

Leverage EHDS-aligned data platforms to streamline real-world evidence generation for clinical research compliance.

Life sciences × Regulatory compliance and reporting × Cloud data platform · OS116 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
49 is the world moving	53 can we play, can we win	HIGH 0 named in the evidence	€144m modelled evidence · per year	NEXT regulation adopted or propose...	L1 2 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Evidence gap (SC-13). Orange has 0.0 published reference(s) in Life sciences, below the threshold of 5. A customer conversation here has no proof point behind it yet.

The opportunity

This opportunity leverages EHDS-aligned data platforms to streamline real-world evidence generation for clinical research compliance. It targets life sciences organizations, particularly CROs, that must adapt to new data space rules. The need arises now because the EHDS framework is prompting adaptation, and EU regulations mandate compliant data compilation.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€173m €45.8m – €673m	€144m €38.0m – €559m	€1.7m €456k – €6.7m	modelled
Observed: tendered contract value, annualised	€19.1m	€19.1m	€230k	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Life sciences (EU27_2020)	6,493 enterprises	observed	Eurostat · sbs_sc_oww	2024
Enterprises adopting Cloud data platform	42.7 % of enterprises (10+ employees)	observed	Eurostat · isoc_cicce_usen2 · E_CC_PDB	2025
Annual value of one engagement	€260k per enterprise per year	assumption	config/sizing.yaml · fallback_bands_eur	size-2026-08-a
Size-weighted buyer base	1,558 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	1.2 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Contract value is a configured assumption, not observed. Only 1 matching tender notices, below the 6 needed for a robust median, so the configured band for this business domain is used. It is an assumption owned by innovation-radar-curator, not evidence. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€19.1m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-07-08
Assumed obtainable share of the serviceable market	1.2 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 3 matching notices, matched on use case via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly

in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

EHDS-Aligned Evidence Platform

This diagram shows how Orange's HDS-certified services and hyperscaler infrastructure combine to deliver compliant real-world evidence.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

The European Health Data Space (EHDS) framework is prompting CROs to adapt their real-world evidence approaches to align with new data space rules. EU regulations mandate the compilation of farm sustainability data, creating a need for compliant data platforms. These regulatory changes are driving demand for platforms that ensure compliance and streamline evidence generation.

Sources: SIG-458CA0068D47 Applied Clinical Trial 2026-07-23; SIG-7579D9CF6064 ec.europa.eu 2026-07-22

Who buys, and why now

The buyer is typically a Chief Compliance Officer or Head of Clinical Operations at a CRO or life sciences company. The pain is operational: they struggle to generate real-world evidence that meets EHDS compliance requirements, risking delays in regulatory submissions. The trigger is an upcoming regulatory deadline or an audit finding that exposes non-compliance.

Why it is hot now — every claim bound to a dated source

- The EHDS framework is prompting CROs to adapt their real-world evidence approaches to align with new data space rules. [SIG-458CA0068D47]
- EU regulations mandate the compilation of farm sustainability data, creating a need for compliant data platforms. [SIG-7579D9CF6064]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a compliant data platform leveraging its HDS certification and expertise from AI/Data/Cloud, Digital, and Healthcare experts. The engagement would start with a compliance assessment, then design and implement a data platform on a hyperscaler (Microsoft, AWS, or Google Cloud) with Orange Cyberdefense managed services for security. The platform would enable streamlined real-world evidence generation, with ongoing support from Orange Group researchers.

Why Orange can win

Orange can win because it combines HDS certification with deep healthcare expertise and hyperscaler partnerships, offering a sovereign, compliant solution. The reference with MicroPort CardioFlow demonstrates proven capability in the life sciences sector. However, the assets are thin—no specific EHDS platform offering is named, so Orange must differentiate on trust and integration.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Orange Cyberdefense managed services	offer	L1	offer addresses the use case but not this technology	unconfirmed
Microsoft	partner	L2	partner provides the required technology	unconfirmed
AWS	partner	L2	partner provides the required technology	unconfirmed
Google Cloud	partner	L2	partner provides the required technology	unconfirmed

Competitive landscape

HIGH competitive intensity (score 8.6; 0 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitor	Category	Position here	Basis	Evidence
AWS	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Google Cloud	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Accenture	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Capgemini	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
DXC Technology	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Infosys	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Sopra Steria	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 How are you currently preparing for EHDS compliance in your real-world evidence workflows?
- 2 What specific regulatory deadlines or audits are driving your need for a compliant data platform?
- 3 Which of your current data sources are most challenging to integrate into a compliant evidence pipeline?
- 4 Have you already selected a cloud provider for your data platform, and if so, which one?
- 5 What is your biggest pain point: data security, regulatory reporting, or speed of evidence generation?

Objections you will meet

They will say	You can answer
We already use a hyperscaler's data platform; why do we need Orange?	That's true, and we work with all major hyperscalers. But our HDS certification and healthcare expertise add a compliance layer that hyperscalers don't provide, ensuring your evidence generation meets EHDS rules.
EHDS is still evolving; we can wait.	Waiting is an option, but the regulation is already prompting adaptation. Starting now positions you ahead of compliance deadlines and avoids last-minute rushes.
We have internal teams that can handle this.	Your teams are capable, but our specialists bring deep healthcare and regulatory knowledge, plus managed security services, reducing the burden on your staff.

Risks and unknowns

The main risk is that EHDS rules are still evolving, and the specific compliance requirements for real-world evidence are not fully defined. There is also uncertainty about whether customers will prioritize sovereignty over cost. Orange's lack of a named EHDS-specific platform could be a gap if competitors offer turnkey solutions.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Develop a bid brief for a CRO seeking to align its real-world evidence processes with EHDS, highlighting Orange's HDS certification, AI/Data/Cloud experts, and secure managed services from Orange Cyberdefense, and referencing MicroPort CardioFlow as a proof point.
Sales	In a conversation with a contract research organization's head of clinical operations, say: 'We can help you streamline real-world evidence generation for EHDS compliance using our HDS-certified cloud platform, backed by our expertise in healthcare data and partnerships with major cloud providers.'
Strategist / Innovator	Commission a deep-dive brief on EHDS-aligned data platforms for real-world evidence generation, focusing on how Orange's HDS certification and AI/Data/Cloud experts can support CROs in regulatory compliance, and identify potential partnerships with Microsoft, AWS, or Google Cloud.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

Signal	Date	Publisher	T	Title and link
SIG-7579D9CF6064	2026-07-22	ec.europa.eu	1	Farm Sustainability Data Network – compiling data on farm sustainability
SIG-458CA0068D47	2026-07-23	Applied Clinical Trials O...	2	Real-World Evidence in Transition: CRO Adaptation to the European Health Data Space Framework -...

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: competitive_landscape (no claim survived evidence binding); diagram (3 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
