

# Sovereign digital workplace for Dutch public sector agencies, combining sovereign cloud and Nextcloud to ensure data residency and compliance for citizen data.

Public / Government sector × Data sovereignty and protection × Sovereign and trusted cloud · OS103 v1 · refreshed 2026-08-18

| ATTRACTIVENESS                   | RIGHT TO WIN                         | COMPETITION                            | SERVICEABLE MARKET                           | HORIZON                                        | PORTFOLIO               |
|----------------------------------|--------------------------------------|----------------------------------------|----------------------------------------------|------------------------------------------------|-------------------------|
| <b>84</b><br>is the world moving | <b>62</b><br>can we play, can we win | <b>HIGH</b><br>5 named in the evidence | <b>€103m</b><br>observed evidence · per year | <b>NOW</b><br>budgeted procurement within 1... | <b>L0</b><br>24 signals |

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

## Market opportunity

| Method                                        | Total (TAM)                   | Serviceable (SAM)             | Obtainable (SOM)              | Confidence |
|-----------------------------------------------|-------------------------------|-------------------------------|-------------------------------|------------|
| Observed: tendered contract value, annualised | <b>€103m</b><br>€103m – €196m | <b>€103m</b><br>€103m – €196m | <b>€3.6m</b><br>€3.6m – €6.9m | observed   |

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

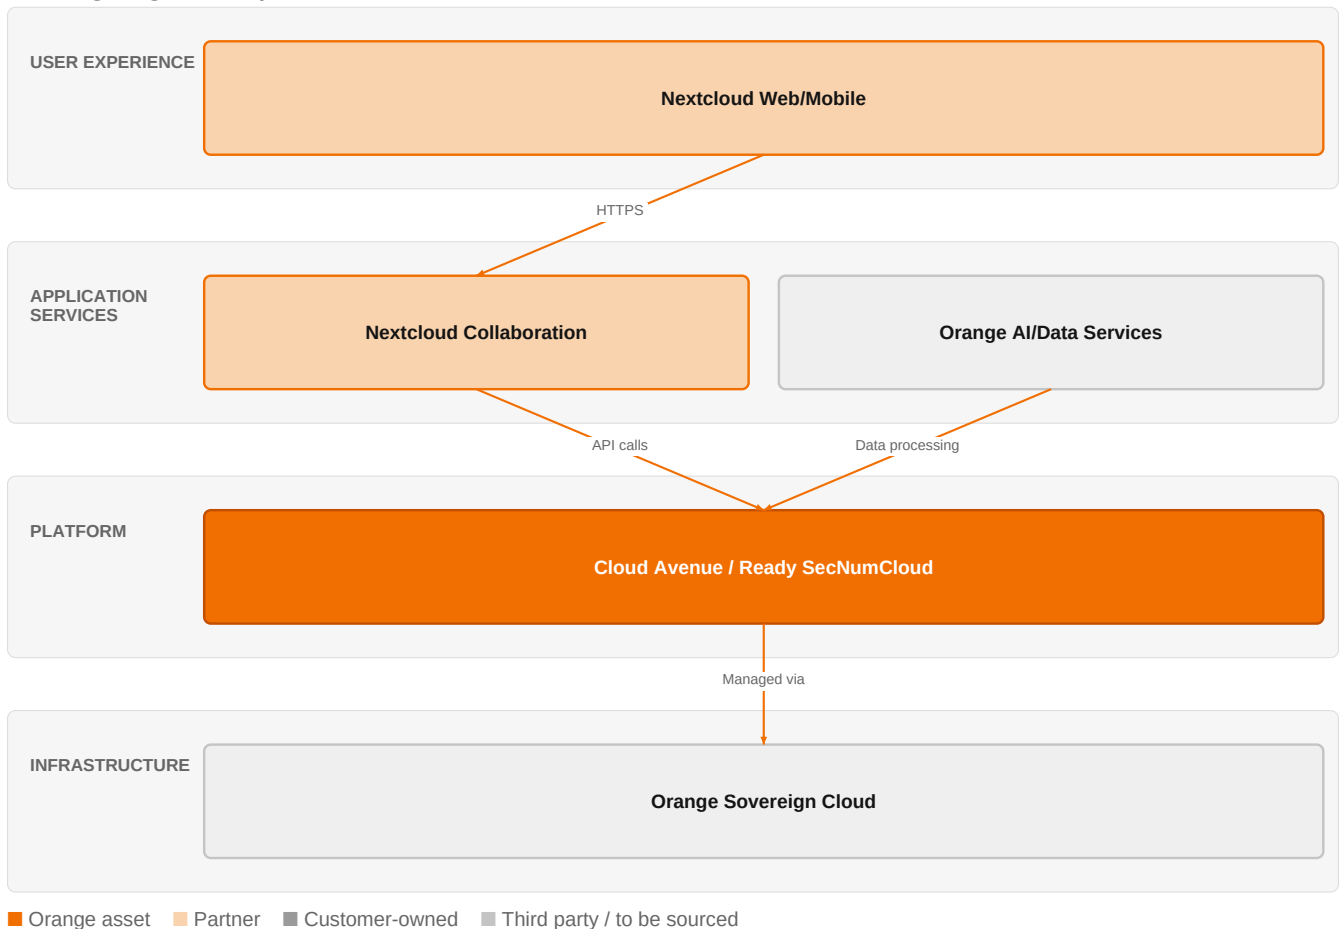

### Observed: tendered contract value, annualised

| Factor                                             | Value          | Basis      | Source                                | As of                  |
|----------------------------------------------------|----------------|------------|---------------------------------------|------------------------|
| Tendered contract value in matching CPV categories | €103m per year | observed   | TED (Tenders Electronic Daily) · ted  | 2026-05-19..2026-08-06 |
| Assumed obtainable share of the serviceable market | 3.5 % of SAM   | assumption | config/sizing.yaml · obtainable_share | size-2026-08-a         |

**Read this before quoting the number.** Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 19 matching notices, matched on use case via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size. 1 of 4 declared geographies are outside the European reference data (MA); the estimate covers the European footprint only.

## The solution, in one picture

### Sovereign Digital Workplace for Dutch Public Sector

This diagram shows how Orange's SecNumCloud-qualified platform hosts Nextcloud to deliver a sovereign digital workplace.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

## Who buys, and why now

The buyer is typically the Chief Information Officer (CIO) or Chief Digital Officer of a Dutch public sector agency, such as a municipality or a national agency. The pain is the risk of non-compliance with data residency regulations and the lack of control over citizen data stored in non-sovereign clouds. The trigger is often a new regulation, a security audit, or a high-profile data breach in the public sector.

## Why it is hot now — every claim bound to a dated source

- Centric and Nextcloud have developed a sovereign digital workplace for the Dutch public sector, indicating a market move towards sovereign solutions. [SIG-8DD850EF85F0]
- Centric and Nextcloud develop a sovereign digital workplace for the Dutch public sector. [SIG-8DD850EF85F0]
- Open source is key to reclaiming public sector digital sovereignty. [SIG-1B86BCAD92ED]
- SAP invests to strengthen Europe's digital sovereignty through sovereign cloud. [SIG-A66458DDEF78]
- SAP joins S3NS, a SecNumCloud-qualified trusted cloud, with Thales as first strategic customer. [SIG-10BB109E739B, SIG-97C21A9E6B17, SIG-CFB4798F11FD]
- Morocco signs AI partnership to develop digital talent and tech sovereignty. [SIG-E0C8D84AA83B]
- Cybastion and Cisco collaborate to build sovereign digital infrastructure in Morocco. [SIG-2A147F5BFD13]
- Morocco is partnering to develop digital talent and tech sovereignty. [SIG-E0C8D84AA83B]

## What Orange would deliver, and why it can win

### Why Orange can win

Orange can win because we offer a SecNumCloud-qualified cloud (Cloud Avenue / Ready SecNumCloud) that meets the highest French sovereignty standards, which is a strong differentiator for European public sector clients. Our ISO 27001 certification and CISPE membership further demonstrate our commitment to security and data protection. We also have a reference in Grand Paris Sud, showing our ability to deliver sovereign solutions.

#### Named assets behind this — each individually inspectable (LK-08)

| Asset                                  | Type            | Link | Why it is linked                                           | Curator     |
|----------------------------------------|-----------------|------|------------------------------------------------------------|-------------|
| Cloud Avenue / Ready SecNumCloud       | offer           | L0   | offer addresses the use case AND provides the technology   | unconfirmed |
| Quantum Defender / quantum-safe offers | offer           | L1   | offer addresses the use case but not this technology       | unconfirmed |
| ISO 27001                              | certification   | SUP  | certification Orange holds is required by this vertical    | unconfirmed |
| SecNumCloud                            | certification   | SUP  | certification Orange holds is required by this vertical    | unconfirmed |
| CISPE                                  | certification   | SUP  | certification Orange holds is required by this vertical    | unconfirmed |
| AI / Data / Cloud experts              | capability pool | SUP  | capability pool staffs this domain, vertical or technology | unconfirmed |
| Digital experts                        | capability pool | SUP  | capability pool staffs this domain, vertical or technology | unconfirmed |
| Healthcare experts                     | capability pool | SUP  | capability pool staffs this domain, vertical or technology | unconfirmed |
| Orange Group researchers               | capability pool | SUP  | capability pool staffs this domain, vertical or technology | unconfirmed |
| Grand Paris Sud                        | reference       | SUP  | published reference in this vertical, different use case   | unconfirmed |

## Competitive landscape

**HIGH** competitive intensity (score 8.5; 5 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitors include Atos/Eviden, Thales, Capgemini, Zscaler, Cisco, Google Cloud, Microsoft, and Deutsche Telekom/T-Systems. Atos has launched its own sovereign cloud, and Thales is involved in the SecNumCloud-qualified S3NS cloud. Capgemini advocates open source for public sector sovereignty. Zscaler and Cisco are partnering on sovereign infrastructure, and the hyperscalers are also offering sovereign cloud solutions. The customer will compare our SecNumCloud qualification and our ability to integrate with existing systems.

**evidenced** means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar.  
**structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

## Qualifying questions for the first meeting

- 1 What are your current data residency requirements for citizen data, and which regulations apply?
- 2 Have you already evaluated any sovereign cloud solutions, and what were the outcomes?
- 3 What is your current digital workplace setup, and which applications are critical for your staff?
- 4 Do you have a timeline for migrating to a sovereign solution, and what is driving that timeline?
- 5 Who is the decision-maker for this initiative, and what are their top priorities?

## Objections you will meet

| They will say                                                     | You can answer                                                                                                                                                                                                                               |
|-------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| We are already considering a solution from Centric and Nextcloud. | That's a strong option, but Orange brings additional value with our SecNumCloud-qualified infrastructure and our experience with large public sector deployments. We can offer a more integrated solution with our AI and data capabilities. |
| Why should we trust a French cloud provider for Dutch data?       | Our SecNumCloud qualification is recognized across Europe as a gold standard for sovereignty. We also have CISPE membership, ensuring data residency and compliance. We are committed to meeting Dutch requirements as well.                 |
| We are concerned about the cost of migration.                     | We understand cost is a concern. Our solution is designed to be cost-effective, and we can phase the migration to spread costs. We also offer a pilot to demonstrate value before full commitment.                                           |

## Next action, by role (FR-17)

| Role                   | Do this next                                                                                                                                                                                                                        |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Presales / Proposal    | Prepare a bid brief for a Dutch public sector agency's sovereign digital workplace tender, differentiating Orange's SecNumCloud-certified Cloud Avenue and ISO 27001 compliance against the Centric-Nextcloud solution.             |
| Sales                  | In a meeting with a Dutch public sector agency's IT director, say: 'Orange's Cloud Avenue SecNumCloud offer ensures data residency and compliance for citizen data, supporting your sovereign digital workplace ambitions.'         |
| Strategist / Innovator | Deep-dive the sovereign digital workplace opportunity for Dutch public sector agencies, leveraging Orange's SecNumCloud and CISPE certifications to assess a sovereign cloud offering that aligns with the Centric-Nextcloud model. |

## Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

## How this brief was made

**Computed, not written.** Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

**Written, then checked.** The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: summary (named entities that were never supplied: Centric, Nextcloud, SAP, Schwarz Digits); what\_is\_changing (named entities that were never supplied: Centric, Nextcloud, SAP, Schwarz Digits); what\_orange\_would\_deliver (named entities that were never supplied: Centric, Nextcloud, SAP, Schwarz Digits); risks\_and\_unknowns (named entities that were never supplied: Centric, Nextcloud, SAP, Schwarz Digits); diagram (2 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
