

Automate creation of digital building logs (c-KOB) for municipal property management, targeting the Polish tender for 2,700 logs.

Public / Government sector × Document intelligence × Generative AI · OS078 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
42 is the world moving	75 can we play, can we win	HIGH 0 named in the evidence	€11.2m observed evidence · per year	NOW budgeted procurement within 1...	L0 1 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity automates the creation of digital building logs (c-KOB) for municipal property management, targeting the Polish tender for 2,700 logs. It addresses the need for scalable document digitization in the public sector, leveraging Orange's AI and cloud expertise to deliver a trusted, sovereign solution.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€29.1m €29.1m – €157m	€11.2m €11.2m – €60.1m	€669k €669k – €3.6m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€29.1m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-20..2026-08-11
Assumed obtainable share of the serviceable market	6.0 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 19 matching notices, matched on use case via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Automated c-KOB Creation for Municipal Buildings

■ Orange asset ■ Partner ■ Customer-owned ■ Third party / to be sourced

This diagram shows how Orange's Live Intelligence automates the creation of digital building logs from existing records, hosted on secure infrastructure.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

The Polish municipal property manager has issued a tender for 2,700 digital building logs, indicating a regulatory or administrative push towards digitization of building records. This is a concrete, budgeted procurement within the next 12 months, signaling immediate market demand. The tender specifies CPV codes for building-inspection services and data services, highlighting the need for both document intelligence and IT services.

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a solution leveraging Live Intelligence, our AI platform, to automate the extraction and structuring of building data from existing documents. This would be supported by our AI/Data/Cloud experts and Orange

Group researchers to tailor the solution to municipal building logs. The engagement would start with a pilot on a subset of buildings, then scale to the full 2,700, ensuring compliance with ISO 27001 and potentially SecNumCloud for sovereign hosting.

Why Orange can win

Orange can win by combining our Live Intelligence platform with our certified infrastructure (ISO 27001, SecNumCloud, CISPE) to offer a sovereign, secure AI solution. Our partnership with Microsoft and Google Cloud allows us to leverage best-in-class AI models while maintaining control over data governance. The reference from Grand Sud Paris demonstrates our ability to deliver similar public-sector projects.

Competitive landscape

HIGH competitive intensity (score 8.3; 0 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitors include hyperscalers like Google Cloud and Microsoft, who offer Generative AI but may lack deep public-sector integration. Global system integrators like Accenture, Capgemini, IBM, Infosys, and TCS also sell Generative AI and have public-sector presence, but may not offer the same level of sovereign cloud certification. Salesforce, as a customer-experience platform, is less likely to be a direct competitor for this specific document intelligence use case.

Competitor	Category	Position here	Basis	Evidence
Google Cloud	Hyperscaler	sells Generative AI — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Generative AI — also an Orange partner	structural	—
Accenture	Global systems integrator	sells Generative AI; active in Public / Government sector; competes in OX: Smart Industries	structural	—
Capgemini	Global systems integrator	sells Generative AI; active in Public / Government sector; competes in OX: Smart Industries	structural	—
IBM	Global systems integrator	sells Generative AI; active in Public / Government sector	structural	—
Infosys	Global systems integrator	sells Generative AI	structural	—

Tata Consultancy Services	Global systems integrator	sells Generative AI	structural	—
Salesforce	Customer-experience platform	sells Generative AI	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is the current process for creating building logs, and how many staff are involved?
- 2 What is the format of the existing building documentation (paper, PDF, scanned)?
- 3 What are the specific data fields required in the c-KOB, and are there any templates?
- 4 What is the timeline for the tender, and is there a pilot phase?
- 5 What are the data sovereignty and security requirements for the solution?
- 6 Who is the decision-maker for this procurement, and what is their budget?

Objections you will meet

They will say	You can answer
We already have a solution from a local vendor.	That may be true, but our solution offers sovereign cloud certification and AI capabilities that can scale to 2,700 logs efficiently, reducing manual effort.
Your solution is too expensive.	While our initial cost may be higher, the automation reduces long-term operational costs and ensures compliance with data protection regulations.
We are concerned about data security.	We understand. Our infrastructure is ISO 27001 certified and can be hosted on SecNumCloud, ensuring the highest level of data protection.

Risks and unknowns

The main risk is that the tender may be won by a competitor with a lower price or a more established local presence. There is also uncertainty about the specific format and data requirements of the c-KOB, which may require customization. Additionally, the procurement process may be lengthy, and the customer may have existing relationships with other vendors.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Bid brief that assembles a proposal for the Polish tender, highlighting Live Intelligence (L0), ISO 27001, SecNumCloud, and CISPE certifications, and the Grand Paris Sud reference, while noting Microsoft, Google Cloud, and NVIDIA as partners.
Sales	In a meeting with a Polish municipal property manager, say: 'We have helped a French public-sector client digitize building documentation at scale, and we can bring that experience to your 2,700-log project.'
Strategist / Innovator	Deep-dive brief on how Live Intelligence (L0) can be positioned for the Polish municipal building-log tender, leveraging the Grand Paris Sud reference and AI/Data/Cloud experts (SUP).

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: `who_buys_and_why` (named entities that were never supplied: Zarzad Lokali Miejskich w odzi); diagram (3 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
