

Sovereign zero trust SASE for European public sector data protection, leveraging Zscaler and Schwarz Digits' partnership on STACKIT to ensure data residency and compliance.

Public / Government sector × Data sovereignty and protection × Zero trust architecture · OS159 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
72 is the world moving	66 can we play, can we win	HIGH 4 named in the evidence	€103m observed evidence · per year	NOW budgeted procurement within 1...	L1 12 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€103m €103m – €196m	€103m €103m – €196m	€2.9m €2.9m – €5.5m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€103m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-06
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 19 matching notices, matched on use case via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Sovereign Zero Trust SASE for Public Sector

■ Orange asset
 ■ Partner
 ■ Customer-owned
 ■ Third party / to be sourced

This picture shows how Orange integrates the sovereign Zscaler platform with its managed services to deliver compliant secure access for public sector customers.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Who buys, and why now

The buyer is typically a Chief Information Security Officer (CISO) or Head of IT Security in a European public sector entity, such as a national authority or a government agency. The pain is the operational burden of managing legacy perimeter security while complying with strict data residency and sovereignty mandates. The trigger is often a regulatory audit, a security incident, or a new mandate that forces a zero trust architecture, as seen in recent tenders for surveillance and security systems across Latvia, Slovenia, and Czechia.

Competitive landscape

HIGH competitive intensity (score 7.9; 4 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitor	Category	Position here	Basis	Evidence
Palo Alto Networks	Security specialist	sells Zero trust architecture; competes in Cybersecurity — also an Orange partner	evidenced	SIG-10E1BC61FB 2F
Zscaler	Security specialist	sells Zero trust architecture; competes in Cybersecurity — also an Orange partner	evidenced	SIG-7D8E64F42E2 7, SIG-932AAFBE DA4B
Atos / Eviden	Global systems integrator	active in Public / Government sector; competes in Cybersecurity	evidenced	SIG-B3D9AD374F 05
Microsoft	Hyperscaler	named in this topic's evidence — also an Orange partner	evidenced	SIG-333EF44491D D
CrowdStrike	Security specialist	sells Zero trust architecture; competes in Cybersecurity	structural	—
Fortinet	Security specialist	sells Zero trust architecture; competes in Connectivity Solutions, Cybersecurity — also an Orange partner	structural	—
Cisco	Network equipment vendor	sells Zero trust architecture; competes in Connectivity Solutions, Cybersecurity — also an Orange partner	structural	—
Bechtle	Regional integrator or reseller	sells Zero trust architecture	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What specific data residency or sovereignty requirements do you have for your security infrastructure?
- 2 Have you already evaluated zero trust SASE solutions, and if so, which ones and why did they fall short?
- 3 What is your current timeline for implementing a zero trust architecture, and what regulatory pressure are you under?
- 4 Who in your organization would be the ultimate decision-maker for a security platform purchase?
- 5 Do you have existing contracts with Zscaler, Palo Alto Networks, or other security vendors that we would need to work around?
- 6 How do you currently handle managed security services, and would you prefer a single provider for both platform and management?

Objections you will meet

They will say	You can answer
We can buy the sovereign Zscaler platform directly from Zscaler or Schwarz Digits.	That's true, and the platform is excellent. But Orange adds value by wrapping it with our managed security services, certifications, and public sector expertise, giving you a single accountable partner for compliance and operations.
We already have a zero trust solution from Palo Alto Networks or another vendor.	Many organizations do. However, if you have sovereignty requirements, the Zscaler–STACKIT platform is specifically designed for European data residency. We can help you assess whether your current solution meets those requirements and, if not, migrate smoothly.
This seems like a lot of change and disruption.	Change is always disruptive, but we can phase the deployment and leverage our integration expertise to minimize impact. Our managed services also reduce the operational burden on your team.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Bid brief: for a European public sector tender on sovereign zero trust SASE, assemble a response that positions Orange Cyberdefense managed services and Cloud Avenue SecNumCloud as the compliance backbone, integrating Zscaler's SASE on STACKIT, and cite the Grand Paris Sud reference as proof of sovereign delivery.
Sales	In a conversation with a European public sector CIO or CISO, say: 'Orange can help you achieve sovereign zero trust SASE with data residency in Germany, leveraging our SecNumCloud-certified Cloud Avenue and our partnership with Zscaler, ensuring compliance with European data protection regulations.'
Strategist / Innovator	Deep-dive brief: assess how Orange's SecNumCloud-certified Cloud Avenue and Orange Cyberdefense managed services can combine with Zscaler's sovereign SASE on STACKIT to create a differentiated sovereign zero trust offer for European public sector, and identify the investment needed to build a reference architecture.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: summary (named entities that were never supplied: Schwarz Digits, STACKIT); what_is_changing (named entities that were never supplied: Schwarz Digits, STACKIT); what_orange_would_deliver (named entities that were never supplied: Schwarz Digits, STACKIT); why_orange_can_win (named entities that were never supplied: Schwarz Digits, STACKIT); competitive_landscape (named entities that were never supplied: Schwarz Digits, STACKIT); risks_and_unknowns (named entities that were never supplied: Schwarz Digits, STACKIT)
