

Cloud-based data governance and management platform for the Canary Islands public administration to enable unified administrative data sharing and compliance (DataGobCan).

Public / Government sector × Data platform modernisation × Cloud data platform · OS076 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
66 is the world moving	51 can we play, can we win	HIGH 0 named in the evidence	€10.7m observed evidence · per year	NOW budgeted procurement within 1...	L2 8 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

The Government of the Canary Islands is procuring a data infrastructure and governance platform (DataGobCan) to unify administrative data sharing and compliance across its public bodies. This is a budgeted procurement within the next 12 months, creating an immediate opportunity for Orange Business to deliver a sovereign, cloud-based data platform. The opportunity exists now because the contracting authority has formally published the tender, signalling a concrete, funded need.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€27.4m	€10.7m	€81k	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€27.4m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-20..2026-08-11
Assumed obtainable share of the serviceable market	0.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 8 matching notices, matched on use case via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

DataGobCan Sovereign Data Platform

Orange asset Partner Customer-owned Third party / to be sourced

This diagram shows how Orange integrates a sovereign cloud platform with governance services to enable unified data sharing and compliance for the Canary Islands public administration.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

Public administrations across Europe are modernising their data infrastructure to enable unified, citizen-centric digital services, as seen in initiatives like Umang and DigiLocker in India and Indonesia's digital government push. The Canary Islands government has published a tender for data infrastructure and services to implement a data governance model for administrative purposes, indicating a regulatory and operational push towards data sharing and compliance. This is part of a broader trend where data spaces and traceability are becoming critical for validating data quality and metadata, as highlighted in recent research on data spaces and digital product passports.

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a cloud data platform, leveraging its AI/Data/Cloud experts and Digital experts to design and implement the infrastructure. The engagement would start with a discovery phase to map existing data assets and governance needs, then deploy the cloud data platform on a sovereign infrastructure, certified with ISO 27001 and SecNumCloud to meet public sector security requirements. Orange would also provide ongoing management and support, drawing on its experience from the Grand Paris Sud reference. The solution would be delivered in partnership with hyperscalers like Microsoft, AWS, or Google Cloud, but with Orange as the prime integrator ensuring sovereignty and compliance.

Why Orange can win

Orange can win because it combines sovereign cloud certifications (SecNumCloud, ISO 27001) with deep integration expertise and a proven public sector reference (Grand Paris Sud). Unlike hyperscalers who sell raw cloud platforms, Orange wraps the platform with governance, compliance, and local support, addressing the specific administrative data sharing needs of the Canary Islands. The partnership with hyperscalers allows Orange to offer best-of-breed technology while ensuring sovereignty and trust, which is critical for public administration data.

Competitive landscape

HIGH competitive intensity (score 8.6; 0 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

The competitive landscape includes hyperscalers AWS, Google Cloud, and Microsoft, who offer cloud data platforms directly and are strong in technology scale and innovation. Global systems integrators like Accenture, Capgemini, and Sopra Steria are also active in the public sector and bring strong consulting and implementation capabilities. DXC Technology and Infosys compete on cost and global delivery. The customer will compare offers on price, sovereignty, and ability to meet specific governance requirements, where Orange's certifications and local presence are differentiators.

Competitor	Category	Position here	Basis	Evidence
AWS	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Google Cloud	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—

Microsoft	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Accenture	Global systems integrator	sells Cloud data platform; active in Public / Government sector; competes in Cloud	structural	—
Capgemini	Global systems integrator	sells Cloud data platform; active in Public / Government sector; competes in Cloud	structural	—
DXC Technology	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Infosys	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Sopra Steria	Global systems integrator	sells Cloud data platform; active in Public / Government sector; competes in Cloud	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What are the specific data governance and sharing requirements outlined in the DataGobCan tender, and which administrative bodies will be in scope?
- 2 What is the current state of data infrastructure and existing data management tools across the Canary Islands public administration?
- 3 What are the key compliance and security standards (e.g., national or EU regulations) that the data platform must meet?
- 4 Who are the key stakeholders and decision-makers in the procurement, and what is their timeline for awarding the contract?
- 5 What is the budget range for this project, and are there any constraints on cloud provider choices due to sovereignty requirements?

Objections you will meet

They will say	You can answer
We can get a cloud data platform directly from AWS or Microsoft at a lower cost.	That's true, hyperscalers offer competitive pricing. However, the DataGobCan project requires not just a platform but a governance model and compliance with administrative data sharing rules. Orange provides the integration, certification, and local support that ensures the platform meets public sector sovereignty and security requirements, which hyperscalers alone may not fully address.
We already have a preferred systems integrator for this project.	We understand you may have existing relationships. Orange brings a unique combination of sovereign cloud certifications and a proven public sector reference (Grand Paris Sud). We can work as a prime or sub-contractor, adding value in areas like data governance and compliance that are critical for this tender.
Why should we trust Orange with our data sovereignty?	Orange is a European operator with deep experience in sovereign infrastructure, holding certifications like SecNumCloud and ISO 27001. We have delivered similar projects for public administrations, such as Grand Paris Sud, and we are committed to keeping your data within European jurisdiction, which is a key requirement for public sector data.

Risks and unknowns

The main risk is that the tender may favour a pure hyperscaler offering due to lower upfront costs, or a large SI with deeper public sector relationships. There is also uncertainty about the specific data governance requirements and the existing IT landscape of the Canary Islands administration, which could affect the implementation timeline. Additionally, the procurement process may be lengthy and competitive, and Orange's success depends on forming the right partnerships and clearly articulating its sovereign value proposition.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for the DataGobCan opportunity that positions our Cloud data platform, ISO 27001, SecNumCloud, and CISPE certifications, and the Grand Paris Sud reference, to differentiate our proposal.

Sales	In a meeting with the Canary Islands public administration's IT director, open with: 'We've helped public bodies like Grand Paris Sud unify administrative data sharing while staying compliant—can we explore how that applies to your data governance goals?'
Strategist / Innovator	Commission a deep-dive brief on the Canary Islands public administration's data governance procurement, mapping our AI/Data/Cloud experts and Orange Group researchers against the stated compliance requirements.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: who_buys_and_why (named entities that were never supplied: Viceconsejería de la Presidencia del Gobierno de Canarias); diagram (4 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
