

Support national health authorities in meeting EHDS requirements for cross-border health data exchange.

Public / Government sector × Clinical data interoperability × Cloud data platform · OS045 v2 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
66 is the world moving	64 can we play, can we win	HIGH 0 named in the evidence	€220m observed evidence · per year	NEXT regulation adopted or propose...	L1 9 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity supports national health authorities in meeting European Health Data Space (EHDS) requirements for cross-border health data exchange. It exists now because the European Commission has published common specifications for EHR systems, exchange formats, and secure processing environments, which national authorities must implement. Orange can assemble a sovereign, certified cloud data platform with healthcare expertise to help authorities comply.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€220m €220m – €482m	€220m €220m – €482m	€6.2m €6.2m – €13.5m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

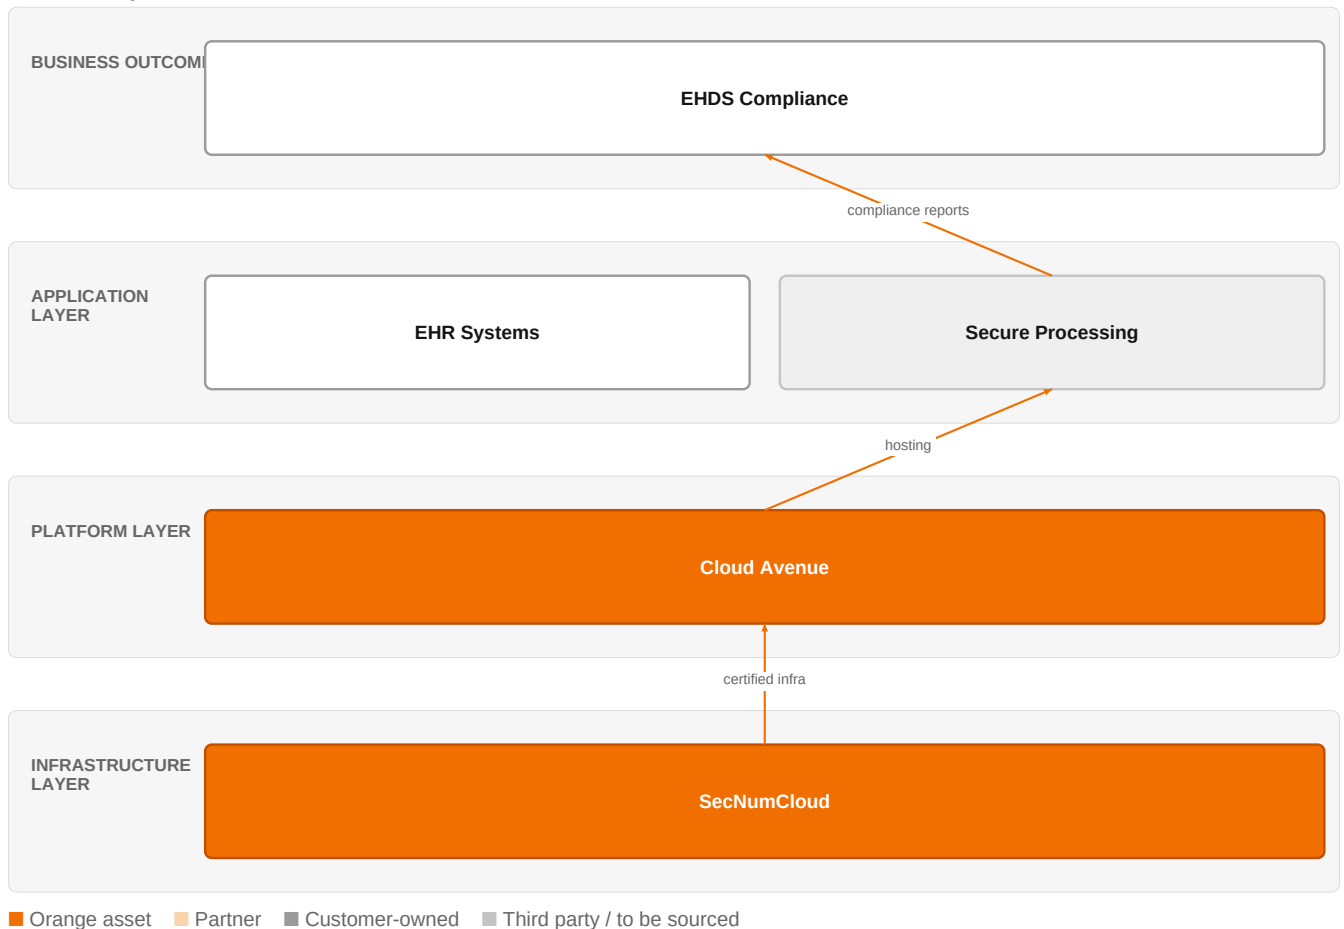

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€220m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-05
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 34 matching notices, matched on vertical via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

EHDS Compliance Platform for National Health Authorities

This diagram shows how Orange's sovereign cloud platform supports EHDS compliance by hosting secure processing environments for health data.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

The European Commission has published common specifications for EHR systems, European Electronic Health Exchange Format, and a European digital testing environment, which national authorities must implement. Requirements for Secure Processing Environments and HealthData@EU requirements define technical and security standards. France's secondary data use already supports EHDS, indicating national-level activity. These regulations are adopted but not yet applicable, creating a compliance window.

Sources: SIG-05DBE1C737A9 ec.europa.eu 2026-03-30; SIG-E02F419156FA ec.europa.eu 2026-06-30; SIG-6CF8BA7EAC6D ec.europa.eu 2026-03-30; SIG-8D64FD10F3A7 ec.europa.eu 2026-03-09; SIG-A263C29CEE4D ec.europa.eu 2025-12-22; SIG-98B33B5AA810 Healthcare IT News 2026-06-23

Who buys, and why now

The buyer is a national health authority's chief digital officer or head of eHealth, who feels the pain of meeting EHDS technical specifications while ensuring data security and sovereignty. The trigger is the upcoming applicability of EHDS regulations, forcing them to upgrade EHR systems and establish secure processing environments. They need to demonstrate compliance to the European Commission and enable cross-border data exchange.

Why it is hot now — every claim bound to a dated source

- European Health Data Space regulations define common specifications for EHR systems and exchange formats. [SIG-05DBE1C737A9, SIG-E02F419156FA]
- The European Commission is publishing common specifications and requirements for EHDS, which national authorities must implement. [SIG-05DBE1C737A9, SIG-6CF8BA7EAC6D, SIG-E02F419156FA]
- France's secondary data use supports EHDS, showing national-level activity. [SIG-98B33B5AA810]

- The EHDS includes a data quality and utility label, indicating a need for data governance platforms. [SIG-D49E57B7296C]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a sovereign cloud data platform using Cloud Avenue / Ready SecNumCloud, certified with SecNumCloud and ISO 27001, to host EHR systems and data processing. Orange's AI / Data / Cloud experts and Healthcare experts would design and implement the platform, integrating with existing national health systems. The engagement would start with a gap assessment against EHDS specifications, then deploy the platform, and finally enable secure processing environments and data exchange.

Why Orange can win

Orange can win because it offers a sovereign, certified cloud platform (Cloud Avenue / Ready SecNumCloud) with SecNumCloud and ISO 27001 certifications, which is critical for health data. Orange has healthcare experts and a reference with Grand Paris Sud, demonstrating public sector capability. However, the assets are thin on specific EHDS domain expertise, so Orange must leverage its certifications and partnerships with hyperscalers to compete.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Cloud Avenue / Ready SecNumCloud	offer	L1	offer addresses the use case but not this technology	unconfirmed
Microsoft	partner	L2	partner provides the required technology	unconfirmed
AWS	partner	L2	partner provides the required technology	unconfirmed
Google Cloud	partner	L2	partner provides the required technology	unconfirmed

Competitive landscape

HIGH competitive intensity (score 8.6; 0 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitors include hyperscalers AWS, Google Cloud, and Microsoft, which offer cloud data platforms but may lack sovereign certifications. Global systems integrators like Accenture, Capgemini, DXC Technology, Infosys, and Sopra Steria are active in the public sector and can deliver large-scale integration projects. The customer will compare Orange's sovereign credentials and healthcare focus against these alternatives.

Competitor	Category	Position here	Basis	Evidence
AWS	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Google Cloud	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—

Accenture	Global systems integrator	sells Cloud data platform; active in Public / Government sector; competes in Cloud	structural	—
Capgemini	Global systems integrator	sells Cloud data platform; active in Public / Government sector; competes in Cloud	structural	—
DXC Technology	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Infosys	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Sopra Steria	Global systems integrator	sells Cloud data platform; active in Public / Government sector; competes in Cloud	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is your current timeline for implementing EHDS common specifications for EHR systems?
- 2 Have you already conducted a gap analysis against the European Electronic Health Exchange Format specifications?
- 3 What is your existing infrastructure for secure processing environments, and does it meet the EHDS requirements?
- 4 Which of your systems will need to connect to HealthData@EU, and what is the current data exchange architecture?
- 5 What are your data sovereignty and certification requirements for hosting health data (e.g., SecNumCloud)?
- 6 Who is the decision-maker for the EHDS compliance program, and what budget is allocated?

Objections you will meet

They will say	You can answer
We already have a cloud platform from a hyperscaler; why should we consider Orange?	That's true, hyperscalers offer robust platforms, but they may not meet sovereign certification requirements like SecNumCloud, which is critical for health data. Orange can provide a sovereign layer on top of hyperscaler infrastructure or a fully sovereign alternative.
EHDS is still evolving; we are not sure about the final requirements.	You're right, the specifications are still being finalized, but Orange can help you build a flexible foundation that can adapt to changes. Our experts monitor the regulatory landscape and can design a platform that is future-proof.
We have internal teams that can handle this; we don't need external help.	Your internal teams are capable, but EHDS requires specialized expertise in healthcare data standards and secure processing. Orange brings certified cloud infrastructure and healthcare domain experts to accelerate your compliance and reduce risk.

Risks and unknowns

The main risk is that EHDS specifications are still evolving, and national implementations may vary, causing delays. There is uncertainty about how strictly authorities will enforce the data quality label and secure processing requirements. Orange's lack of a named EHDS-specific reference could weaken credibility, and the customer may prefer a global integrator with more public-sector scale.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for a national health authority, mapping EHDS common specifications to Orange's Cloud Avenue / Ready SecNumCloud capabilities and ISO 27001, SecNumCloud, and CISPE certifications, and referencing Grand Paris Sud as a relevant public-sector deployment.
Sales	In a meeting with a national health authority's digital health director, say: 'We can help you meet EHDS requirements with our SecNumCloud-certified Cloud Avenue platform, which supports secure cross-border health data exchange and aligns with the EU's data governance expectations.'
Strategist / Innovator	Deep-dive on the EHDS common specifications and data quality label to identify where Orange's Cloud Avenue / Ready SecNumCloud and ISO 27001, SecNumCloud, and CISPE certifications can be positioned as a compliant foundation for national health authorities.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: diagram (1 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
