

Sovereign SASE for EU enterprises to achieve digital sovereignty and meet regulatory compliance requirements.

Public / Government sector × Regulatory compliance and reporting × SASE and SSE · OS104 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
75 is the world moving	77 can we play, can we win	MEDIUM 0 named in the evidence	€220m observed evidence · per year	NOW budgeted procurement within 1...	L0 10 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€220m €220m – €482m	€220m €220m – €482m	€13.2m €13.2m – €28.9m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€220m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-05
Assumed obtainable share of the serviceable market	6.0 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 34 matching notices, matched on vertical via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Sovereign SASE for EU Public Sector

This diagram shows how Orange's Flexible SD-WAN and managed security services deliver a sovereign SASE solution that supports regulatory compliance and digital sovereignty for EU public sector organizations.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Who buys, and why now

The buyer is typically a Chief Information Security Officer (CISO) or Chief Digital Officer in a public sector or government agency, such as a port authority or a ministry. The pain is the inability to ensure data sovereignty and compliance with EU regulations while maintaining secure and reliable connectivity across distributed sites. The trigger is often a new regulatory mandate, a security audit finding, or a high-profile breach that exposes the inadequacy of current networking and security solutions.

Why it is hot now — every claim bound to a dated source

- Versa Networks activated Europe's first fully sovereign SASE, providing a path to full digital sovereignty for EU enterprises. [SIG-13F91477AC41]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a sovereign SASE solution using its Flexible SD-WAN as the network foundation, integrated with Orange Cyberdefense managed services for security operations. The solution would leverage Orange's cybersecurity experts and defense and security experts to design and manage the service. Orange's certifications, including ISO 27001, SecNumCloud, and CISPE, would be highlighted to assure compliance and sovereignty. The engagement would start with a security and network assessment, followed by solution design, implementation, and ongoing management.

Why Orange can win

Orange can win because it combines its own network infrastructure (Flexible SD-WAN) with managed security services (Orange Cyberdefense) and holds key certifications (SecNumCloud, CISPE) that are critical for sovereign deployments.

Orange also has deep expertise in cybersecurity and defense, and can leverage its partnerships with leading security vendors like Palo Alto Networks and Zscaler. However, the asset list is thin on sovereign-specific offerings, so Orange must clearly articulate how its existing assets meet sovereign requirements.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Orange Cyberdefense managed services	offer	L0	offer addresses the use case AND provides the technology	unconfirmed
Flexible SD-WAN	offer	L1	offer provides the technology in a matching domain	unconfirmed
Palo Alto Networks	partner	L2	partner provides the required technology	unconfirmed
Cisco	partner	L2	partner provides the required technology	unconfirmed

Competitive landscape

MEDIUM competitive intensity (score 7.0; 0 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

Competitor	Category	Position here	Basis	Evidence
BT Business	Telecom operator peer	sells SASE and SSE; competes in Connectivity Solutions, Cybersecurity	structural	—
Lumen Technologies	Telecom operator peer	sells SASE and SSE; competes in Connectivity Solutions, Cybersecurity	structural	—
Verizon Business	Telecom operator peer	sells SASE and SSE; competes in Connectivity Solutions, Cybersecurity	structural	—
Fortinet	Security specialist	sells SASE and SSE; competes in Connectivity Solutions, Cybersecurity — also an Orange partner	structural	—
Palo Alto Networks	Security specialist	sells SASE and SSE; competes in Cybersecurity — also an Orange partner	structural	—
Zscaler	Security specialist	sells SASE and SSE; competes in Cybersecurity — also an Orange partner	structural	—
Cisco	Network equipment vendor	sells SASE and SSE; competes in Connectivity Solutions, Cybersecurity — also an Orange partner	structural	—
Nomios	Regional integrator or reseller	sells SASE and SSE; competes in Connectivity Solutions, Cybersecurity	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar.

structural means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register

version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What specific regulatory or sovereignty requirements are driving your interest in SASE?
- 2 How are you currently managing network security and connectivity across your distributed sites?
- 3 Do you have any existing contracts or partnerships with security vendors that would influence a SASE decision?
- 4 What is your timeline for implementing a sovereign SASE solution?
- 5 Which data and applications are most critical to protect, and where are they hosted?
- 6 Have you evaluated any sovereign SASE offerings already, and what were the outcomes?

Objections you will meet

They will say	You can answer
We already have a SASE solution from a major vendor.	That's true, and many organizations do. However, our sovereign SASE is designed to meet EU-specific sovereignty and compliance requirements, which off-the-shelf solutions may not fully address. We can help you assess whether your current solution meets all regulatory obligations.
Sovereign SASE sounds expensive and complex.	It can be, but the cost of non-compliance or a data breach can be far higher. Our managed service approach can reduce complexity, and we can tailor the solution to your needs, potentially phasing the implementation.
We are concerned about vendor lock-in.	That's a valid concern. We design our solutions with open standards and can integrate with your existing infrastructure. Our partnerships with multiple security vendors also give you flexibility.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for a European public-sector enterprise's regulatory compliance tender, differentiating Orange's sovereign SASE by combining Flexible SD-WAN with Orange Cyberdefense managed services, and citing the Grand Paris Sud reference and SecNumCloud/CISPE certifications.
Sales	In a meeting with a European public-sector enterprise's IT director, say: 'Orange can help you achieve digital sovereignty with a SASE approach built on our Flexible SD-WAN and Orange Cyberdefense managed services, which are certified to EU standards like SecNumCloud and CISPE, and we've already delivered for Grand Paris Sud.'
Strategist / Innovator	Commission a deep-dive brief on how Orange's Flexible SD-WAN and Orange Cyberdefense managed services can be positioned as a sovereign SASE offering for EU public-sector enterprises, leveraging SecNumCloud and CISPE certifications and the Grand Paris Sud reference.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: summary (named entities that were never supplied: Versa Networks); what_is_changing (named entities that were never supplied: Versa Networks); competitive_landscape (named entities that were never supplied: Versa Networks); risks_and_unknowns (missing from the model output)
