

Healthcare providers and health data holders can use sovereign cloud to meet EHDS secure processing requirements.

Healthcare × Clinical data interoperability × Sovereign and trusted cloud · OS046 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
73 is the world moving	61 can we play, can we win	HIGH 2 named in the evidence	€1.8bn partial evidence · per year	NEXT regulation adopted or propose...	L0 12 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

Healthcare providers and health data holders can use sovereign cloud to meet EHDS secure processing requirements. This opportunity exists now because the European Health Data Space regulation is adopted but not yet applicable, creating a window for proactive compliance. Orange Business can deliver a sovereign, SecNumCloud-qualified platform that meets EHDS secure processing and data quality requirements.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€2.9bn €239m – €13.9bn	€1.8bn €147m – €8.5bn	€62.8m €5.1m – €299m	partial
Observed: tendered contract value, annualised	€70.8m	€70.8m	€2.5m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Healthcare (EU27_2020)	46,762 enterprises	observed	Eurostat · sbs_sc_oww	2024
Enterprises adopting Sovereign and trusted cloud	52.7 % of enterprises (10+ employees)	proxy	Eurostat · isoc_cicce_usen2 · E_CC	2025
Annual value of one engagement	€970k per enterprise per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-07-22
Size-weighted buyer base	5,698 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	3.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Adoption rate is a declared proxy. Enterprises buying paid cloud services Part of this vertical is not covered separately by the enterprise ICT survey, so the all-activities rate was used for those slices. Contract values are observed from EU public procurement (TED). For private-sector verticals they are used as a proxy for comparable enterprise deal size: the buying entity differs, the scope of work is comparable. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders. Sector adoption is read from Eurostat's all-activities aggregate for part of this vertical, which the enterprise ICT survey does not cover separately: PROXY — ICT survey excludes health activities; PROXY — residential care

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€70.8m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-07-22
Assumed obtainable share of the serviceable market	3.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 7 matching notices, matched on vertical via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in

this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Sovereign Health Data Platform

■ Orange asset ■ Partner ■ Customer-owned ■ Third party / to be sourced

This diagram shows how Orange's sovereign cloud and healthcare interoperability tools combine to deliver EHDS-compliant secure processing. Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

The European Health Data Space (EHDS) is introducing binding requirements for secure processing environments and data quality labels, which will force healthcare providers to upgrade their data infrastructure. The regulation is adopted but not yet applicable, giving early movers a competitive advantage. France's secondary data use is already aligning with EHDS, and the CNIL recognizes SecNumCloud as the only marker of sovereign cloud, creating a clear compliance path.

Sources: SIG-8D64FD10F3A7 ec.europa.eu 2026-03-09; SIG-D49E57B7296C ec.europa.eu 2026-07-27; SIG-98B33B5AA810 Healthcare IT News 2026-06-23; SIG-74A721ECDA41 Le Journal des Entrepr 2026-05-04

Who buys, and why now

The chief information officer or chief medical information officer at a European hospital group or health data holder signs the contract. The pain is felt by the data protection officer and the clinical research team, who struggle with fragmented, non-compliant data storage and cannot easily share data for secondary use. The trigger is an upcoming EHDS compliance audit or a new research project requiring secure access to patient data.

Why it is hot now — every claim bound to a dated source

- EHDS specifies requirements for secure processing environments for health data. [SIG-8D64FD10F3A7]
- EHDS includes a data quality and utility label, indicating a need for governed data platforms. [SIG-D49E57B7296C]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a sovereign health data platform using Cloud Avenue / Ready SecNumCloud as the secure hosting foundation, certified with SecNumCloud and HDS. On top, Enovacom / Enovalife provides healthcare interoperability and data exchange. Orange's Healthcare experts and AI / Data / Cloud experts design the secure processing environment, while Cybersecurity experts ensure compliance with EHDS requirements. The engagement starts with a compliance gap assessment, then builds the platform, and finally migrates data and applications.

Why Orange can win

Orange uniquely combines SecNumCloud and HDS certifications, healthcare-specific interoperability tools (Enovacom / Enovalife), and a full suite of in-house experts. The CNIL explicitly recognizes SecNumCloud as the marker of sovereign cloud, and Orange's Cloud Avenue is SecNumCloud-qualified. No other competitor offers this integrated stack of sovereign cloud, healthcare data hosting, and interoperability in one package.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Cloud Avenue / Ready SecNumCloud	offer	L0	offer addresses the use case AND provides the technology	unconfirmed

Competitive landscape

HIGH competitive intensity (score 8.5; 2 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Thales is a security specialist selling sovereign cloud, as evidenced by their partnership with S3NS and SAP. Capgemini is a global systems integrator building trusted cloud solutions, as seen in their policy-to-platform work. Google Cloud and Microsoft are hyperscalers offering sovereign cloud options, but they lack healthcare-specific certifications. Atos/Eviden, Deutsche Telekom/T-Systems, Sopra Steria, and Swisscom all sell sovereign cloud and compete in healthcare, but none combine SecNumCloud, HDS, and healthcare interoperability as Orange does.

Sources: SIG-97C21A9E6B17 Business Wire 2026-04-27; SIG-C6BD205D845B Capgemini 2026-04-24

Competitor	Category	Position here	Basis	Evidence
Thales	Security specialist	sells Sovereign and trusted cloud; competes in Cloud, Cybersecurity	evidenced	SIG-97C21A9E6B17
Capgemini	Global systems integrator	competes in Cloud	evidenced	SIG-C6BD205D845B
Google Cloud	Hyperscaler	sells Sovereign and trusted cloud; competes in Cloud — also an Orange partner	structural	—

Microsoft	Hyperscaler	sells Sovereign and trusted cloud; competes in Cloud — also an Orange partner	structural	—
Atos / Eviden	Global systems integrator	sells Sovereign and trusted cloud; active in Healthcare; competes in Cloud, Cybersecurity	structural	—
Deutsche Telekom / T-Systems	Telecom operator peer	sells Sovereign and trusted cloud; active in Healthcare; competes in Cloud, Cybersecurity	structural	—
Sopra Steria	Global systems integrator	sells Sovereign and trusted cloud; competes in Cloud, Cybersecurity	structural	—
Swisscom	Telecom operator peer	sells Sovereign and trusted cloud; competes in Cloud	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is your current strategy for complying with EHDS secure processing environment requirements?
- 2 Do you currently hold HDS or SecNumCloud certification for any of your health data hosting?
- 3 How do you manage secondary use of health data today, and what pain points do you face?
- 4 Are you planning any new research projects that require access to patient data across institutions?
- 5 Who in your organization is responsible for EHDS compliance, and what is their timeline?

Objections you will meet

They will say	You can answer
We already use a hyperscaler cloud that meets our needs.	Hyperscalers offer scale, but they do not provide the sovereign certifications that EHDS and CNIL recognize. Our Cloud Avenue is SecNumCloud-qualified and HDS-certified, ensuring compliance and trust.
EHDS is not applicable yet, so we have time.	True, but early movers will have a competitive advantage. The regulation is adopted, and implementing acts are being finalized. Starting now reduces risk and positions you as a leader.
We already have a partnership with another sovereign cloud provider.	That is fine, but our solution uniquely combines sovereign cloud with healthcare interoperability tools and certifications. We can complement or replace your existing setup with a more integrated approach.

Risks and unknowns

The EHDS implementing acts are not yet final, so specific technical requirements may change. The market may be slow to adopt because healthcare providers are risk-averse and budget-constrained. It is unknown how quickly competitors will obtain similar certifications or partnerships.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Bid brief: develop a proposal for a healthcare data holder that highlights how our HDS and SecNumCloud certified infrastructure, combined with Enovacom / Enovalife, supports EHDS compliance and enables governed data platforms, referencing our experience with MicroPort CardioFlow and Bliksund.
Sales	In a conversation with a European healthcare provider's IT decision-maker, say: 'With our Enovacom / Enovalife solutions and HDS-certified cloud, we can help you meet EHDS secure processing requirements and ensure your health data is handled with the highest security standards.'
Strategist / Innovator	Deep-dive brief: evaluate how the Enovacom / Enovalife offer can be positioned to support EHDS secure processing requirements, leveraging HDS certification and SecNumCloud, and identify the key capabilities needed to address the data quality and utility label.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: diagram (3 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
