

Apply agentic AI to automate patient-facing contact center tasks in healthcare, integrating with EHR systems.

Healthcare × Contact centre automation × Agentic AI · OS142 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
76 is the world moving	64 can we play, can we win	HIGH 1 named in the evidence	€182m partial evidence · per year	LATER research and standards activi...	L1 14 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity applies agentic AI to automate patient-facing contact center tasks in healthcare, integrating with EHR systems. It targets healthcare providers who are overwhelmed by patient inquiries and administrative workload. The time is now because contact center AI vendors are moving toward agentic workflows and enterprise system connectivity, and healthcare-specific AI adoption is accelerating.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€296m €24.2m – €1.4bn	€182m €14.9m – €867m	€5.1m €418k – €24.3m	partial
Observed: tendered contract value, annualised	€70.8m	€70.8m	€2.0m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Healthcare (EU27_2020)	46,762 enterprises	observed	Eurostat · sbs_sc_ovw	2024
Enterprises adopting Agentic AI	5.3 % of enterprises (10+ employees)	proxy	Eurostat · isoc_eb_ain2 · E_AI_TPA	2025
Annual value of one engagement	€970k per enterprise per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-07-22
Size-weighted buyer base	5,698 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Adoption rate is a declared proxy. AI automating workflows or assisting decisions Part of this vertical is not covered separately by the enterprise ICT survey, so the all-activities rate was used for those slices. Contract values are observed from EU public procurement (TED). For private-sector verticals they are used as a proxy for comparable enterprise deal size: the buying entity differs, the scope of work is comparable. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders. 1 of 2 declared geographies are outside the European reference data (US); the estimate covers the European footprint only. Sector adoption is read from Eurostat's all-activities aggregate for part of this vertical, which the enterprise ICT survey does not cover separately: PROXY — ICT survey excludes health activities; PROXY — residential care

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€70.8m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-07-22
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 7 matching notices, matched on vertical via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a

market size. 1 of 2 declared geographies are outside the European reference data (US); the estimate covers the European footprint only.

The solution, in one picture

Agentic AI Patient Contact Center

■ Orange asset ■ Partner ■ Customer-owned ■ Third party / to be sourced

This diagram shows how Orange combines certified hosting, contact center infrastructure, and partner agentic AI to automate patient interactions securely.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

Contact center AI is shifting from scripted chatbots to agentic AI that can autonomously execute workflows and connect to enterprise systems, as evidenced by Genesys's acquisition of Pinkfish to bring agentic workflow automation and enterprise system connectivity to its platform. In healthcare, AI is increasingly used to enhance diagnostic accuracy, patient engagement, and healthcare accessibility, and remote patient monitoring generates a surge of data that strains staff. However, many healthcare AI deployments remain siloed and fail to scale due to governance issues, indicating a need for integrated, compliant solutions.

Sources: SIG-41F6B2AD1B98 MarketScale 2026-07-01; SIG-1B16F494E208 bing.com 2026-06-30; SIG-71EE3B7DB4F6 openalex.org 2025-11-03; SIG-5EC51EEB6EC8 openalex.org 2025-08-21; SIG-F2B27060ED4C arxiv.org 2026-08-06

Who buys, and why now

The buyer is typically the Chief Digital Officer or Head of Patient Experience at a large hospital network or healthcare provider. The pain is felt by contact center managers and clinical staff who are overwhelmed by routine patient calls—appointment scheduling, prescription refills, billing questions—that consume hours and delay care. The trigger is often a patient satisfaction survey drop, rising call abandonment rates, or a mandate to reduce operational costs without cutting staff.

Why it is hot now — every claim bound to a dated source

- Genesys acquired Pinkfish to accelerate agentic AI in contact centers, indicating applicability across sectors.

[SIG-41F6B2AD1B98]

- The acquisition adds agentic workflow automation and enterprise system connectivity to contact center AI, enabling integration with healthcare systems. [SIG-1B16F494E208]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a secure, compliant contact center automation solution. First, deploy Contact Center Access (L1) as the telephony foundation. Second, integrate Business Talk (L1) for unified communications. Third, layer agentic AI capabilities from partner Genesys, leveraging its agentic workflow automation and enterprise system connectivity. Fourth, ensure data hosting and security compliance with HDS (Hebergeur de Donnees de Sante), ISO 27001, and SecNumCloud certifications. Finally, engage Orange's Healthcare experts and AI/Data experts to customize workflows and integrate with the customer's EHR system.

Why Orange can win

Orange can win because it combines a certified healthcare hosting environment (HDS) with contact center infrastructure (Contact Center Access, Business Talk) and a strategic partnership with Genesys, the very vendor whose agentic AI is leading the market. Orange's Healthcare experts and AI/Data experts can tailor the solution to specific clinical workflows, and its ISO 27001 and SecNumCloud certifications address the trust and sovereignty concerns that are paramount in healthcare. The assets are strong, but the integration effort is non-trivial.

Named assets behind this — each individually inspectable (LK-08)

Competitive landscape

HIGH competitive intensity (score 8.6; 1 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitors include Genesys, which is also a partner and sells its own agentic AI platform directly; Microsoft, which offers agentic AI via its cloud and AI services; and global systems integrators like Accenture, Capgemini, and Infosys that can assemble similar solutions. Customer-experience platforms like NiCE and Salesforce also compete, as does Mistral AI as a data and AI platform. Each is strong in its own domain, but none offers the combination of healthcare-specific hosting certifications and contact center infrastructure that Orange does.

Competitor	Category	Position here	Basis	Evidence
Genesys	Customer-experience platform	sells Agentic AI; competes in CX: Customer Experience — also an Orange partner	evidenced	SIG-41F6B2AD1B98, SIG-1B16F494E208
Microsoft	Hyperscaler	sells Agentic AI; competes in CX: Customer Experience — also an Orange partner	structural	—
Accenture	Global systems integrator	sells Agentic AI; competes in CX: Customer Experience, OX: Smart Industries	structural	—
Capgemini	Global systems integrator	sells Agentic AI; competes in CX: Customer Experience, OX: Smart Industries	structural	—
Infosys	Global systems integrator	sells Agentic AI; competes in CX: Customer Experience	structural	—
NiCE	Customer-experience platform	sells Agentic AI; competes in CX: Customer Experience — also an Orange partner	structural	—
Salesforce	Customer-experience platform	sells Agentic AI; competes in CX: Customer Experience	structural	—
Mistral AI	Data and AI platform	sells Agentic AI; competes in CX: Customer Experience	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What is your current call abandonment rate and average handle time for patient-facing calls?
- 2 Which EHR system do you use, and have you already integrated any AI tools with it?
- 3 What are the top three patient inquiry categories that consume the most agent time?
- 4 Do you have a formal governance process for approving AI deployments that touch patient data?
- 5 What is your current compliance posture regarding health data hosting (e.g., HDS, ISO 27001)?

Objections you will meet

They will say	You can answer
We already have a contact center platform; why do we need this?	That's true, you may have a platform, but agentic AI adds the ability to autonomously execute workflows across systems, not just handle calls. Our solution integrates with your existing infrastructure and adds intelligence that reduces handle time and improves patient experience.
We're concerned about AI making mistakes in patient interactions.	That's a valid concern. Our approach includes human-in-the-loop escalation for complex cases, and we leverage explainable AI principles to ensure transparency. We also comply with healthcare regulations and can provide audit trails.
We don't have the budget for a large-scale transformation.	Understood. We can start with a pilot focused on one or two high-volume call types, demonstrating ROI before scaling. Our modular approach allows you to phase investment.

Risks and unknowns

The main risk is that healthcare providers may be wary of agentic AI's autonomy in patient-facing interactions, given regulatory and safety concerns. Integration with legacy EHR systems is complex and may require significant customization. It is not yet known how quickly healthcare organizations will adopt agentic AI beyond pilot phases, given that many AI pilots fail to scale. Additionally, the specific capabilities of Genesys's agentic AI in healthcare contexts are not yet proven in the evidence.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for a healthcare contact center automation opportunity, differentiating with Orange's HDS certification, ISO 27001, SecNumCloud, and the reference of MicroPort CardioFlow, and outlining how agentic AI can integrate with EHR systems via Genesys's enterprise connectivity.
Sales	In a meeting with a healthcare provider's contact center director, say: 'Orange's Contact Center Access, combined with our HDS-certified hosting and Microsoft and Genesys partnerships, can help you automate patient-facing interactions while keeping health data secure.'

Strategist / Innovator	Commission a deep-dive brief on agentic AI contact center automation in healthcare, mapping Genesys's Pinkfish acquisition to Orange's Healthcare experts and HDS certification, to decide whether to invest in a healthcare-specific offer prototype next quarter.
------------------------	---

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: diagram (2 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
