

SIEM and SOC services for Malta's Water Services Corporation to secure critical water infrastructure under a framework agreement.

Public / Government sector × Critical infrastructure monitoring × SIEM and SOAR · OS079 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
53 is the world moving	65 can we play, can we win	MEDIUM 0 named in the evidence	€0 observed evidence · per year	NOW budgeted procurement within 1...	L1 5 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€220m €220m – €482m	€0	€0	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€220m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-05
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 34 matching notices, matched on vertical via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Managed SIEM and SOC for Water Utility

This diagram shows how Orange's managed SOC monitors and protects the water utility's OT and IT environments, ensuring continuous security operations.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

Public sector entities, particularly those managing critical infrastructure like water utilities, are increasingly mandated to enhance their cybersecurity posture. The publication of this framework agreement on TED indicates a formal procurement process, reflecting a regulatory and operational push towards proactive threat monitoring and response. The inclusion of SIEM and SOC services in the tender shows a shift from reactive to proactive security operations, driven by the need to protect essential services from cyber threats.

Why it is hot now — every claim bound to a dated source

- A water services corporation is procuring a framework agreement for SIEM and SOC services. [SIG-018E7696A719]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would deliver a managed SIEM and SOC service, leveraging Orange Cyberdefense managed services (L1) and cybersecurity experts (SUP). The engagement would start with a security assessment and architecture design, followed by deployment of SIEM technology (potentially in partnership with Palo Alto Networks, L2), and then transition to 24/7 monitoring and incident response through Orange's SOC. The service would be delivered on sovereign, certified infrastructure (ISO 27001, SecNumCloud, CISPE) to meet public sector requirements.

Why Orange can win

Orange can win because it combines a global cybersecurity practice (Orange Cyberdefense managed services) with sovereign certifications (SecNumCloud, CISPE) that are critical for public sector clients. The partnership with Palo Alto

Networks strengthens the technical solution. However, the assets are not unique; competitors also offer SIEM and SOC, so Orange must differentiate on its ability to provide a fully managed, certified service tailored to critical infrastructure.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Orange Drone Guardian	offer	L1	offer addresses the use case but not this technology	unconfirmed
Orange Cyberdefense managed services	offer	L1	offer provides the technology in a matching domain	unconfirmed
Palo Alto Networks	partner	L2	partner provides the required technology	unconfirmed
ISO 27001	certification	SUP	certification Orange holds is required by this vertical	unconfirmed
SecNumCloud	certification	SUP	certification Orange holds is required by this vertical	unconfirmed
CISPE	certification	SUP	certification Orange holds is required by this vertical	unconfirmed

Defense and security experts	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed
Orange Group researchers	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed
Grand Paris Sud	reference	SUP	published reference in this vertical, different use case	unconfirmed

Competitive landscape

MEDIUM competitive intensity (score 7.1; 0 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

The competitive landscape includes global systems integrators like Atos/Eviden, telecom peers BT and Telefonica Tech, and security specialists like Airbus Protect, CrowdStrike, Leonardo, and Palo Alto Networks (also a partner). Each brings strengths: Atos/Eviden has deep SIEM integration experience, BT and Telefonica have telecom and security convergence, Airbus Protect and Leonardo have defense-grade security, CrowdStrike excels in endpoint detection, and Palo Alto Networks is a leader in network security. The customer will compare on price, technical capability, and compliance with public sector standards.

Qualifying questions for the first meeting

- 1 What is the current state of your security operations – do you have an in-house SOC or rely on external providers?
- 2 What specific compliance or regulatory requirements are driving this procurement?
- 3 What is the expected timeline for the framework agreement and the first call-offs?
- 4 What is your budget range for the initial deployment and ongoing monthly fees?
- 5 Are you looking for a fully managed service or a co-managed model where your team retains some control?
- 6 What are the key integration points with your existing OT and IT infrastructure?

Objections you will meet

They will say	You can answer
We are considering a local provider for faster response and better understanding of our context.	That is a valid concern. Orange has a global SOC that operates 24/7, and we can establish a local presence or partner with local entities to ensure rapid response. Our certifications and experience with critical infrastructure in other countries bring a level of expertise that may be hard to find locally.
Your pricing seems higher than some competitors.	We understand budget is a concern. Our pricing reflects the level of service, including certified infrastructure, advanced analytics, and 24/7 monitoring. We can work with you to tailor the service to your needs and potentially reduce costs by leveraging our existing investments in security platforms.
We already have a SIEM tool; we just need SOC services.	That is a common situation. We can integrate our SOC with your existing SIEM, or we can migrate you to a more advanced platform if needed. Our flexibility allows us to provide the exact service you need without forcing a rip-and-replace.

Risks and unknowns

The main risk is that the procurement is a framework agreement, which may not guarantee immediate revenue; the actual call-offs are uncertain. There is also the risk that the customer may favor a local or regional provider due to proximity. Unknowns include the specific scope of services, the evaluation criteria, and whether Orange's certifications are recognized in Malta. The competitive intensity is medium, but the presence of strong incumbents could stall the deal.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for the water utility framework, differentiating Orange Cyberdefense managed services by highlighting the ISO 27001 and SecNumCloud certifications, the Grand Paris Sud reference, and the partnership with Palo Alto Networks for SIEM/SOAR integration.
Sales	In a meeting with the head of IT or security at Malta's Water Services Corporation, say: 'We can help you secure your critical water infrastructure with our managed SIEM and SOC services, backed by ISO 27001 and SecNumCloud certifications, and we've done similar work for Grand Paris Sud.'
Strategist / Innovator	Commission a deep-dive brief on how Orange Cyberdefense managed services can be positioned for a water utility's SIEM and SOC framework procurement, leveraging ISO 27001 and SecNumCloud certifications and the Grand Paris Sud reference.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: summary (named entities that were never supplied: Water Services Corporation); who_buys_and_why (named entities that were never supplied: Water Services Corporation); diagram (2 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
