| <b>64</b><br>is the world moving | <b>74</b><br>can we play, can we win | <b>HIGH</b><br>0 named in the evidence | <b>€2.0bn</b><br>observed evidence · per year | <b>NOW</b><br>budgeted procurement within 1... | <b>L1</b><br>17 signals |

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

## The opportunity

Manufacturers of household washing machines, washer-dryers, and dishwashers face new EU ecodesign and energy labelling rules that require rigorous data collection and reporting. Orange Business can assemble a cloud data platform that ingests production and test data, automates compliance calculations, and generates audit-ready reports. This opportunity is urgent because the regulations are already enacted, and manufacturers must comply within their next product cycles.

## Market opportunity

| Method                                             | Total (TAM)                      | Serviceable (SAM)                | Obtainable (SOM)                | Confidence |
|----------------------------------------------------|----------------------------------|----------------------------------|---------------------------------|------------|
| Bottom-up: enterprises x adoption x contract value | <b>€2.7bn</b><br>€490m – €14.6bn | <b>€2.0bn</b><br>€352m – €10.5bn | <b>€93.8m</b><br>€16.9m – €504m | observed   |
| Observed: tendered contract value, annualised      | <b>€20.9m</b><br>€20.9m – €56.6m | <b>€20.9m</b><br>€20.9m – €56.6m | <b>€1.0m</b><br>€1.0m – €2.7m   | observed   |

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

### Bottom-up: enterprises x adoption x contract value

| Factor                                             | Value                                                              | Basis      | Source                                        | As of                  |
|----------------------------------------------------|--------------------------------------------------------------------|------------|-----------------------------------------------|------------------------|
| Enterprises in Manufacturing (EU27_2020)           | 238,122 enterprises                                                | observed   | Eurostat · sbs_sc_ovw                         | 2024                   |
| Enterprises adopting Cloud data platform           | 20.6 % of enterprises (10+ employees)                              | observed   | Eurostat · isoc_cicce_usen2 · E_CC_PDB        | 2025                   |
| Annual value of one engagement                     | €337k per enterprise per year                                      | observed   | TED (Tenders Electronic Daily) · ted          | 2026-05-19..2026-08-05 |
| Size-weighted buyer base                           | 39,220 enterprise-equivalents at large-enterprise engagement value | assumption | config/sizing.yaml · size_class_value_weights | size-2026-08-a         |
| Assumed obtainable share of the serviceable market | 4.8 % of SAM                                                       | assumption | config/sizing.yaml · obtainable_share         | size-2026-08-a         |

**Read this before quoting the number.** Contract values are observed from EU public procurement (TED). For private-sector verticals they are used as a proxy for comparable enterprise deal size: the buying entity differs, the scope of work is comparable. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders.

### Observed: tendered contract value, annualised

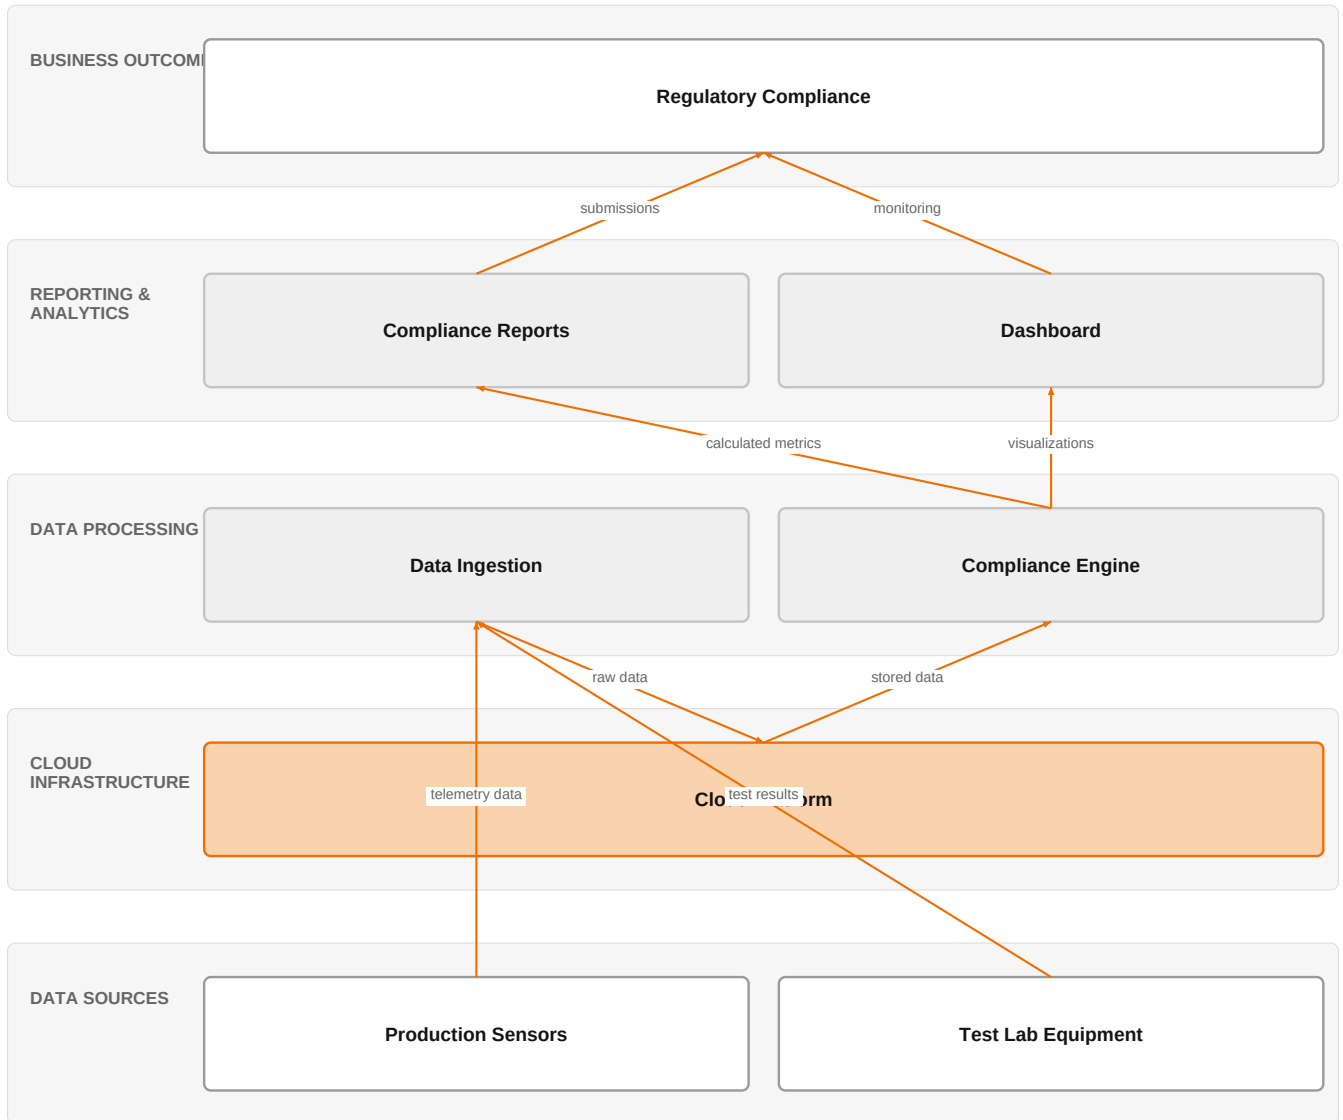

| Factor                                             | Value           | Basis      | Source                                | As of                  |
|----------------------------------------------------|-----------------|------------|---------------------------------------|------------------------|
| Tendered contract value in matching CPV categories | €20.9m per year | observed   | TED (Tenders Electronic Daily) · ted  | 2026-05-19..2026-08-05 |
| Assumed obtainable share of the serviceable market | 4.8 % of SAM    | assumption | config/sizing.yaml · obtainable_share | size-2026-08-a         |

**Read this before quoting the number.** Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 14 matching notices, matched on vertical via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a

market size.

## The solution, in one picture

### Compliance Data Platform for Appliance Manufacturers

■ Orange asset ■ Partner ■ Customer-owned ■ Third party / to be sourced

This platform automates the flow from factory floor data to regulatory submissions, ensuring compliance with new EU ecodesign and energy labelling rules.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

## What has changed

The EU has enacted ecodesign requirements for household washing machines, washer-dryers, and dishwashers, along with energy labelling mandates. These regulations impose compliance obligations on manufacturers, who must now track and report product performance data. The broader industrial context shows a push toward circularity and digital tools, with the automotive sector facing challenges due to fragmented standards and slow digital adoption, and manufacturing overall needing to address circularity and sustainability. Digital product passports and circular economy dataspace are emerging as tools for sustainability, and energy-intensive industries are seeking digital and deep-tech solutions for green transformation.

Sources: SIG-037778968624 ec.europa.eu 2026-05-05; SIG-8F0739E8B909 ec.europa.eu 2026-04-23; SIG-CB4D5228C6C8 ec.europa.eu 2026-04-27; SIG-DB3990C67390 ec.europa.eu 2026-04-27; SIG-FDD8BAC05BAA cordis.europa.eu 2026-07-01; SIG-7A6B4023C7D0 cordis.europa.eu 2025-01-01

## Who buys, and why now

The head of product compliance or the sustainability officer in a household appliance manufacturer feels the pain of manually collating test data and energy consumption figures across multiple product lines. The trigger is the upcoming enforcement date of the new ecodesign and energy labelling regulations, which requires them to submit compliance documentation or face market access penalties. They need a system that automates data collection from production lines and test labs, calculates energy efficiency indices, and generates the required reports for EU authorities.

### Why it is hot now — every claim bound to a dated source

- The European automotive sector faces challenges in achieving life-cycle circularity due to fragmented standards and slow adoption of digital tools. [SIG-FDD8BAC05BAA]
- HARD2SCALE aims to enable green transformation pathways for Energy Intensive and Hard to Abate industries through digital and deep-tech solutions. [SIG-03FCDA4752D9]
- Manufacturing in Europe should address challenges towards adoption of Manufacturing as a Service, including circularity and sustainability. [SIG-7A6B4023C7D0]
- New EU regulations define distinct application and information requirements for category 1 and category 2 plants obtained by new genomic techniques. [SIG-0EFD564D7217, SIG-78C10916BE5A]
- EU regulations align approval criteria for active substances in plant protection products with the new chemicals classification. [SIG-E250772CD266]
- The EU has enacted ecodesign requirements for household washing machines, washer-dryers, and dishwashers, along with energy labelling mandates. [SIG-037778968624, SIG-8F0739E8B909, SIG-CB4D5228C6C8, SIG-DB3990C67390]
- New EU ecodesign requirements for household washing machines, washer-dryers, and dishwashers impose compliance obligations on manufacturers. [SIG-037778968624, SIG-CB4D5228C6C8]

### What Orange would deliver, and why it can win

#### What Orange would deliver

Orange would assemble a cloud data platform using its AI/Data/Cloud experts and IoT experts. The engagement starts with a discovery workshop to map the manufacturer's data sources, then builds a data ingestion pipeline from production and test equipment. The platform centralizes data in a cloud environment (leveraging partnerships with Microsoft, AWS, or Google Cloud), applies compliance logic to calculate energy labels and ecodesign metrics, and generates audit-ready reports. Orange's ISO 27001 certification ensures data security, and its Orange Cyberdefense managed services can protect the platform. The solution is delivered in phases, starting with a pilot on one product line, then scaling across the portfolio.

#### Why Orange can win

Orange can win because it combines its AI/Data/Cloud experts and IoT experts with its ISO 27001 certification and Orange Cyberdefense managed services, offering a secure, end-to-end solution. Unlike hyperscalers that sell raw cloud infrastructure, Orange provides integration and compliance expertise. Unlike global system integrators, Orange has deep telecom and IoT capabilities that are essential for connecting factory floor sensors. However, the assets are not unique; competitors also have strong offerings, so Orange must differentiate on its ability to manage the entire data lifecycle securely.

#### Named assets behind this — each individually inspectable (LK-08)

| Asset                                | Type            | Link | Why it is linked                                           | Curator     |

| Sopra Steria   | Global systems integrator | sells Cloud data platform; competes in Cloud                                                | structural | —        |

**evidenced** means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

## Qualifying questions for the first meeting

- 1 How are you currently collecting and reporting energy consumption data for your washing machines and dishwashers to comply with the new EU ecodesign and energy labelling regulations?
- 2 Which product lines are affected by the new regulations, and do you have a centralized system for managing test data across them?
- 3 What is your current process for generating the required compliance documentation, and how many person-hours does it take per product?
- 4 Have you already invested in a cloud data platform for other purposes, and if so, which one?
- 5 Who in your organization is responsible for regulatory compliance, and what is their biggest pain point in meeting the new requirements?
- 6 Are you planning to introduce new product models in the next 12 months that will need to meet these regulations?

## Objections you will meet

| They will say                                                                       | You can answer                                                                                                                                                                                                                                           |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| We already use AWS for our data analytics, so we don't need another cloud platform. | That's a valid point, and we can work with AWS as a partner. Our value-add is not the cloud itself but the compliance-specific data model and reporting automation we build on top, which saves your team significant manual effort.                     |
| Our in-house IT team can build this internally.                                     | They might, but building a compliant data pipeline requires deep knowledge of the new EU regulations and the ability to integrate with production systems. Our experts have done this for other manufacturers, and we can deliver faster with less risk. |
| The regulations are not fully defined yet, so we'll wait.                           | Waiting could leave you scrambling when enforcement begins. We can start with a flexible architecture that adapts to final requirements, and we'll monitor regulatory updates so you're ready ahead of time.                                             |

## Risks and unknowns

The main risk is that manufacturers may already have invested in cloud platforms from hyperscalers or have existing compliance tools, making them reluctant to switch. The specific data formats and reporting requirements of the new EU regulations are not fully detailed in the evidence, so the solution may need to adapt as guidance is published. Additionally, the evidence does not specify the exact timeline for enforcement, which could affect urgency. There is also uncertainty about how many manufacturers will seek external help versus building in-house capabilities.

## Next action, by role (FR-17)

| Role                   | Do this next                                                                                                                                                                                                                                                                                                              |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Presales / Proposal    | Prepare a bid brief for a European appliance manufacturer, outlining how Orange's cloud data platform, with IoT and AI capabilities, can automate compliance data collection and reporting, and include a reference to Saint-Gobain Glass to demonstrate manufacturing expertise.                                         |
| Sales                  | In a conversation with a European household appliance manufacturer's compliance or sustainability lead, say: 'We can help you streamline your ecodesign and energy labelling reporting with a cloud data platform, backed by our ISO 27001 certified services and experience with manufacturers like Saint-Gobain Glass.' |
| Strategist / Innovator | Commission a deep-dive brief on how Orange's AI/Data/Cloud experts and IoT experts can package a cloud data platform for EU ecodesign compliance reporting, leveraging Microsoft, AWS, or Google Cloud partnerships and referencing Saint-Gobain Glass as a manufacturing case study.                                     |

## Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

## How this brief was made

**Computed, not written.** Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

**Written, then checked.** The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: competitive\_landscape (no claim survived evidence binding); diagram (4 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)

| What                        | Version                     | When                      |
|-----------------------------|-----------------------------|---------------------------|
| Scores — weight set         | w-2026-08-a                 | 2026-08-18T19:08:26+00:00 |
| Market sizing — assumptions | size-2026-08-a              | 2026-08-18T21:06:15+00:00 |
