

Drone detection and intervention task forces at national airports to address regulatory gaps and security threats.

Public / Government sector × Drone detection and airspace protection × Drones and UAS · OS036 v2 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
78 is the world moving	62 can we play, can we win	MEDIUM 0 named in the evidence	€220m observed evidence · per year	NEXT regulation adopted or propose...	L0 18 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity is about establishing drone detection and intervention task forces at national airports, addressing regulatory gaps and security threats. It targets public/government sector customers, particularly civil aviation authorities and airport operators, who are responding to increased drone incursions and regulatory pressure to act.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€220m €220m – €482m	€220m €220m – €482m	€7.7m €7.7m – €16.9m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€220m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-05
Assumed obtainable share of the serviceable market	3.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 34 matching notices, matched on vertical via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size. 2 of 3 declared geographies are outside the European reference data (US, VN); the estimate covers the European footprint only.

The solution, in one picture

Drone Detection and Intervention Task Force

This diagram shows how Orange integrates detection, connectivity, and security to enable an airport's drone task force.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

Regulatory and security pressures are converging: Vietnam is setting up working groups to detect and intervene against drones at airports, and its Civil Aviation Authority proposes investing in detection and neutralization systems. Europe faces calls to do more to protect airports from Russian drones, and drone threats are forcing a new look at US airport security. Reports highlight gaps in operator management for drones threatening airports, and there are demonstrations of AI-powered drone detection using 5G networks, indicating technology maturity.

Who buys, and why now

The buyer is typically the civil aviation authority or national security agency, while the airport operator feels the operational pain of incursions disrupting flights and posing safety risks. The trigger is often a specific incident, regulatory mandate, or public pressure, such as the recent drone sightings at airports that have led to temporary shutdowns and heightened media attention.

Why it is hot now — every claim bound to a dated source

- Vietnam is setting up working groups to detect and intervene against drones at airports. [SIG-22C234101FAF]
- Europe must do more to protect airports from Russian drones. [SIG-A3FF6AA13487]
- The Civil Aviation Authority in Vietnam proposes investing in drone detection and neutralization systems. [SIG-7214FADD192F]
- Vietnam's Civil Aviation Authority proposes investing in drone detection and neutralization systems at airports. [SIG-7214FADD192F]
- Drone threats force new look at US airport security. [SIG-69003C1E5931]
- Drones threaten airports, raising questions about operator management gaps. [SIG-D2538605FC42]
- European airports are under threat from drone incursions, with calls for enhanced protection measures. [SIG-A3FF6AA13487]
- Vietnam is establishing working groups to detect and intervene against drones at airports, indicating a regulatory-driven need. [SIG-22C234101FAF]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a solution around the Orange Drone Guardian offer, leveraging cybersecurity and defense experts to design and integrate a detection and intervention capability. The engagement would start with a threat assessment and gap analysis, then deploy detection sensors and command-and-control software, integrate with airport operations, and train a task force. Orange Group researchers could contribute to adapting the solution to specific airport environments.

Why Orange can win

Orange brings a unique combination of trusted connectivity, cybersecurity expertise, and a proven reference at Grand Paris Sud. The Orange Drone Guardian offer is a concrete asset, and the ability to provide a sovereign, certified solution (ISO 27001, SecNumCloud, CISPE) aligns with government requirements. However, the assets are relatively thin for a full task-force solution, so Orange would need to partner for hardware and intervention capabilities.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Orange Drone Guardian	offer	L0	offer addresses the use case AND provides the technology	unconfirmed

Competitive landscape

MEDIUM competitive intensity (score 5.7; 0 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

Competitor	Category	Position here	Basis	Evidence
------------	----------	---------------	-------	----------

Airbus Protect	Security specialist	sells Drones and UAS; active in Public / Government sector; competes in Cybersecurity	structural	—
Dedrone by Axon	Security specialist	sells Drones and UAS; active in Public / Government sector; competes in Cybersecurity	structural	—
HENSOLDT	Security specialist	sells Drones and UAS; competes in Cybersecurity	structural	—
Leonardo	Security specialist	sells Drones and UAS; active in Public / Government sector; competes in Cybersecurity	structural	—
Thales	Security specialist	sells Drones and UAS; active in Public / Government sector; competes in Cybersecurity	structural	—
Accenture	Global systems integrator	active in Public / Government sector	structural	—
Atos / Eviden	Global systems integrator	active in Public / Government sector; competes in Cybersecurity	structural	—
Capgemini	Global systems integrator	active in Public / Government sector	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar.
structural means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 Have you experienced any drone incursions at your airport in the last 12 months, and what was the operational impact?
- 2 What is your current process for detecting and responding to unauthorized drones, and who is responsible?
- 3 Are there any regulatory requirements or directives from your civil aviation authority that mandate drone detection systems?
- 4 What is your budget cycle for security infrastructure investments, and is there an approved funding line for counter-drone measures?
- 5 How do you currently coordinate with national security agencies or law enforcement on airspace security incidents?

Objections you will meet

They will say	You can answer
We already have a drone detection system from a specialist vendor.	That's true, and specialists have strong detection capabilities. However, our value is in integrating that detection with a broader security operations framework, leveraging our cybersecurity expertise and sovereign cloud to ensure data protection and compliance.
This is a niche problem; we don't see it as a priority.	We understand. But with regulatory changes and recent incidents at airports worldwide, the risk is growing. We can help you assess your specific exposure and build a business case for a proportionate response.
We're concerned about the cost and complexity of a full task-force solution.	Cost is a valid concern. We can start with a pilot or phased approach, leveraging existing infrastructure and our Orange Drone Guardian offer to minimize upfront investment. Our goal is to deliver a solution that fits your budget and risk profile.

Risks and unknowns

The main risk is that Orange's current assets are not sufficient to deliver a complete task-force solution without significant partnerships, which could dilute margins and control. Regulatory frameworks for drone intervention are still evolving, and the effectiveness of detection technologies in real-world airport environments is not fully proven. There is also uncertainty about the customer's willingness to fund such initiatives beyond regulatory mandates.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for a national aviation authority, differentiating Orange Drone Guardian by combining it with Orange's cybersecurity and IoT expertise, and referencing the Grand Paris Sud deployment.

Sales	In a meeting with a national aviation authority's security director, say: 'We have a drone detection and intervention capability, Orange Drone Guardian, proven in a French urban environment, that can help you close the regulatory gaps you are facing.'
Strategist / Innovator	Deep-dive the regulatory trajectory in Vietnam and the EU to decide whether to prototype a drone-detection offer for airports, leveraging Orange Drone Guardian and the Grand Paris Sud reference.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: competitive_landscape (no claim survived evidence binding); diagram (2 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
