

Identity-first zero trust for healthcare payers to secure member data and meet HIPAA compliance, as demonstrated by Healthfirst's deployment.

Healthcare × Regulatory compliance and reporting × Zero trust architecture · OS160 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
71 is the world moving	76 can we play, can we win	MEDIUM 2 named in the evidence	€2.2bn partial evidence · per year	NEXT pilots published no volume pr...	L0 10 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity is an identity-first zero trust architecture for healthcare payers, securing member data and meeting HIPAA compliance. It exists now because a leading healthcare payer has demonstrated the approach, and identity security platforms are emerging as a key market move.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€3.6bn €296m – €17.2bn	€2.2bn €182m – €10.6bn	€134m €10.9m – €636m	partial
Observed: tendered contract value, annualised	€70.8m	€70.8m	€4.3m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Healthcare (EU27_2020)	46,762 enterprises	observed	Eurostat · sbs_sc_oww	2024
Enterprises adopting Zero trust architecture	65.4 % of enterprises (10+ employees)	proxy	Eurostat · isoc_cisce_ran2 · E_SECMNAC	2024
Annual value of one engagement	€970k per enterprise per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-07-22
Size-weighted buyer base	5,698 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	6.0 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Adoption rate is a declared proxy. Network access control Part of this vertical is not covered separately by the enterprise ICT survey, so the all-activities rate was used for those slices. Contract values are observed from EU public procurement (TED). For private-sector verticals they are used as a proxy for comparable enterprise deal size: the buying entity differs, the scope of work is comparable. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders. 1 of 1 declared geographies are outside the European reference data (US); the estimate covers the European footprint only. Sector adoption is read from Eurostat's all-activities aggregate for part of this vertical, which the enterprise ICT survey does not cover separately: PROXY — ICT survey excludes health activities; PROXY — residential care

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€70.8m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-07-22
Assumed obtainable share of the serviceable market	6.0 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 7 matching notices, matched on vertical via the CPV crosswalk — §4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a

market size. 1 of 1 declared geographies are outside the European reference data (US); the estimate covers the European footprint only.

The solution, in one picture

Identity-First Zero Trust for Healthcare Payers

Orange wraps partner zero trust technology with managed services and healthcare compliance expertise to secure member data.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

Healthcare payers face increasing pressure to protect member data while complying with regulations like HIPAA. The market is shifting toward identity-first zero trust, as evidenced by a healthcare payer's deployment and the launch of identity security platforms. Zero trust is evolving beyond identity to include machine identity management and operational resilience, but identity remains the foundation.

Sources: SIG-10E1BC61FB2F Palo Alto Networks 2026-05-12; SIG-8C31B0BBEF89 Palo Alto Networks 2026-05-12; SIG-5A3260810D62 FedTech Magazine 2026-06-08; SIG-CFBD245A217D Industrial Cyber 2026-05-24

Who buys, and why now

The Chief Information Security Officer (CISO) signs, but the Chief Compliance Officer feels the pain of audit findings and the risk of member data breaches. The trigger is often a regulatory audit, a near-miss incident, or a board-level directive to modernize security. Operationally, they struggle with fragmented identity management, manual access reviews, and lack of visibility into who accesses what.

Why it is hot now — every claim bound to a dated source

- A healthcare payer applied an identity security-first approach to implement zero trust, indicating a real-world deployment. [SIG-10E1BC61FB2F]
- Identity security platforms are emerging as a key market move, with a major vendor launching one. [SIG-8C31B0BBEF89]
- A healthcare organization has applied an identity security-first approach to implement zero trust, demonstrating the viability of this strategy in the sector. [SIG-10E1BC61FB2F]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a managed zero trust service using Orange Cyberdefense managed services, leveraging cybersecurity experts and healthcare experts. The engagement starts with an assessment of current identity and access management, then designs an identity-first architecture, and deploys it with continuous monitoring and compliance reporting. Orange brings ISO 27001, SecNumCloud, and HDS certifications to ensure sovereign and compliant delivery.

Why Orange can win

Orange can win because it combines cybersecurity expertise with healthcare domain knowledge, and offers managed services that reduce the burden on internal teams. The HDS certification is a differentiator for healthcare data hosting. However, the assets are thin: we lack a specific zero trust product, so we must rely on partnerships and our managed service wrapper.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator

Competitive landscape

MEDIUM competitive intensity (score 6.7; 2 of 8 listed players appear in this topic's own evidence)

A real field, including at least one player the customer will already know. Expect to be compared.

Palo Alto Networks, a partner and competitor, is strong in identity security platforms and has the Healthfirst reference. Microsoft leverages its hyperscale cloud and identity capabilities. CrowdStrike, Fortinet, Zscaler, and Cisco all sell zero trust architectures, with Fortinet and Zscaler also being partners. Bechtle and Computacenter compete as integrators, potentially undercutting on price.

Sources: SIG-10E1BC61FB2F Palo Alto Networks 2026-05-12; SIG-8C31B0BBEF89 Palo Alto Networks 2026-05-12; SIG-333EF44491DD Microsoft 2026-04-29

Competitor	Category	Position here	Basis	Evidence
Palo Alto Networks	Security specialist	sells Zero trust architecture; competes in Cybersecurity — also an Orange partner	evidenced	SIG-10E1BC61FB2F, SIG-8C31B0BBEF89
Microsoft	Hyperscaler	named in this topic's evidence — also an Orange partner	evidenced	SIG-333EF44491DD
CrowdStrike	Security specialist	sells Zero trust architecture; competes in Cybersecurity	structural	—

Fortinet	Security specialist	sells Zero trust architecture; competes in Cybersecurity — also an Orange partner	structural	—
Zscaler	Security specialist	sells Zero trust architecture; competes in Cybersecurity — also an Orange partner	structural	—
Cisco	Network equipment vendor	sells Zero trust architecture; competes in Cybersecurity — also an Orange partner	structural	—
Bechtle	Regional integrator or reseller	sells Zero trust architecture	structural	—
Computacenter	Regional integrator or reseller	sells Zero trust architecture	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar. **structural** means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 How do you currently manage identities and access for your member data systems?
- 2 What triggered your interest in zero trust now—an audit, an incident, or a board directive?
- 3 Do you have a dedicated identity and access management team, or is it handled by IT generalists?
- 4 Which systems hold member data, and are they on-premises, cloud, or hybrid?
- 5 Have you already evaluated any zero trust vendors, and if so, what did you find lacking?
- 6 What is your timeline for achieving HIPAA compliance or improving your security posture?

Objections you will meet

They will say	You can answer
We already have a security vendor like Palo Alto Networks.	That's true, and we partner with them. But we can wrap their technology with managed services and healthcare-specific compliance expertise, reducing your operational burden.
Zero trust is too complex and disruptive to implement.	It can be, but we start with an assessment and phase the rollout, focusing on identity first—the highest-impact area—and we manage the complexity for you.
We're concerned about cost.	Cost is a valid concern. Our managed service model can be more predictable than hiring and training an in-house team, and we can right-size the solution to your needs.

Risks and unknowns

The main risk is that the customer may prefer a direct relationship with a security specialist like Palo Alto Networks, bypassing Orange. We also don't know if the customer's existing infrastructure is compatible with an identity-first approach, or if they have the internal skills to sustain it. The regulatory landscape for healthcare data is evolving, and HIPAA enforcement may shift.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Assemble a bid angle on Regulatory compliance and reporting with Zero trust architecture, combining Orange Cyberdefense managed services (L0) and Palo Alto Networks (L2).
Sales	Open with Healthcare accounts on Regulatory compliance and reporting, leading with Orange Cyberdefense managed services (L0) and the MicroPort CardioFlow (SUP) reference.
Strategist / Innovator	Commission a deep-dive on Regulatory compliance and reporting in Healthcare using Zero trust architecture: size the opportunity bottom-up and decide whether to prototype next quarter.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.
