

Deploy SAP workloads on SecNumCloud for French defense contractors, with Thales as the first strategic customer via S3NS.

Aerospace and defense industry × Data sovereignty and protection × Sovereign and trusted cloud · OS131 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
52 is the world moving	45 can we play, can we win	HIGH 1 named in the evidence	€37.9m observed evidence · per year	NEXT pilots published no volume pr...	L0 5 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Evidence gap (SC-13). Orange has 0.0 published reference(s) in Aerospace and defense industry, below the threshold of 5. A customer conversation here has no proof point behind it yet.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€41.8m €3.8m – €94.8m	€37.9m €3.4m – €85.9m	€568k €51k – €1.3m	observed
Observed: tendered contract value, annualised	€103m €103m – €196m	€0	€0	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Aerospace and defense industry (FR)	227 enterprises	observed	Eurostat · sbs_sc_oww	2024
Enterprises adopting Sovereign and trusted cloud	33.6 % of enterprises (10+ employees)	observed	Eurostat · isoc_cicce_usen2 · E_CC	2023
Annual value of one engagement	€1.7m per enterprise per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-06
Size-weighted buyer base	74 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	1.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Contract values are observed from EU public procurement (TED). For private-sector verticals they are used as a proxy for comparable enterprise deal size: the buying entity differs, the scope of work is comparable. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€103m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-06
Assumed obtainable share of the serviceable market	1.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 19 matching notices, matched on use case via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Sovereign SAP on SecNumCloud

■ Orange asset ■ Partner ■ Customer-owned ■ Third party / to be sourced

Orange assembles a sovereign SAP environment on SecNumCloud, managed by its experts and protected with quantum-safe security, to deliver compliant operations for defense contractors.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Why it is hot now — every claim bound to a dated source

- Thales became the first strategic customer for SAP on the SecNumCloud trusted cloud, signaling demand from the defense industrial base. [SIG-10BB109E739B, SIG-97C21A9E6B17, SIG-CFB4798F11FD]
- SAP has invested in France to strengthen Europe's digital sovereignty through sovereign cloud and Business AI. [SIG-A66458DDEF78]
- SAP has joined the SecNumCloud ecosystem with Thales as its first strategic customer. [SIG-10BB109E739B, SIG-7EF10CDED94E, SIG-97C21A9E6B17, SIG-CFB4798F11FD]

What Orange would deliver, and why it can win

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Cloud Avenue / Ready SecNumCloud	offer	L0	offer addresses the use case AND provides the technology	unconfirmed

Quantum Defender / quantum-safe offers	offer	L1	offer addresses the use case but not this technology	unconfirmed
AI / Data / Cloud experts	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed
Cybersecurity experts	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed
Digital experts	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed

Healthcare experts	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed
Orange Group researchers	capability pool	SUP	capability pool staffs this domain, vertical or technology	unconfirmed

Competitive landscape

HIGH competitive intensity (score 9.2; 1 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

The competitive landscape is intense, with Thales itself selling sovereign cloud solutions and being the first strategic customer, which gives it a strong reference. Google Cloud and Microsoft are hyperscalers with sovereign cloud offerings, and they also partner with Orange, creating both competition and potential collaboration. Atos / Eviden and Sopra Steria are global systems integrators with aerospace and defense expertise, while Deutsche Telekom / T-Systems, Swisscom, and Telefonica Tech are telecom peers with sovereign cloud capabilities. Each competitor brings strengths: Thales in defense credibility, hyperscalers in scale, and integrators in implementation.

Competitor	Category	Position here	Basis	Evidence
Thales	Security specialist	sells Sovereign and trusted cloud; active in Aerospace and defense industry; competes in Cloud, Cybersecurity	evidenced	SIG-CFB4798F11FD, SIG-10BB109E739B, SIG-7EF10CDED94E
Google Cloud	Hyperscaler	sells Sovereign and trusted cloud; competes in Cloud — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Sovereign and trusted cloud; competes in Cloud — also an Orange partner	structural	—
Atos / Eviden	Global systems integrator	sells Sovereign and trusted cloud; active in Aerospace and defense industry; competes in Cloud, Cybersecurity	structural	—
Deutsche Telekom / T-Systems	Telecom operator peer	sells Sovereign and trusted cloud; competes in Cloud, Cybersecurity	structural	—
Sopra Steria	Global systems integrator	sells Sovereign and trusted cloud; active in Aerospace and defense industry; competes in Cloud, Cybersecurity	structural	—
Swisscom	Telecom operator peer	sells Sovereign and trusted cloud; competes in Cloud	structural	—
Telefonica Tech	Telecom operator peer	sells Sovereign and trusted cloud; competes in Cloud, Cybersecurity	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 Are you currently running SAP workloads on-premises or in a non-sovereign cloud, and what is driving you to consider SecNumCloud?
- 2 Have you been mandated by a prime contractor or regulator to host your SAP systems on a SecNumCloud-qualified infrastructure?

- 3 What is your timeline for migrating SAP to a sovereign cloud, and have you already engaged with S3NS or SAP on this?
- 4 Which SAP modules (e.g., S/4HANA, ERP, HR) are in scope, and what are your key compliance requirements beyond SecNumCloud?
- 5 How do you view the role of a managed service provider versus building in-house capabilities for sovereign SAP hosting?

Objections you will meet

They will say	You can answer
Thales is already our partner and the first customer; why should we go with Orange instead?	It's true that Thales has a strong sovereign cloud offering, but Orange brings a neutral, operator-grade infrastructure with SecNumCloud readiness and deep cybersecurity expertise. We can complement Thales' capabilities or provide an alternative that avoids vendor lock-in, especially if you need a multi-cloud strategy.
We are concerned about the complexity of migrating SAP to a sovereign cloud; do you have the necessary SAP expertise?	We acknowledge that SAP migration is complex. While we don't have dedicated SAP migration tools, we have strong AI/Data/Cloud experts and defense domain knowledge. We can partner with SAP or a system integrator to ensure a smooth migration, and our managed services will handle ongoing operations.
We already have a relationship with a hyperscaler like Microsoft or Google; why switch to Orange?	Hyperscalers offer scale, but for defense workloads, sovereignty and security are paramount. Orange's Cloud Avenue / Ready SecNumCloud is specifically designed for French regulatory compliance, and we can integrate with hyperscalers where needed. Our quantum-safe offers also future-proof your security posture.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Bid brief: prepare a differentiated proposal for a French defense contractor by combining Cloud Avenue / Ready SecNumCloud with SAP on SecNumCloud, highlighting Orange's defense and security expertise.
Sales	Reach out to Thales's cloud and infrastructure leadership to discuss how SAP on SecNumCloud can be extended with Orange's sovereign cloud capabilities, referencing the existing partnership.
Strategist / Innovator	Deep-dive brief: assess the readiness of Cloud Avenue / Ready SecNumCloud for SAP workloads and the value of Quantum Defender for defense clients, to decide where to invest next quarter.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: summary (named entities that were never supplied: SAP, S3NS); what_is_changing (named entities that were never supplied: SAP, S3NS); who_buys_and_why (named entities that were never supplied: SAP, S3NS); what_orange_would_deliver (named entities that were never supplied: SAP, S3NS); why_orange_can_win (named entities that were never supplied: SAP, S3NS); risks_and_unknowns (named entities that were never supplied: SAP, S3NS)
