why it is hot now — every claim bound to a dated source

- Vietnam's Civil Aviation Authority proposes investing in drone detection and neutralization systems at airports. [SIG-7214FADD192F]
- Vietnam admits airports lack drone-detection gear after an incident at Tan Son Nhat. [SIG-A776E54DD2E6]

- Germany expands drone security research after an explosive drone was found at an airport. [SIG-7E90A97DA15B]
- An unauthorized drone entered Ben Gurion Airport airspace. [SIG-CBC989FFDC45]
- Airports worldwide are experiencing unauthorized drone incursions, prompting security reviews and new detection measures. [SIG-CBC989FFDC45, SIG-F33C1CE85035, SIG-FDBC54B7D40]
- Vietnam has acknowledged gaps in drone detection at its airports, with manual observation still heavily relied upon. [SIG-9FAA82ADDA6A, SIG-A776E54DD2E6]
- Several airports worldwide have experienced notable drone incursions, highlighting a growing threat. [SIG-FDBC54B7D40]
- An unauthorized drone entered Ben Gurion Airport airspace, demonstrating the need for detection. [SIG-CBC989FFDC45]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would deliver the Orange Drone Guardian solution, leveraging its cybersecurity, IoT, and defense expertise. The engagement starts with a site assessment, then deploys detection sensors (radar, RF, acoustic) integrated with a central command platform. Neutralization options (jamming, spoofing) are added, and the system is connected to existing airport security operations. Orange Group researchers support continuous improvement.

Why Orange can win

Orange brings a unique combination of cybersecurity, IoT, and defense expertise, plus its Orange Drone Guardian offer. As a trusted operator, Orange can provide sovereign, secure communications and integration with existing airport infrastructure. Competitors may have specialized detection, but Orange's end-to-end approach and research backing give it an edge.

Named assets behind this — each individually inspectable (LK-08)

Competitive landscape

MEDIUM competitive intensity (score 5.7; 0 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

Competitor	Category	Position here	Basis	Evidence
Airbus Protect	Security specialist	sells Drones and UAS; active in Aerospace and defense industry; competes in Cybersecurity	structural	—
Dedrone by Axon	Security specialist	sells Drones and UAS; active in Aerospace and defense industry; competes in Cybersecurity	structural	—
HENSOLDT	Security specialist	sells Drones and UAS; active in Aerospace and defense industry; competes in Cybersecurity	structural	—
Leonardo	Security specialist	sells Drones and UAS; active in Aerospace and defense industry; competes in Cybersecurity	structural	—
Thales	Security specialist	sells Drones and UAS; active in Aerospace and defense industry; competes in Cybersecurity	structural	—

Atos / Eviden	Global systems integrator	active in Aerospace and defense industry; competes in Cybersecurity	structural	—
Sopra Steria	Global systems integrator	active in Aerospace and defense industry; competes in Cybersecurity	structural	—
Dassault Systemes / 3DS Outscale	Sovereign cloud provider	active in Aerospace and defense industry	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 Have you experienced any unauthorized drone incursions in the past 12 months, and what was the operational impact?
- 2 What is your current drone detection capability—do you rely on manual observation or any automated systems?
- 3 Are you aware of any regulatory proposals or mandates requiring drone detection at your airport?
- 4 Who in your organization is responsible for airspace security, and what budget is allocated for counter-drone measures?
- 5 How do you currently coordinate security responses between air traffic control, security teams, and local authorities?
- 6 What is your timeline for implementing new security measures—are you planning for a specific deadline?

Objections you will meet

They will say	You can answer
We already have a security system in place; why do we need another one?	That's fair—many airports have some measures. But our solution integrates with your existing systems and adds drone-specific detection and neutralization, which most current systems lack. We can demonstrate how it fills the gaps.
Drone detection is too expensive and we don't see the ROI.	Cost is a real concern. However, a single incursion can cause significant disruption and reputational damage. Our solution is scalable, and we can start with a pilot to show value before full deployment.
We're worried about privacy and legal issues with drone neutralization.	That's a valid concern. We work within regulatory frameworks and can tailor neutralization options to comply with local laws. Our approach prioritizes detection and alerting, with neutralization as a last resort.

Risks and unknowns

The main risk is regulatory uncertainty—mandates are proposed but not yet applicable, so airports may delay investment. Technology maturity varies, and neutralization methods face legal and safety constraints. Orange's specific drone detection capabilities are not fully detailed in the evidence, so we must validate our solution's performance against specialized competitors.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Bid brief: assemble a differentiated proposal for an airport authority's drone detection tender, using Orange Drone Guardian and highlighting Orange's cybersecurity and IoT expertise to address integration and threat response.
Sales	In a meeting with a Southeast Asian airport authority's head of security, say: 'Orange Drone Guardian can help you close the drone-detection gap you've acknowledged, moving beyond manual observation to a layered, automated defense.'
Strategist / Innovator	Deep-dive brief: assess Orange Drone Guardian's technical fit against the Vietnamese Civil Aviation Authority's stated need for drone detection and neutralization at airports, leveraging Orange Group researchers and Defense and security experts to map regulatory and procurement pathways.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: competitive_landscape (no claim survived evidence binding); diagram (1 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
