

Sovereign cloud-based GRD information system for French electricity distribution operators, ensuring compliance with critical infrastructure data sovereignty regulations.

Energy × Regulatory compliance and reporting × Sovereign and trusted cloud · OS135 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
70 is the world moving	46 can we play, can we win	HIGH 1 named in the evidence	€11.0m observed evidence · per year	NOW budgeted procurement within 1...	L1 13 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Evidence gap (SC-13). Orange has 3.0 published reference(s) in Energy, below the threshold of 5. A customer conversation here has no proof point behind it yet.

The opportunity

This opportunity is a sovereign cloud-based GRD (Gestionnaire de Réseau de Distribution) information system for French electricity distribution operators, ensuring compliance with critical infrastructure data sovereignty regulations. The need is evidenced by a recent tender for such a system, and it aligns with Orange's strategic focus on trusted B2B services and sovereign cloud offerings.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€13.2m €3.0m – €168m	€11.0m €2.5m – €139m	€132k €29k – €1.7m	observed
Observed: tendered contract value, annualised	€172m €172m – €460m	€429k €429k – €1.1m	€5k €5k – €14k	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Energy (FR)	244 enterprises	observed	Eurostat · sbs_sc_oww	2024
Enterprises adopting Sovereign and trusted cloud	76.7 % of enterprises (10+ employees)	observed	Eurostat · isoc_cicce_usen2 · E_CC	2025
Annual value of one engagement	€299k per enterprise per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-07
Size-weighted buyer base	58 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	1.2 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Contract values are observed from EU public procurement (TED). For private-sector verticals they are used as a proxy for comparable enterprise deal size: the buying entity differs, the scope of work is comparable. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€172m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-07
Assumed obtainable share of the serviceable market	1.2 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 21 matching notices, matched on vertical via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a

market size.

The solution, in one picture

Sovereign GRD Cloud Solution

■ Orange asset ■ Partner ■ Customer-owned ■ Third party / to be sourced

This diagram shows how Orange's sovereign cloud platform and managed security services support a compliant GRD system for French electricity operators.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

French electricity distribution operators are actively seeking to procure GRD information systems, as evidenced by a recent tender for supply, installation, integration, deployment, and maintenance of such a system. This indicates a market shift toward modernizing grid management infrastructure. Additionally, there is a broader trend in France toward building trusted cloud platforms, as highlighted by Capgemini's analysis of policy-to-platform approaches, which underscores the regulatory and strategic importance of sovereign cloud solutions.

Sources: SIG-C4586BCEF111 boamp.fr 2026-08-02; SIG-C6BD205D845B Capgemini 2026-04-24

Who buys, and why now

The primary buyer is the IT director or CIO of a French electricity distribution operator, who is responsible for ensuring the reliability and security of grid management systems. The pain point is the need to comply with data sovereignty regulations while modernizing legacy GRD systems to handle increasing complexity. The trigger is a regulatory mandate or a procurement cycle that forces the replacement or upgrade of existing systems.

Why it is hot now — every claim bound to a dated source

- French electricity distribution network operators require a system for supply, installation, integration, deployment, and maintenance, indicating a need for compliant infrastructure. [SIG-C4586BCEF111]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would deliver a sovereign cloud-based GRD information system built on Cloud Avenue / Ready SecNumCloud, which provides a certified sovereign cloud infrastructure. The engagement would start with an assessment of the operator's current GRD processes and data flows, followed by the deployment of the system on the SecNumCloud-certified platform. Orange Cyberdefense managed services would be integrated to provide continuous security monitoring and compliance assurance. The solution would be delivered by Orange's AI / Data / Cloud experts and Digital experts, ensuring a tailored fit to the operator's needs.

Why Orange can win

Orange can win because it offers a unique combination of a SecNumCloud-certified sovereign cloud (Cloud Avenue / Ready SecNumCloud) and integrated managed security services (Orange Cyberdefense), both of which are critical for compliance with French data sovereignty regulations. The ability to leverage Orange Group researchers and a pool of AI/Data/Cloud experts provides a depth of expertise that pure-play cloud providers may lack. However, the competition is intense, and Orange must clearly differentiate its sovereign credentials and end-to-end service capability.

Named assets behind this — each individually inspectable (LK-08)

Competitive landscape

HIGH competitive intensity (score 8.2; 1 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

The competitive landscape includes global systems integrators like Capgemini, Atos/Eviden, and Sopra Steria, who are strong in large-scale IT transformation projects and have deep energy sector expertise. Hyperscalers Google Cloud and Microsoft also offer sovereign cloud solutions, leveraging their scale and technology leadership. Telecom peers such as Deutsche Telekom/T-Systems, Swisscom, and Telefonica Tech compete with their own sovereign cloud offerings, often with strong local presence. Capgemini is notably active in the trusted cloud space, as evidenced by their analysis of building a trusted cloud in France.

Sources: SIG-C6BD205D845B Capgemini 2026-04-24

Competitor	Category	Position here	Basis	Evidence
Capgemini	Global systems integrator	active in Energy; competes in Cloud	evidenced	SIG-C6BD205D845B
Google Cloud	Hyperscaler	sells Sovereign and trusted cloud; competes in Cloud — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Sovereign and trusted cloud; competes in Cloud — also an Orange partner	structural	—

Atos / Eviden	Global systems integrator	sells Sovereign and trusted cloud; competes in Cloud	structural	—
Deutsche Telekom / T-Systems	Telecom operator peer	sells Sovereign and trusted cloud; competes in Cloud	structural	—
Sopra Steria	Global systems integrator	sells Sovereign and trusted cloud; competes in Cloud	structural	—
Swisscom	Telecom operator peer	sells Sovereign and trusted cloud; competes in Cloud	structural	—
Telefonica Tech	Telecom operator peer	sells Sovereign and trusted cloud; active in Energy; competes in Cloud	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Qualifying questions for the first meeting

- 1 What is your current GRD system's architecture and when was it last upgraded?
- 2 Which specific data sovereignty regulations are you required to comply with, and how are you currently addressing them?
- 3 Have you issued a tender for a new GRD system, and what were the key evaluation criteria?
- 4 What is your timeline for replacing or upgrading your GRD system?
- 5 Who within your organization is the primary decision-maker for this procurement?
- 6 What are your main concerns about moving to a cloud-based GRD system versus on-premise?

Objections you will meet

They will say	You can answer
We are already working with a systems integrator on our GRD system.	That's understandable. However, our sovereign cloud solution is specifically designed to meet French data sovereignty requirements, which may not be fully addressed by a generalist integrator. We can complement your existing efforts with our certified infrastructure and security services.
We are concerned about the security of cloud-based systems for critical infrastructure.	Security is a valid concern. Our Cloud Avenue / Ready SecNumCloud is certified to the highest French security standards, and our Orange Cyberdefense managed services provide continuous monitoring and response. We can also discuss hybrid deployment options if needed.
We have already invested in on-premise infrastructure and are reluctant to change.	We understand the investment you've made. Our solution can be deployed in a hybrid model, allowing you to keep certain components on-premise while leveraging the cloud for others. This can provide a gradual migration path that minimizes disruption.

Risks and unknowns

A key risk is that the customer may perceive Orange as less experienced in GRD-specific applications compared to specialized energy IT vendors. The integration with existing legacy systems could be complex and time-consuming, potentially leading to delays. Additionally, the regulatory landscape may evolve, requiring continuous adaptation of the solution. There is also uncertainty about the customer's willingness to migrate to a cloud-based system versus an on-premise deployment.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Bid brief that assembles the SecNumCloud certification, Cloud Avenue / Ready SecNumCloud offer, and Orange Cyberdefense managed services into a compliant architecture for a GRD information system, and outlines the supply, installation, integration, deployment, and maintenance scope.
Sales	In a meeting with the IT director of a French electricity distribution operator, say: 'We can help you meet critical infrastructure data sovereignty regulations with our SecNumCloud-certified Cloud Avenue offer, backed by Orange Cyberdefense managed services.'
Strategist / Innovator	Deep-dive brief on how Cloud Avenue / Ready SecNumCloud plus Orange Cyberdefense managed services can be positioned as the sovereign backbone for a GRD information system, and identify which French electricity distribution operators are in procurement.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: diagram (1 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
