

Implement an integrated Distribution Network Management system for electricity providers to automate grid operations.

Energy × Network automation and assurance × Cloud data platform · OS136 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
71 is the world moving	59 can we play, can we win	HIGH 0 named in the evidence	€2.4m partial evidence · per year	NOW budgeted procurement within 1...	L1 13 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Evidence gap (SC-13). Orange has 3.0 published reference(s) in Energy, below the threshold of 5. A customer conversation here has no proof point behind it yet.

The opportunity

This opportunity is to implement an integrated Distribution Network Management system for electricity providers, automating grid operations. It is relevant now because a French electricity distribution network operator is actively procuring such a system, and regulatory revisions are pushing for modernized grid connections.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€2.9m €465k – €45.5m	€2.4m €387k – €37.8m	€69k €11k – €1.1m	partial
Observed: tendered contract value, annualised	€172m €172m – €460m	€429k €429k – €1.1m	€12k €12k – €32k	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Energy (FR)	244 enterprises	observed	Eurostat · sbs_sc_ovw	2024
Enterprises adopting Cloud data platform	17.1 % of enterprises (10+ employees)	proxy	Eurostat · isoc_cicce_usen2 · E_CC_PDB	2025
Annual value of one engagement	€299k per enterprise per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-07
Size-weighted buyer base	58 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Adoption rate is a declared proxy. Cloud-hosted database Part of this vertical is not covered separately by the enterprise ICT survey, so the all-activities rate was used for those slices. Contract values are observed from EU public procurement (TED). For private-sector verticals they are used as a proxy for comparable enterprise deal size: the buying entity differs, the scope of work is comparable. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€172m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-07
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 21 matching notices, matched on vertical via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Integrated Grid Management Solution

This diagram shows how Orange's Evolution Platform and Flexible SD-WAN integrate with cloud services to support grid operations.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

A French electricity distribution network operator is procuring a management system for installation, integration, deployment, and maintenance, indicating a concrete market need. Additionally, the revision of the Network Code on Requirements for Grid Connection of Generators is changing regulatory requirements, pushing utilities to modernize their grid operations. These factors create a timely opportunity for integrated distribution network management solutions.

Who buys, and why now

The buyer is typically the Chief Information Officer or Head of Grid Operations at an electricity distribution network operator. The pain is operational: managing increasingly complex grids with distributed generation and aging infrastructure, leading to inefficiencies and reliability issues. The trigger is often a regulatory mandate or a budgeted procurement cycle, as seen in the French tender.

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a solution using its Evolution Platform as the cloud data platform foundation, integrating with Flexible SD-WAN for secure connectivity. The engagement would start with a discovery phase using AI/Data/Cloud

experts to assess the customer's current grid management systems, followed by a design phase leveraging Orange Group researchers for optimization. Implementation would involve deploying the Evolution Platform, integrating with existing systems, and providing ongoing maintenance and support, possibly in partnership with hyperscalers like Microsoft, AWS, or Google Cloud for additional cloud services.

Why Orange can win

Orange can win by leveraging its Evolution Platform and Flexible SD-WAN, combined with its expertise in AI, data, and cloud, as well as its ISO 27001 and SecNumCloud certifications, which are critical for sovereign and secure grid operations. However, the assets are thin for this specific domain; Orange lacks deep energy-specific offerings, so the win would depend on the strength of its partnerships and the ability to integrate its platform with the customer's existing infrastructure.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Evolution Platform	offer	L1	offer addresses the use case but not this technology	unconfirmed

Competitive landscape

HIGH competitive intensity (score 8.6; 0 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitor	Category	Position here	Basis	Evidence
AWS	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Google Cloud	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Accenture	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Capgemini	Global systems integrator	sells Cloud data platform; active in Energy; competes in Cloud	structural	—
DXC Technology	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Infosys	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—

Sopra Steria	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
--------------	---------------------------	--	------------	---

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is your current process for managing distribution network operations, and what are the biggest pain points?
- 2 Have you issued a tender or are you planning to procure a new grid management system in the next 12 months?
- 3 What are your key requirements for data sovereignty and security in grid management systems?
- 4 How are you currently handling the integration of distributed energy resources and grid connection requests?
- 5 What is your timeline for complying with the revised Network Code on Requirements for Grid Connection of Generators?

Objections you will meet

They will say	You can answer
We are already considering a hyperscaler's cloud platform for this.	That's a valid consideration. However, our Evolution Platform is designed to run on multiple clouds, and we can integrate with AWS, Google Cloud, or Microsoft to provide a sovereign layer with our SecNumCloud certification, which is critical for grid operations.
Orange doesn't have specific energy industry expertise.	You're right that we don't have a dedicated energy vertical, but we bring strong capabilities in AI, data, and cloud, and we can partner with specialized integrators like Capgemini to bring domain knowledge. Our focus on security and sovereignty is a key differentiator.
We are concerned about the cost and complexity of implementation.	We understand that cost is a concern. Our approach is to start with a discovery phase to scope the project precisely, leveraging our experts to design an efficient solution that minimizes disruption and maximizes ROI.

Risks and unknowns

The main risks are that the customer may prefer a hyperscaler's native cloud platform or a specialized energy IT vendor, and that Orange's lack of a dedicated energy vertical could be a disadvantage. Unknowns include the specific technical requirements of the customer's grid and the regulatory timeline for the network code revision, which could affect urgency.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for the French electricity distribution network operator, differentiating our offer by highlighting the Evolution Platform's cloud data platform capabilities, Flexible SD-WAN for network assurance, and our certifications (ISO 27001, SecNumCloud), while leveraging partnerships with Microsoft, AWS, and Google Cloud to strengthen the solution.
Sales	In a meeting with the head of network operations at a French electricity distribution network operator, say: 'We can help you automate grid operations with our Evolution Platform and Flexible SD-WAN, backed by our ISO 27001 and SecNumCloud certifications, and we have the expert teams to support installation, integration, deployment, and maintenance.'
Strategist / Innovator	Commission a deep-dive brief on the French electricity distribution network operator's procurement, mapping Evolution Platform and Flexible SD-WAN capabilities against their stated installation, integration, deployment, and maintenance requirements, and identifying which Orange experts (AI/Data/Cloud, IoT, Digital) to engage.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: competitive_landscape (no claim survived evidence binding)
