

Sovereign zero trust SASE on STACKIT for European financial institutions to meet EU data residency and regulatory compliance.

Finance, Banking and Insurance × Data sovereignty and protection × Sovereign and trusted cloud · OS155 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
60 is the world moving	60 can we play, can we win	HIGH 2 named in the evidence	€1.7bn partial evidence · per year	NOW budgeted procurement within 1...	L0 3 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Evidence gap (SC-13). Orange has 4.0 published reference(s) in Finance, Banking and Insurance, below the threshold of 5. A customer conversation here has no proof point behind it yet.

The opportunity

This opportunity targets European financial institutions that must meet EU data residency and regulatory compliance. Orange Business can assemble a sovereign zero trust SASE solution using its Cloud Avenue / Ready SecNumCloud and cybersecurity expertise, addressing the urgent need for trusted, sovereign cloud security. The market is moving now as evidenced by recent sovereign cloud partnerships and launches.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€2.1bn €136m – €5.9bn	€1.7bn €111m – €4.8bn	€61.0m €3.9m – €169m	partial
Observed: tendered contract value, annualised	€103m €103m – €196m	€103m €103m – €196m	€3.6m €3.6m – €6.9m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Finance, Banking and Insurance (EU27_2020)	11,116 enterprises	observed	Eurostat · sbs_sc_oww	2024
Enterprises adopting Sovereign and trusted cloud	52.7 % of enterprises (10+ employees)	proxy	Eurostat · isoc_cicce_usen2 · E_CC	2025
Annual value of one engagement	€1.7m per enterprise per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-06
Size-weighted buyer base	2,426 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	3.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Adoption rate is a declared proxy. Enterprises buying paid cloud services Part of this vertical is not covered separately by the enterprise ICT survey, so the all-activities rate was used for those slices. Contract values are observed from EU public procurement (TED). For private-sector verticals they are used as a proxy for comparable enterprise deal size: the buying entity differs, the scope of work is comparable. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders. Sector adoption is read from Eurostat's all-activities aggregate for part of this vertical, which the enterprise ICT survey does not cover separately: PROXY — ICT survey excludes the financial sector; PROXY — auxiliary financial activities; PROXY — insurance and pension funding

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€103m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-06

Assumed obtainable share of the serviceable market	3.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a
--	--------------	------------	---------------------------------------	----------------

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 19 matching notices, matched on use case via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Sovereign Zero Trust SASE on Cloud Avenue

This diagram shows how Orange's sovereign cloud and security expertise delivers a compliant zero trust SASE solution for financial institutions. Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Who buys, and why now

The buyer is typically the Chief Information Security Officer (CISO) or Chief Technology Officer (CTO) of a European financial institution. The pain is the challenge of meeting strict EU data residency and regulatory requirements while adopting modern cloud and security architectures. The trigger is often an upcoming regulatory audit or a mandate to move workloads to the cloud without compromising sovereignty.

Why it is hot now — every claim bound to a dated source

- Zscaler and Schwarz Digits partnered to deliver a sovereign Zero Trust SASE platform on STACKIT in Germany. [SIG-7D8E64F42E27]
- Zscaler and Schwarz Digits partner to deliver a sovereign cloud security platform for Europe, operating the Zscaler Zero Trust Exchange on STACKIT in Germany. [SIG-7D8E64F42E27]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a sovereign zero trust SASE solution leveraging its Cloud Avenue / Ready SecNumCloud offer as the foundation, combined with its cybersecurity experts to design and implement the architecture. The engagement would start with a security and compliance assessment, followed by solution design, deployment, and ongoing management, ensuring alignment with EU data residency requirements.

Why Orange can win

Orange can win by leveraging its certified cloud offer (Cloud Avenue / Ready SecNumCloud) and deep cybersecurity expertise, along with its ISO 27001, SOC 2 Type II, and CISPE certifications, which directly address the compliance needs of financial institutions. While competitors like Atos and Zscaler have strong sovereign offerings, Orange's combination of certifications and expertise provides a credible alternative.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Cloud Avenue / Ready SecNumCloud	offer	L0	offer addresses the use case AND provides the technology	unconfirmed
Quantum Defender / quantum-safe offers	offer	L1	offer addresses the use case but not this technology	unconfirmed
ISO 27001	certification	SUP	certification Orange holds is required by this vertical	unconfirmed
SOC 2 Type II	certification	SUP	certification Orange holds is required by this vertical	unconfirmed
CISPE	certification	SUP	certification Orange holds is required by this vertical	unconfirmed

Stø	reference	SUP	published reference in this vertical for this use case	unconfirmed

Competitive landscape

HIGH competitive intensity (score 8.7; 2 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitor	Category	Position here	Basis	Evidence
Atos / Eviden	Global systems integrator	sells Sovereign and trusted cloud; competes in Cloud, Cybersecurity	evidenced	SIG-8B2FA529F43B
Zscaler	Security specialist	competes in Cybersecurity — also an Orange partner	evidenced	SIG-7D8E64F42E27
Google Cloud	Hyperscaler	sells Sovereign and trusted cloud; competes in Cloud — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Sovereign and trusted cloud; competes in Cloud — also an Orange partner	structural	—

Deutsche Telekom / T-Systems	Telecom operator peer	sells Sovereign and trusted cloud; competes in Cloud, Cybersecurity	structural	—
Sopra Steria	Global systems integrator	sells Sovereign and trusted cloud; active in Finance, Banking and Insurance; competes in Cloud, Cybersecurity	structural	—
Swisscom	Telecom operator peer	sells Sovereign and trusted cloud; competes in Cloud	structural	—
Telefonica Tech	Telecom operator peer	sells Sovereign and trusted cloud; competes in Cloud, Cybersecurity	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What specific EU data residency or regulatory compliance requirements are driving your need for a sovereign cloud solution?
- 2 Have you already evaluated any sovereign cloud or SASE offerings? If so, what were the outcomes?
- 3 Which workloads or data types are most critical to move to a sovereign cloud environment?
- 4 What is your current network and security architecture, and how would a zero trust SASE model fit into it?
- 5 Who in your organization would be the primary decision-maker for a sovereign cloud security initiative?

Objections you will meet

They will say	You can answer
We already have a relationship with a hyperscaler for our cloud needs.	That's true, and hyperscalers offer strong capabilities. However, for data sovereignty and compliance, a dedicated sovereign cloud solution may be necessary. Orange can complement your existing setup with a sovereign layer that meets EU requirements.
We are concerned about the complexity of migrating to a zero trust SASE architecture.	Migration can be complex, but Orange has the expertise to manage it incrementally. We can start with a pilot and expand based on your priorities, minimizing disruption.
We are not convinced that a telecom operator can deliver enterprise-grade security.	Orange is not just a telecom operator; we have a dedicated cybersecurity practice with certified experts and a portfolio of security solutions. Our certifications and references demonstrate our capability.

Risks and unknowns

A key risk is that the market may already be saturated with sovereign cloud offerings from strong competitors, making differentiation difficult. Additionally, the specific regulatory requirements for financial institutions in the EU are complex and may vary by country, requiring tailored solutions. The adoption of zero trust SASE is still evolving, and customer readiness may vary.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Bid brief: for a European financial institution's RFP on sovereign zero trust SASE, assemble a response that highlights Cloud Avenue / Ready SecNumCloud's compliance with ISO 27001, SOC 2 Type II, and CISPE, and references Banqsoft and Stø as proof points, while addressing quantum-safe considerations with Quantum Defender.
Sales	In a meeting with a European financial institution's CISO, say: 'Given the EU data residency requirements, we can deliver a sovereign zero trust SASE solution built on our Cloud Avenue / Ready SecNumCloud offer, which is certified to CISPE and ISO 27001, ensuring your data stays within the EU.'
Strategist / Innovator	Deep-dive brief: assess how Orange's Cloud Avenue / Ready SecNumCloud and quantum-safe offers can be positioned as a sovereign zero trust SASE alternative for European financial institutions, leveraging ISO 27001, SOC 2 Type II, and CISPE certifications, and investigate the partnership model used by Zscaler and Schwarz Digits to inform a go-to-market strategy.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: what_is_changing (named entities that were never supplied: Schwarz Digits, STACKIT, Atos Sovereign Cloud); competitive_landscape (named entities that were never supplied: Schwarz Digits, STACKIT, Atos Sovereign Cloud); diagram (1 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
