

Enhance retail customer service with agentic AI that automates contact center interactions and connects to order management systems.

Retail × Contact centre automation × Agentic AI · OS141 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
77 is the world moving	56 can we play, can we win	HIGH 2 named in the evidence	€89.2m modelled evidence · per year	NEXT regulation adopted or propose...	L1 14 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity is about deploying agentic AI in retail contact centers to automate customer interactions and integrate with order management systems. It targets retail businesses seeking to enhance customer service efficiency and responsiveness. The timing is driven by recent advances in agentic AI and growing market adoption, with competitors like Genesys and Microsoft already moving in this direction.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€165m €44.3m – €628m	€89.2m €23.9m – €338m	€2.5m €669k – €9.5m	modelled

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Retail (EU27_2020)	195,962 enterprises	observed	Eurostat · sbs_sc_ovw	2024
Enterprises adopting Agentic AI	4.0 % of enterprises (10+ employees)	observed	Eurostat · isoc_eb_ain2 · E_AI_TPA	2025
Annual value of one engagement	€200k per enterprise per year	assumption	config/sizing.yaml · fallback_bands_eur	size-2026-08-a
Size-weighted buyer base	20,550 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Contract value is a configured assumption, not observed. Only 1 matching tender notices, below the 6 needed for a robust median, so the configured band for this business domain is used. It is an assumption owned by innovation-radar-curator, not evidence. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders. 1 of 2 declared geographies are outside the European reference data (US); the estimate covers the European footprint only.

The solution, in one picture

Agentic AI Contact Center for Retail

This diagram shows how Orange's communication platform and partner AI agents integrate with retail systems to automate customer service and drive business outcomes.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Who buys, and why now

The primary buyer is the Chief Customer Officer or VP of Customer Service in a retail organization, who feels the pain of high contact center volumes, long resolution times, and rising operational costs. The trigger is often a spike in customer inquiries during peak seasons or a competitive pressure to improve customer experience metrics. The IT leader is involved to ensure integration with existing order management systems. The pain is operational: agents spend time on repetitive queries, order status checks, and returns, which could be automated.

Why it is hot now — every claim bound to a dated source

- Genesys acquired Pinkfish to speed up contact center AI deployments, signaling growing demand for faster implementation. [SIG-DCEAF82C5CFE]
- The acquisition adds agentic workflow automation and enterprise system connectivity to contact center AI, enabling integration with retail systems. [SIG-1B16F494E208]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a solution leveraging its Contact Center Access and Business Talk offers as the communication backbone, integrated with agentic AI capabilities from partners like Microsoft and Genesys. The engagement would start with a discovery workshop to map customer journeys and identify automation opportunities, then design and deploy AI agents that handle routine inquiries and escalate complex cases to human agents. Orange's AI/Data/Cloud experts would customize the solution, and Digital experts would ensure seamless integration with the retailer's order management systems. The reference from Boulanger demonstrates Orange's experience in retail.

Why Orange can win

Orange can win by combining its trusted communication infrastructure with partner AI capabilities, offering a secure and reliable foundation. The partnership with Microsoft and Genesys allows Orange to deliver best-of-breed agentic AI without building from scratch. Orange's expertise in AI/Data/Cloud and digital transformation, along with a proven retail reference, provides credibility. However, the assets are thin in terms of proprietary AI; Orange must leverage partners to compete effectively.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Contact Center Access	offer	L1	offer addresses the use case but not this technology	unconfirmed
Business Talk	offer	L1	offer addresses the use case but not this technology	unconfirmed

Competitive landscape

HIGH competitive intensity (score 9.8; 2 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitors include Microsoft, which is shipping AI agents at enterprise scale and reframing customer experience as a growth driver; Genesys, which has acquired Pinkfish to enhance contact center AI; and global system integrators like Accenture, Capgemini, and Infosys, who bring deep retail expertise. Salesforce and NiCE also offer customer experience platforms with agentic AI. Mistral AI provides data and AI platforms. The customer will compare Orange's ability to integrate and manage the solution versus these specialists.

Competitor	Category	Position here	Basis	Evidence
Microsoft	Hyperscaler	sells Agentic AI; competes in CX: Customer Experience — also an Orange partner	evidenced	SIG-587561FC41C0, SIG-6D40B730651E
Genesys	Customer-experience platform	sells Agentic AI; competes in CX: Customer Experience — also an Orange partner	evidenced	SIG-1B16F494E208, SIG-DCEAF82C5CFE
Accenture	Global systems integrator	sells Agentic AI; active in Retail; competes in CX: Customer Experience	structural	—
Capgemini	Global systems integrator	sells Agentic AI; competes in CX: Customer Experience	structural	—
Infosys	Global systems integrator	sells Agentic AI; competes in CX: Customer Experience	structural	—
NiCE	Customer-experience platform	sells Agentic AI; competes in CX: Customer Experience — also an Orange partner	structural	—
Salesforce	Customer-experience platform	sells Agentic AI; competes in CX: Customer Experience	structural	—
Mistral AI	Data and AI platform	sells Agentic AI; competes in CX: Customer Experience	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is the current volume of contact center interactions, and what percentage are repetitive queries that could be automated?
- 2 How are your order management systems integrated with your contact center today, and what are the pain points in that integration?
- 3 Have you already evaluated or piloted any AI-based contact center solutions? If so, what were the outcomes?
- 4 What is your timeline for improving customer service efficiency, and what budget is allocated for such initiatives?
- 5 Who is the primary decision-maker for customer experience technology in your organization?
- 6 How do you measure customer satisfaction and operational costs in your contact center currently?

Objections you will meet

They will say	You can answer
We already have a contact center solution from a major vendor; why should we consider Orange?	It's true that you have an existing solution, but agentic AI is a new capability that can be layered on top. Orange can integrate with your current systems and bring the communication infrastructure and expertise to make it work seamlessly.
We're concerned about the reliability and accuracy of AI agents in handling customer orders.	That's a valid concern. We would start with a pilot to demonstrate accuracy and have human oversight for complex cases. Our partners like Microsoft and Genesys have proven enterprise-grade AI.
We don't have the internal IT resources to support another integration project.	We understand resource constraints. Orange provides managed services and our Digital experts handle the integration, so you don't need to dedicate internal teams.

Risks and unknowns

Key risks include the maturity of agentic AI in handling complex, multi-step transactions without errors, and the potential for regulatory scrutiny as seen in France. Integration with legacy order management systems may be challenging. The competitive landscape is intense, with many players offering similar capabilities. Unknowns include the actual ROI and customer acceptance of AI-driven interactions.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for a retail contact center automation opportunity, differentiating Orange by showcasing the Boulanger reference and the integration capabilities enabled by the Genesys partnership, and outline how our AI/Data/Cloud and Digital experts can deliver agentic AI solutions.
Sales	In a conversation with a retail client's customer service director, say: 'Orange's Contact Center Access and Business Talk offerings, combined with our Genesys partnership, can automate contact center interactions and connect to your order management systems, as we've done for Boulanger.'
Strategist / Innovator	Commission a deep-dive brief on agentic AI for retail contact centers, focusing on how Orange's AI/Data/Cloud and Digital expert pools can accelerate integration with order management systems, leveraging the Genesys partnership and the Boulanger reference.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: what_is_changing (named entities that were never supplied: RingCentral, Vonage, Kiabi); diagram (1 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
