

Provide EHDS-compliant data access platforms for European clinical research organizations to accelerate real-world evidence generation from cross-border health data.

Life sciences × Clinical data interoperability × Cloud data platform · OS109 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
79 is the world moving	53 can we play, can we win	HIGH 0 named in the evidence	€144m modelled evidence · per year	NOW budgeted procurement within 1...	L1 14 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Evidence gap (SC-13). Orange has 0.0 published reference(s) in Life sciences, below the threshold of 5. A customer conversation here has no proof point behind it yet.

The opportunity

We help European clinical research organizations build EHDS-compliant data access platforms that accelerate real-world evidence generation from cross-border health data. This opportunity exists now because the European Health Data Space is moving from policy to procurement, with providers and vendors now accountable for EHDS readiness.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€173m €45.8m – €673m	€144m €38.0m – €559m	€1.7m €456k – €6.7m	modelled
Observed: tendered contract value, annualised	€25.1m	€25.1m	€301k	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Life sciences (EU27_2020)	6,493 enterprises	observed	Eurostat · sbs_sc_ovw	2024
Enterprises adopting Cloud data platform	42.7 % of enterprises (10+ employees)	observed	Eurostat · isoc_cicce_usen2 · E_CC_PDB	2025
Annual value of one engagement	€260k per enterprise per year	assumption	config/sizing.yaml · fallback_bands_eur	size-2026-08-a
Size-weighted buyer base	1,558 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	1.2 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Contract value is a configured assumption, not observed. Only 3 matching tender notices, below the 6 needed for a robust median, so the configured band for this business domain is used. It is an assumption owned by innovation-radar-curator, not evidence. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders.

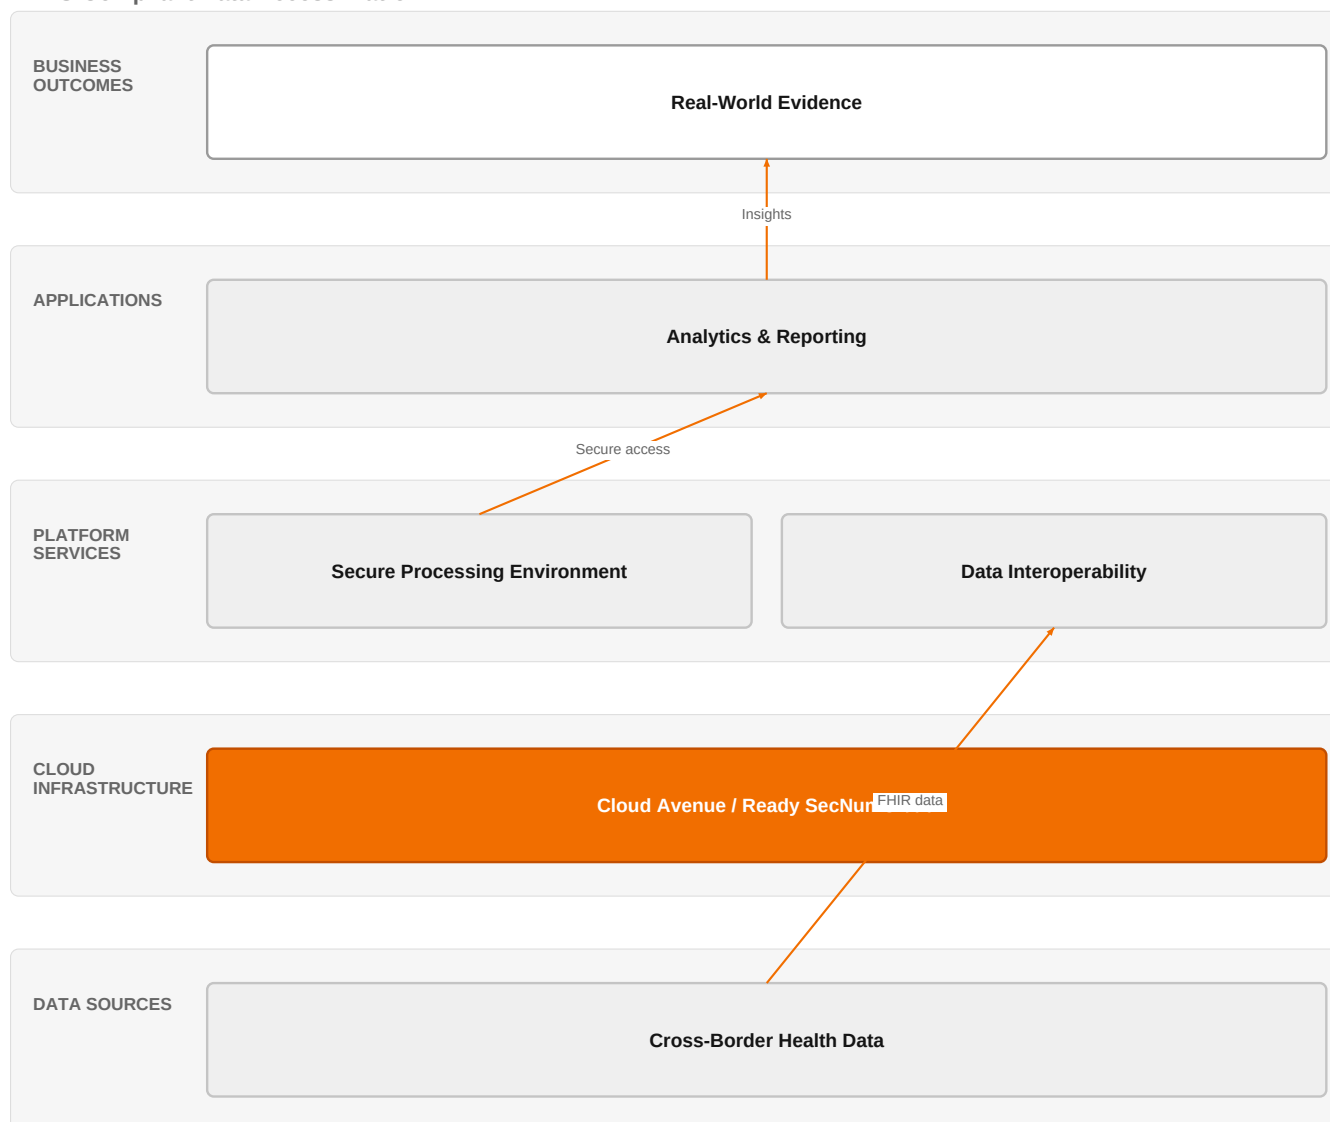

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€25.1m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-06-24
Assumed obtainable share of the serviceable market	1.2 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 3 matching notices, matched on use case via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

EHDS-Compliant Data Access Platform

This platform enables compliant access to cross-border health data for real-world evidence generation.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

The European Health Data Space is transitioning from policy to implementation, with the European Commission publishing common specifications for EHR systems, the European Electronic Health Exchange Format, and requirements for secure processing environments and HealthData@EU. CROs are adapting to this framework for real-world evidence, and France's secondary data use supports EHDS, indicating member state activity. EHDS readiness is shifting from EU policy to provider budget and vendor accountability.

Sources: SIG-E02F419156FA ec.europa.eu 2026-06-30; SIG-05DBE1C737A9 ec.europa.eu 2026-03-30; SIG-8D64FD10F3A7 ec.europa.eu 2026-03-09; SIG-A263C29CEE4D ec.europa.eu 2025-12-22; SIG-458CA0068D47 Applied Clinical Trial 2026-07-23; SIG-98B33B5AA810 Healthcare IT News 2026-06-23

Who buys, and why now

The buyer is typically the Chief Data Officer or Head of Real-World Evidence at a European CRO or clinical research organization. The pain is operational: they need to access and analyze cross-border health data for regulatory

submissions and market access, but lack the interoperable infrastructure and secure processing environments required by EHDS. The trigger is the upcoming EHDS compliance deadlines and the need to demonstrate readiness to regulators and clients.

Why it is hot now — every claim bound to a dated source

- CROs are adapting to the European Health Data Space framework for real-world evidence. [SIG-458CA0068D47]
- HealthData@EU requirements specify how health data will be shared across the EU. [SIG-A263C29CEE4D]
- France's secondary data use supports EHDS, indicating member state activity. [SIG-98B33B5AA810]
- EHDS is forcing CROs to adapt their real-world evidence practices, creating a need for interoperable data infrastructure. [SIG-458CA0068D47]
- The European Commission is setting requirements for secure processing environments and HealthData@EU, which CROs must comply with. [SIG-8D64FD10F3A7, SIG-A263C29CEE4D]
- France's secondary data use supports EHDS, indicating a push for data reuse in research. [SIG-98B33B5AA810]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a secure cloud data platform using Cloud Avenue / Ready SecNumCloud, certified HDS, to host and process health data. We would bring AI / Data / Cloud experts, Digital experts, and Healthcare experts to design and implement the platform, leveraging Orange Group researchers for advanced analytics. The engagement would start with an assessment of current data infrastructure, then design a secure processing environment compliant with EHDS, and finally deploy the platform with ongoing management and optimization.

Why Orange can win

Orange can win because we combine a sovereign, certified cloud offering (Cloud Avenue / Ready SecNumCloud) with HDS certification, which is critical for health data hosting in France and Europe. Our healthcare and data experts understand the regulatory landscape and can build trust with customers who require sovereignty and compliance. However, our assets are thin compared to hyperscalers and global integrators, so we must emphasize our unique certification and local expertise.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Cloud Avenue / Ready SecNumCloud	offer	L1	offer addresses the use case but not this technology	unconfirmed

Competitive landscape

HIGH competitive intensity (score 8.6; 0 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitors include hyperscalers AWS, Google Cloud, and Microsoft, who offer cloud data platforms and are strong in scalability and AI services. Global systems integrators like Accenture, Capgemini, DXC Technology, Infosys, and Sopra

Steria offer end-to-end implementation and consulting. The customer will compare us on compliance, sovereignty, and time-to-market, where our HDS certification and SecNumCloud give us an edge, but they may perceive hyperscalers as more innovative.

Competitor	Category	Position here	Basis	Evidence
AWS	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Google Cloud	Hyperscaler	sells Cloud data platform; competes in Cloud, CX: Customer Experience — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Cloud data platform; competes in Cloud, CX: Customer Experience — also an Orange partner	structural	—
Accenture	Global systems integrator	sells Cloud data platform; competes in Cloud, CX: Customer Experience	structural	—
Capgemini	Global systems integrator	sells Cloud data platform; competes in Cloud, CX: Customer Experience	structural	—
DXC Technology	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Infosys	Global systems integrator	sells Cloud data platform; competes in Cloud, CX: Customer Experience	structural	—
Sopra Steria	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is your current approach to accessing and analyzing cross-border health data for real-world evidence studies?
- 2 Have you started any initiatives to prepare for EHDS compliance, and if so, what gaps have you identified?
- 3 Which member states' health data are you most interested in accessing, and what are the main barriers you face today?
- 4 Do you have a secure processing environment that meets the EHDS requirements, or are you planning to build one?
- 5 What is your timeline for achieving EHDS readiness, and is there budget allocated for this in the next 12 months?
- 6 Who in your organization is responsible for EHDS compliance and data strategy?

Objections you will meet

They will say	You can answer
We are already working with a hyperscaler for our cloud infrastructure.	That's a strong foundation. Our value is in the compliance layer: we can bring HDS-certified hosting and SecNumCloud to ensure your data processing meets EHDS requirements, which hyperscalers may not offer out of the box.
EHDS is still evolving; we are waiting for final specifications.	You're right that some specifications are still being finalized. However, the requirements for secure processing environments and HealthData@EU are already published, and starting now gives you a head start. We can design a flexible architecture that adapts to changes.
We have internal capabilities to build this ourselves.	That's a valid option. But building a compliant platform requires deep expertise in both healthcare data and EU regulations. Our team has done this before and can help you avoid costly mistakes and accelerate your timeline.

Risks and unknowns

The main risk is that EHDS implementation timelines may slip, delaying customer budgets. There is also uncertainty about the final technical specifications for secure processing environments and HealthData@EU, which could require rework. Additionally, customers may prefer to work directly with hyperscalers who offer more mature data platforms, and our limited reference in this specific domain (MicroPort CardioFlow) may not be enough to convince.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Bid brief for a European CRO's EHDS-compliant data platform tender, leveraging HDS certification and Cloud Avenue / Ready SecNumCloud, and referencing MicroPort CardioFlow as a proof point.
Sales	In a meeting with a European clinical research organization's head of data science, say: 'We have a certified health data hosting platform that can support your EHDS compliance journey—let's explore how we can accelerate your real-world evidence generation.'
Strategist / Innovator	Deep-dive brief on EHDS compliance requirements for cross-border clinical data sharing, mapping Orange's HDS-certified Cloud Avenue / Ready SecNumCloud against HealthData@EU secure processing environment specifications, and assessing the gap for a CRO-focused offer.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: diagram (2 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
