

Deploy agentic AI to automate claims deflection and dispute resolution in banking contact centers, integrating with core banking and CRM systems.

Finance, Banking and Insurance × Contact centre automation × Agentic AI · OS057 v2 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
84 is the world moving	63 can we play, can we win	HIGH 2 named in the evidence	€21.2m modelled evidence · per year	NEXT pilots published no volume pr...	L1 18 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Evidence gap (SC-13). Orange has 4.0 published reference(s) in Finance, Banking and Insurance, below the threshold of 5. A customer conversation here has no proof point behind it yet.

The opportunity

Deploy agentic AI to automate claims deflection and dispute resolution in banking contact centers, integrating with core banking and CRM systems. This opportunity targets banks and insurers in Europe, particularly in DACH and Benelux, where enterprises are actively partnering to bring agentic voice AI to their contact centers. The timing is driven by market momentum, with major platforms like Genesys acquiring agentic AI capabilities and a clear deployment gap that Orange can address with its trusted, sovereign infrastructure.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€26.0m €4.9m – €120m	€21.2m €4.0m – €97.8m	€593k €112k – €2.7m	modelled
Observed: tendered contract value, annualised	€100m	€100m	€2.8m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Finance, Banking and Insurance (EU27_2020)	11,116 enterprises	observed	Eurostat · sbs_sc_oww	2024
Enterprises adopting Agentic AI	5.3 % of enterprises (10+ employees)	proxy	Eurostat · isoc_eb_ain2 · E_AI_TPA	2025
Annual value of one engagement	€200k per enterprise per year	assumption	config/sizing.yaml · fallback_bands_eur	size-2026-08-a
Size-weighted buyer base	2,426 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Adoption rate is a declared proxy. AI automating workflows or assisting decisions Part of this vertical is not covered separately by the enterprise ICT survey, so the all-activities rate was used for those slices. Contract value is a configured assumption, not observed. Only 2 matching tender notices, below the 6 needed for a robust median, so the configured band for this business domain is used. It is an assumption owned by innovation-radar-curator, not evidence. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders. Sector adoption is read from Eurostat's all-activities aggregate for part of this vertical, which the enterprise ICT survey does not cover separately: PROXY — ICT survey excludes the financial sector; PROXY — auxiliary financial activities; PROXY — insurance and pension funding

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€100m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-26..2026-08-05

Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a
--	--------------	------------	---------------------------------------	----------------

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 8 matching notices, matched on vertical via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Agentic AI Claims Deflection Solution

Orange asset Partner Customer-owned Third party / to be sourced

This solution layers agentic AI on top of Orange's contact center offers and sovereign cloud, integrating with the customer's core systems to automate claims deflection and dispute resolution.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

Contact center AI is seeing a deployment gap, indicating a need for solutions that actually deliver. AI virtual agents are delivering measurable results in contact centers, and agentic AI upgrades are being introduced as the industry shifts toward autonomy. Genesys acquired Pinkfish to accelerate agentic AI in contact centers, adding agentic workflow automation and enterprise system connectivity. Enterprises in DACH and Benelux are partnering to bring agentic voice AI to their contact centers.

Who buys, and why now

The buyer is typically the head of customer operations or the chief digital officer at a mid-to-large European bank or insurer. The pain is operational: high call volumes for routine claims and disputes, long handling times, and inconsistent resolution, which drive up costs and erode customer satisfaction. The trigger is often a spike in claims (e.g., after a regulatory change or a major incident) or a board mandate to reduce contact center costs while improving service. The buyer signs because they need a proven, compliant solution that integrates with existing core banking and CRM systems without a multi-year transformation.

Why it is hot now — every claim bound to a dated source

- Omilia and valantic are partnering to bring agentic voice AI to enterprise contact centers across DACH and Benelux. [SIG-6E70EF484BB5]
- Enterprises in DACH and Benelux are partnering to bring agentic voice AI to their contact centers. [SIG-6E70EF484BB5]

- Genesys acquired Pinkfish to accelerate agentic AI in contact centers, indicating market momentum for this technology. [SIG-41F6B2AD1B98]
- The acquisition adds agentic workflow automation and enterprise system connectivity to contact center AI, enabling more complex task automation. [SIG-1B16F494E208]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a solution using its Contact Center Access (L1) and Business Talk (L1) offers as the telephony and contact center foundation, enhanced with agentic AI capabilities from partners like Microsoft and Genesys. The engagement would start with a discovery workshop to map claims and dispute workflows, then integrate the AI agents with the customer's core banking and CRM systems, and finally deploy on Orange's sovereign, certified infrastructure (ISO 27001, SOC 2 Type II, CISPE) to ensure compliance. Orange's AI/Data/Cloud and Digital experts would lead the integration and change management.

Why Orange can win

Orange can win because it combines the contact center offers (Contact Center Access, Business Talk) with deep integration expertise from its AI/Data/Cloud and Digital experts, and can run the solution on sovereign, certified infrastructure (ISO 27001, SOC 2 Type II, CISPE) that banks in Europe increasingly require. Orange's partnership with Genesys and Microsoft allows it to bring best-of-breed agentic AI while differentiating on trust and sovereignty. The reference from Banqsoft and Stø in the banking sector provides credibility, though the assets are not uniquely differentiated in AI technology itself.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator

Competitive landscape

HIGH competitive intensity (score 9.5; 2 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitors include Genesys, Salesforce, Microsoft, Accenture, Capgemini, Infosys, NiCE, and Mistral AI. Genesys is strong in contact center platforms and has just acquired Pinkfish to accelerate agentic AI. Salesforce is pushing agentic AI into core workflows. Microsoft is a hyperscaler with strong AI offerings. Accenture, Capgemini, and Infosys are global systems integrators with deep banking expertise. NiCE and Mistral AI are also active in agentic AI for customer experience. The customer will compare Orange against these on the basis of integration depth, speed of deployment, and trust/sovereignty.

Competitor	Category	Position here	Basis	Evidence
Genesys	Customer-experience platform	sells Agentic AI; competes in CX: Customer Experience — also an Orange partner	evidenced	SIG-41F6B2AD1B98, SIG-1B16F494E208
Salesforce	Customer-experience platform	sells Agentic AI; competes in CX: Customer Experience	evidenced	SIG-2852CECCE1A3
Microsoft	Hyperscaler	sells Agentic AI; competes in CX: Customer Experience — also an Orange partner	structural	—
Accenture	Global systems integrator	sells Agentic AI; active in Finance, Banking and Insurance; competes in CX: Customer Experience	structural	—
Capgemini	Global systems integrator	sells Agentic AI; active in Finance, Banking and Insurance; competes in CX: Customer Experience	structural	—
Infosys	Global systems integrator	sells Agentic AI; competes in CX: Customer Experience	structural	—
NiCE	Customer-experience platform	sells Agentic AI; competes in CX: Customer Experience — also an Orange partner	structural	—
Mistral AI	Data and AI platform	sells Agentic AI; competes in CX: Customer Experience	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is your current call volume for claims and disputes, and what percentage is resolved without human intervention?
- 2 Which core banking and CRM systems are in place, and how are they currently integrated with your contact center?
- 3 Have you already piloted any AI virtual agents? If so, what were the main obstacles to scaling?
- 4 What are your compliance requirements for data residency and sovereignty, and do you have a preferred certification framework?
- 5 Who is the executive sponsor for this initiative, and what is their primary KPI: cost reduction, customer satisfaction, or both?
- 6 What is your timeline for wanting to see measurable results, and what would constitute a successful proof of concept?

Objections you will meet

They will say	You can answer
We already have a contact center platform with built-in AI; why do we need Orange?	It's true that platforms like Genesys and Salesforce are adding agentic AI. However, Orange brings the integration expertise and sovereign infrastructure that ensures the AI actually works with your core banking systems and meets your compliance needs. We can help you get from pilot to production faster.
Agentic AI is too risky for banking; regulators won't accept autonomous decisions.	That's a valid concern. Our approach is to start with deflection and dispute resolution where human oversight is maintained, and we build in audit trails and human-in-the-loop controls. We also run on certified infrastructure (ISO 27001, SOC 2 Type II, CISPE) to support your compliance case.

We've seen many AI pilots fail to scale; what makes this different?	The deployment gap is real. What makes this different is that we're not just selling AI; we're integrating it with your existing systems and processes, using proven contact center offers and a clear roadmap. We also have references in banking, like Banqsoft and Stø, that show we can deliver.
---	--

Risks and unknowns

The main risk is that agentic AI in contact centers is still nascent, and the deployment gap suggests many pilots fail to scale. There is also uncertainty about regulatory acceptance of autonomous decisions in banking, and the integration with legacy core banking systems may be more complex than expected. Additionally, the competitive intensity is high, with major platforms and integrators all moving quickly, so Orange must differentiate on trust and sovereignty rather than raw AI capability.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for a banking client's contact center automation project, highlighting our partnership with Genesys and Microsoft, and referencing our work with Banqsoft and Stø, to differentiate our proposal.
Sales	In a meeting with a banking contact center operations leader, say: 'We can help you automate claims deflection with agentic AI, building on our experience with Banqsoft and Stø, and our certifications like ISO 27001 and SOC 2 Type II ensure security and compliance.'
Strategist / Innovator	Commission a deep-dive brief on agentic AI for contact center claims deflection, grounded in our ISO 27001, SOC 2 Type II, and CISPE certifications, and leveraging our AI/Data/Cloud and Digital experts, to assess the opportunity for a new offer.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.
