

Deploy sovereign AI compute and Zero Trust security for public sector data in Europe.

Public / Government sector × Sovereign AI enclave × Sovereign and trusted cloud · OS162 v1 · refreshed 2026-08-18

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
79 is the world moving	62 can we play, can we win	HIGH 3 named in the evidence	€103m observed evidence · per year	NOW budgeted procurement within 1...	L0 15 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity is to deploy a sovereign AI enclave for European public sector organizations, combining Orange's SecNumCloud-certified Cloud Avenue / Ready with Live Intelligence Studio and Zero Trust security. It exists now because public sector entities are procuring surveillance and security systems across Europe, and the market is responding with sovereign AI compute and Zero Trust offerings, signaling a clear demand for trusted, sovereign solutions.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€103m €103m – €196m	€103m €103m – €196m	€3.6m €3.6m – €6.9m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€103m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-06
Assumed obtainable share of the serviceable market	3.5 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 19 matching notices, matched on use case via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Sovereign AI Enclave for Public Sector

This diagram shows how Orange's SecNumCloud-certified infrastructure, AI studio, and Zero Trust security combine to deliver secure public services from surveillance data.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

European public sector entities are actively procuring surveillance and security systems, as evidenced by tenders in Finland, France, Latvia, Slovenia, and Czechia. Simultaneously, the threat landscape is evolving with the rise of agentic AI and the impending threat of quantum computers, which compromise classical cryptography and demand post-quantum migration. The market is responding with sovereign AI compute platforms (e.g., Polarise) and sovereign Zero Trust security offerings (e.g., Zscaler and Schwarz Digits partnership), as well as sovereign cloud platforms from Atos and Capgemini. This convergence of procurement activity, technological shifts, and market responses creates a timely opportunity for sovereign AI enclaves.

Sources: SIG-3115413B66C4 ted.europa.eu 2026-07-21; SIG-5280658BD549 Computers 2026-07-08; SIG-81E56EEBF9D4 openalex.org 2026-06-15; SIG-0622F177F397 ted.europa.eu 2026-05-27; SIG-09328DD7969 ted.europa.eu 2026-05-27; SIG-3115574B1AD2 ted.europa.eu 2026-05-26

Who buys, and why now

The buyer is typically a Chief Information Security Officer (CISO) or Chief Digital Officer (CDO) in a European public sector organization, such as a national authority, hospital, or port authority. The pain is the need to deploy AI-driven surveillance and security systems while ensuring data sovereignty and compliance with national and EU regulations. The

trigger is a public tender for surveillance and security systems (as seen in the evidence) or a mandate to adopt post-quantum cryptography to protect against future quantum threats. The urgency is heightened by the risk of 'harvest now, decrypt later' attacks on sensitive government data.

Why it is hot now — every claim bound to a dated source

- Polarise provides access to sovereign AI compute through its own sites in Oslo and Munich and its proprietary cloud platform. [SIG-81ADC03D8DD5]
- Zscaler and Schwarz Digits partner to deliver a sovereign Zero Trust security platform on STACKIT in Germany. [SIG-7D8E64F42E27]
- Atos launches Atos Sovereign Cloud, a trusted modernization platform designed and engineered in the EU. [SIG-8B2FA529F43B]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a sovereign AI enclave using its Cloud Avenue / Ready SecNumCloud as the certified infrastructure foundation, ensuring compliance with French and EU sovereignty requirements. On top of this, Orange would deploy its Live Intelligence Studio to enable AI-driven analytics for surveillance and security use cases. Cybersecurity experts would integrate Zero Trust security controls, leveraging Orange's ISO 27001 and CISPE certifications. The engagement would start with a security and compliance assessment, followed by infrastructure deployment, AI model integration, and ongoing management by Orange's AI/Data/Cloud and Defense/security experts.

Why Orange can win

Orange can win because it offers a unique combination of SecNumCloud-certified cloud infrastructure (Cloud Avenue / Ready SecNumCloud) and AI capabilities (Live Intelligence Studio), backed by a full suite of cybersecurity certifications (ISO 27001, CISPE). Orange's reference with Grand Paris Sud demonstrates its ability to deliver sovereign digital solutions to public sector clients. While competitors like Atos and Capgemini have sovereign cloud offerings, Orange's integrated approach combining AI, cloud, and security under one roof, with proven public sector experience, provides a compelling advantage.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Cloud Avenue / Ready SecNumCloud	offer	L0	offer addresses the use case AND provides the technology	unconfirmed
Live Intelligence Studio	offer	L1	offer addresses the use case but not this technology	unconfirmed

Competitive landscape

HIGH competitive intensity (score 8.5; 3 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

The competitive landscape includes Atos/Eviden, which has launched its own sovereign cloud platform (SIG-8B2FA529F43B); Capgemini, which is building trusted cloud solutions in France (SIG-C6BD205D845B); and Zscaler, which partners with Schwarz Digits to deliver sovereign Zero Trust security (SIG-7D8E64F42E27). Additionally, hyperscalers like Google Cloud and Microsoft, telecom peers like Deutsche Telekom/T-Systems and Swisscom, and systems integrator Sopra Steria are active in sovereign cloud. Each competitor brings strengths: Atos and Capgemini have deep public sector relationships, Zscaler is a security specialist, and hyperscalers offer scale. Orange must differentiate on its SecNumCloud certification and integrated AI+security proposition.

Competitor	Category	Position here	Basis	Evidence
Atos / Eviden	Global systems integrator	sells Sovereign and trusted cloud; active in Public / Government sector; competes in Cloud, Cybersecurity	evidenced	SIG-8B2FA529F43B
Capgemini	Global systems integrator	active in Public / Government sector; competes in Cloud	evidenced	SIG-C6BD205D845B
Zscaler	Security specialist	competes in Cybersecurity — also an Orange partner	evidenced	SIG-7D8E64F42E27
Google Cloud	Hyperscaler	sells Sovereign and trusted cloud; competes in Cloud — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Sovereign and trusted cloud; competes in Cloud — also an Orange partner	structural	—
Deutsche Telekom / T-Systems	Telecom operator peer	sells Sovereign and trusted cloud; active in Public / Government sector; competes in Cloud, Cybersecurity	structural	—
Sopra Steria	Global systems integrator	sells Sovereign and trusted cloud; active in Public / Government sector; competes in Cloud, Cybersecurity	structural	—
Swisscom	Telecom operator peer	sells Sovereign and trusted cloud; competes in Cloud	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar.

structural means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Qualifying questions for the first meeting

- 1 What specific surveillance or security systems are you procuring, and what data will they collect or process?
- 2 Do you have a mandate or policy requiring data sovereignty or specific certifications like SecNumCloud?
- 3 Are you currently using AI or planning to use AI in your security operations, and if so, what use cases?
- 4 What is your timeline for deploying new security systems, and is there a budget allocated for this fiscal year?
- 5 Have you considered the impact of quantum computing on your current encryption methods, and do you have a migration plan?
- 6 Who is the ultimate decision-maker for this procurement, and what are their top priorities: compliance, cost, or capability?

Objections you will meet

They will say	You can answer
We already have a cloud provider (e.g., a hyperscaler) that meets our needs.	That's true, and hyperscalers offer scale and innovation. However, for public sector data, sovereignty and compliance are paramount. Our SecNumCloud-certified Cloud Avenue / Ready ensures your data stays within EU jurisdiction and meets strict regulatory requirements, which hyperscalers may not fully guarantee.
Your solution seems more expensive than alternatives.	Cost is a valid concern. While our initial investment may be higher, the total cost of ownership includes compliance, security, and reduced risk of data breaches. Our integrated approach also reduces integration costs, and we can tailor the solution to your specific needs to optimize spend.

We are concerned about the maturity of AI in security applications.	AI in security is evolving, and we understand the need for reliability. Our Live Intelligence Studio is designed for enterprise-grade deployments, and we can start with a pilot to demonstrate value. We also bring cybersecurity experts to ensure AI is used safely and effectively.
---	---

Risks and unknowns

A key risk is that public sector procurement cycles are long and complex, and the tender evidence suggests a focus on physical security devices rather than AI platforms, which may require education to shift the conversation. Additionally, the post-quantum cryptography migration is still evolving, and the exact timeline for quantum threats is uncertain. The competitive intensity is high, with established players like Atos and Capgemini already offering sovereign cloud solutions. There is also a risk that the customer may prefer a single-vendor solution from a hyperscaler, despite sovereignty concerns.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for a European public sector sovereign AI enclave tender, anchoring the response on Orange's SecNumCloud-certified Cloud Avenue, Live Intelligence Studio, and ISO 27001, and referencing the Grand Paris Sud deployment as proof of sovereign cloud delivery.
Sales	In a meeting with a European public sector IT director, say: 'Orange's Cloud Avenue is SecNumCloud-certified, and we combine that with our AI and cybersecurity expertise to help you keep sovereign control of your data while adopting AI — can we explore how that fits your roadmap?'
Strategist / Innovator	Commission a deep-dive brief on the sovereign AI enclave opportunity for European public sector, comparing Polarise's sovereign AI compute, Zscaler/Schwarz Digits' Zero Trust on STACKIT, and Atos Sovereign Cloud, and mapping where Orange's SecNumCloud-certified Cloud Avenue and Live Intelligence Studio can credibly compete.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: diagram (1 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
