

EU member states' agriculture ministries need a cloud data platform to manage and report farm sustainability metrics under the Farm Sustainability Data Network initiative.

Public / Government sector × Regulatory compliance and reporting × Cloud data platform · OS044 v5 · refreshed 2026-08-20

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
86 is the world moving	64 can we play, can we win	HIGH 0 named in the evidence	€220m observed evidence · per year	NOW budgeted procurement within 1...	L1 40 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

EU member states' agriculture ministries need a cloud data platform to manage and report farm sustainability metrics under the Farm Sustainability Data Network initiative. This opportunity exists now because the EU has mandated compiling such data, creating an immediate compliance need. Orange Business can deliver a sovereign, secure platform leveraging its certified cloud and data expertise.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Observed: tendered contract value, annualised	€220m €220m – €482m	€220m €220m – €482m	€6.2m €6.2m – €13.5m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€220m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-19..2026-08-05
Assumed obtainable share of the serviceable market	2.8 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 34 matching notices, matched on vertical via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size.

The solution, in one picture

Sovereign Farm Sustainability Data Platform

Orange asset Partner Customer-owned Third party / to be sourced

This diagram shows how Orange assembles a sovereign cloud data platform for farm sustainability reporting, leveraging hyperscaler infrastructure with Orange's security and data expertise.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

What has changed

The EU has initiated the Farm Sustainability Data Network, mandating the compilation of farm sustainability data across member states. This regulatory push is part of a broader trend where public sector entities are moving to cloud platforms for data management and reporting, as seen in Czech energy utility's procurement for cloud computing to automate ESG agenda. Additionally, there is a growing emphasis on sovereign and secure cloud solutions, driven by regulations like NIS2, which require critical organisations to plan exit from US cloud services.

Sources: SIG-7579D9CF6064 ec.europa.eu 2026-07-22; SIG-E6615F15E7F1 ted.europa.eu 2026-08-05; SIG-001E814FD435 boerse-express.com 2026-08-16

Who buys, and why now

The primary buyer is the Chief Information Officer (CIO) or Head of Digitalisation in an EU member state's agriculture ministry. The pain is felt by the data management and reporting teams who must collect, validate, and submit sustainability metrics to the European Commission. The trigger is the upcoming reporting deadline under the Farm Sustainability Data Network, which requires a robust data platform to handle the volume and complexity of farm-level data.

Why it is hot now — every claim bound to a dated source

- Germany's Umweltbundesamt is procuring environmental indicators analysis for One Health, using water data from the Environmental Specimen Bank. [SIG-1C4F366EE4AA]
- Norway's Miljødirektoratet is procuring basic monitoring of environmental toxins in fresh water. [SIG-BD20378972BA]
- Norway's Miljødirektoratet is procuring monitoring of foreign marine species in ports. [SIG-AA6F24D77461]
- EU regulation mandates compiling data on farm sustainability. [SIG-7579D9CF6064]
- Czech energy utility seeks cloud computing services to automate ESG agenda. [SIG-E6615F15E7F1]
- EU passenger rights for persons with disabilities and reduced mobility are being revised, impacting transport operators. [SIG-5986363322E0]
- A Polish municipal property manager is procuring digital building inspection books for thousands of properties. [SIG-79A99CDC7AC6]
- The Commission publishes fiscal statistical tables accompanying recommendations on Member States' budgetary policies, requiring consolidated data reporting. [SIG-AE5E60301185]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a cloud data platform using its AI/Data/Cloud experts and Digital experts, leveraging partnerships with Microsoft, AWS, or Google Cloud for the underlying cloud infrastructure. The platform would be built on Orange's certified infrastructure (ISO 27001, SecNumCloud, CISPE) to ensure sovereignty and compliance. The engagement would start with a discovery phase to understand the ministry's data sources and reporting requirements, followed by platform design, data integration, and deployment, with ongoing managed services from Orange Cyberdefense.

Why Orange can win

Orange can win because it offers a sovereign, certified cloud platform (SecNumCloud, CISPE) that meets the EU's data sovereignty requirements, which hyperscalers like AWS, Google Cloud, and Microsoft cannot fully provide. Orange's partnerships with these hyperscalers allow it to offer the best of both worlds: the scalability of hyperscale cloud with the trust and compliance of a European operator. Additionally, Orange has proven experience in public sector digital transformation, as evidenced by the Grand Paris Sud reference.

Competitive landscape

HIGH competitive intensity (score 8.6; 0 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

The main competitors are hyperscalers (AWS, Google Cloud, Microsoft) and global systems integrators (Accenture, Capgemini, DXC Technology, Infosys, Sopra Steria). Hyperscalers are strong in cloud infrastructure and platform services, but they may struggle with sovereignty requirements. Systems integrators like Accenture and Capgemini have deep public sector experience and can build custom solutions, but they may lack the certified sovereign cloud offerings that Orange provides. Sopra Steria, being European, is also a strong competitor in the public sector.

Competitor	Category	Position here	Basis	Evidence
AWS	Hyperscaler	sells Cloud data platform; competes in Cloud, OX: Smart Industries — also an Orange partner	structural	—
Google Cloud	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Microsoft	Hyperscaler	sells Cloud data platform; competes in Cloud — also an Orange partner	structural	—
Accenture	Global systems integrator	sells Cloud data platform; active in Public / Government sector; competes in Cloud, OX: Smart Industries	structural	—
Capgemini	Global systems integrator	sells Cloud data platform; active in Public / Government sector; competes in Cloud, OX: Smart Industries	structural	—
DXC Technology	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Infosys	Global systems integrator	sells Cloud data platform; competes in Cloud	structural	—
Sopra Steria	Global systems integrator	sells Cloud data platform; active in Public / Government sector; competes in Cloud	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar.

structural means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Competitor analysis

7 of 8 competitors on this space have been read from their own published pages; 1 could not be read and are marked below.

The shape of the field

The field for this opportunity space is dominated by hyperscalers (AWS, Google Cloud, Microsoft Azure) offering broad cloud and AI platforms, and global systems integrators (Accenture, Capgemini, DXC, Infosys, Sopra Steria) providing consulting and implementation services. None of these competitors specifically address the Farm Sustainability Data Network initiative in their published materials, leaving a gap for a sovereign, EU-compliant cloud data platform tailored to agriculture ministries. Orange is well-positioned to fill this gap by leveraging its owned network, managed services, and EU sovereignty certifications, combined with partnerships with hyperscalers to offer a trusted, compliant solution.

AWS Hyperscaler · also an Orange partner · structural presence

AWS presents itself as a comprehensive cloud and AI provider with a broad portfolio of services, solutions, and guidance for various industries and technical use cases. It targets organizations from startups to enterprises, offering pre-vetted architectures and partner solutions to accelerate cloud adoption and innovation.

Doing here: AWS offers over 240 cloud and AI services and provides pre-vetted Solutions packages for specific industry or project needs, vetted by AWS architects for reliability, security, and cost-efficiency. It also provides IoT solutions for connecting, ingesting, processing, and analyzing device data with multi-layered security, and industry-specific solutions for financial services, education, advertising, and energy. However, its published pages do not specifically address farm sustainability data platforms or the Farm Sustainability Data Network initiative.

How Orange differentiates: Orange differentiates by offering a sovereign, EU-compliant cloud platform with certifications like SecNumCloud and CISPE, which are critical for EU member states' agriculture ministries handling sensitive farm data. While AWS provides extensive cloud services, Orange's managed services, backed by Orange Cyberdefense, ensure compliance with EU data residency and sovereignty requirements. Orange's partnership with AWS (L2) allows it to leverage AWS's technology while adding a European layer of trust and regulatory alignment. Lead with sovereignty and compliance; avoid competing on raw service breadth.

Anchored on: Orange Cyberdefense managed services (L1) · SecNumCloud (SUP) · CISPE (SUP) · AWS (L2)

What they do better: AWS offers a broader and more mature portfolio of cloud and AI services, with deep industry-specific solutions and a vast partner ecosystem.

Google Cloud Hyperscaler · also an Orange partner · structural presence

Google Cloud presents itself as a comprehensive cloud platform for building, deploying, and scaling applications, with a strong emphasis on AI, data analytics, and security. It offers a wide range of services including infrastructure, data cloud, and AI solutions, targeting enterprises and developers.

Doing here: Google Cloud presents itself as a comprehensive cloud platform for building, deploying, and scaling applications, with a strong emphasis on AI, data analytics, and security. It offers services like Gemini Enterprise for agent development and orchestration, Google AI Threat Defense for security, and an agentic Data Cloud. However, its published pages do not specifically address farm sustainability data platforms or the Farm Sustainability Data Network initiative.

How Orange differentiates: Orange differentiates by providing a sovereign cloud platform with EU data residency and compliance certifications like SecNumCloud and CISPE, which are essential for EU agriculture ministries. While Google Cloud offers advanced AI and data analytics, Orange's managed services, including Orange Cyberdefense, ensure that data remains within EU jurisdiction and meets regulatory standards. Orange's partnership with Google Cloud (L2) allows it to combine Google's AI capabilities with Orange's trusted, sovereign infrastructure. Lead with sovereignty and compliance; avoid competing on AI innovation alone.

Anchored on: Orange Cyberdefense managed services (L1) · SecNumCloud (SUP) · CISPE (SUP) · Google Cloud (L2)

What they do better: Google Cloud has strong AI and data analytics capabilities, with innovative offerings like Gemini Enterprise and an agentic data cloud.

Microsoft Hyperscaler · also an Orange partner · structural presence

Microsoft Azure presents itself as a comprehensive cloud computing platform and AI solution provider, offering a wide range of services including AI, data analytics, IoT, migration, and security. It targets enterprises across various industries, emphasizing AI-driven innovation and digital transformation.

Doing here: Microsoft Azure provides a unified AI platform for building, running, and governing AI apps and agents, along with IoT solutions, data analytics, and FinOps solutions. It also supports running SAP and Oracle workloads with high performance and compliance. However, its published pages do not specifically address farm sustainability data platforms or the Farm Sustainability Data Network initiative.

How Orange differentiates: Orange differentiates by offering a sovereign, EU-compliant cloud platform with certifications like SecNumCloud and CISPE, which are critical for EU member states' agriculture ministries. While Microsoft Azure provides a comprehensive cloud and AI platform, Orange's managed services, including Orange Cyberdefense, ensure data residency and compliance with EU regulations. Orange's partnership with Microsoft (L2) allows it to integrate Azure's capabilities while adding a European layer of trust and sovereignty. Lead with sovereignty and compliance; avoid competing on the breadth of Azure's platform.

Anchored on: Orange Cyberdefense managed services (L1) · SecNumCloud (SUP) · CISPE (SUP) · Microsoft (L2)

What they do better: Microsoft Azure offers a comprehensive cloud and AI platform with deep enterprise integrations and a wide range of services.

Accenture Global systems integrator · structural presence

Accenture presents itself as a global professional services company that helps organizations across industries reinvent their operations through strategy, consulting, technology, and platform solutions. It emphasizes digital transformation, AI, and cloud to drive growth and resilience for clients in both private and public sectors.

Doing here: Accenture provides consulting services to public sector organizations to help them build resilient operations and improve citizen experiences. It also offers connected supply chain solutions with real-time visibility and control, and partners with Blue Yonder, Coupa, Kinaxis, and O9. However, its published pages do not specifically address farm sustainability data platforms or the Farm Sustainability Data Network initiative.

How Orange differentiates: Orange differentiates by offering a sovereign, EU-compliant cloud platform with certifications like SecNumCloud and CISPE, which are essential for EU agriculture ministries handling sensitive data. While Accenture provides consulting and integration services, Orange brings an owned network and field operations, ensuring end-to-end managed services with Orange Cyberdefense. Orange's partnership with hyperscalers like Microsoft, AWS, and Google Cloud (L2) allows it to combine best-of-breed technology with European sovereignty. Lead with sovereignty and managed services; avoid competing on consulting breadth.

Anchored on: Orange Cyberdefense managed services (L1) · SecNumCloud (SUP) · CISPE (SUP) · Microsoft (L2) · AWS (L2) · Google Cloud (L2)

What they do better: Accenture has deep consulting expertise and a strong track record in public sector transformation, with a wide range of industry solutions.

Capgemini Global systems integrator · structural presence

Capgemini presents itself as a global business and technology transformation partner, combining strategy, engineering, and digital operations to help organizations across industries navigate digital transformation, cloud adoption, and AI integration. It emphasizes a people-centric approach and 'human-AI chemistry' to deliver real value, with a focus on innovation, sustainability, and industry-specific solutions.

Doing here: Capgemini provides end-to-end core banking transformation solutions, a 'Hero Car' solution with AWS and NVIDIA, and is a RISE with SAP Validated Partner. It also offers Sustainable IT solutions to reduce carbon footprint, data-driven R&D for life sciences, and 'Saving for Growth with ADMnext' for IT cost optimization. However, its published pages do not specifically address farm sustainability data platforms or the Farm Sustainability Data Network initiative.

How Orange differentiates: Orange differentiates by offering a sovereign, EU-compliant cloud platform with certifications like SecNumCloud and CISPE, which are critical for EU agriculture ministries. While Capgemini provides transformation consulting and technology services, Orange brings an owned network and field operations, ensuring end-to-end managed services with Orange Cyberdefense. Orange's partnership with hyperscalers like Microsoft, AWS, and Google Cloud (L2) allows it to combine best-of-breed technology with European sovereignty. Lead with sovereignty and managed services; avoid competing on consulting breadth.

Anchored on: Orange Cyberdefense managed services (L1) · SecNumCloud (SUP) · CISPE (SUP) · Microsoft (L2) · AWS (L2) · Google Cloud (L2)

What they do better: Capgemini has strong consulting and technology transformation capabilities, with industry-specific solutions and a focus on sustainability.

DXC Technology Global systems integrator · structural presence

DXC Technology is a global IT services provider that helps enterprises modernize their IT estates, from applications and infrastructure to cybersecurity and business processes. It positions itself as a partner for large-scale transformation, combining engineering expertise, AI, and partnerships with major technology vendors to deliver managed services and solutions across industries.

Doing here: DXC Technology delivers IT solutions to modernize operations, including cybersecurity services, cloud and infrastructure services, and enterprise application services for SAP, Oracle, Microsoft, Salesforce, and ServiceNow. It also offers workplace services and business process services for banking and insurance. However, its published pages do not specifically address farm sustainability data platforms or the Farm Sustainability Data Network initiative.

How Orange differentiates: Orange differentiates by offering a sovereign, EU-compliant cloud platform with certifications like SecNumCloud and CISPE, which are essential for EU agriculture ministries. While DXC provides IT

services and managed infrastructure, Orange brings an owned network and field operations, ensuring end-to-end managed services with Orange Cyberdefense. Orange's partnership with hyperscalers like Microsoft, AWS, and Google Cloud (L2) allows it to combine best-of-breed technology with European sovereignty. Lead with sovereignty and managed services; avoid competing on IT services breadth.

Anchored on: Orange Cyberdefense managed services (L1) · SecNumCloud (SUP) · CISPE (SUP) · Microsoft (L2) · AWS (L2) · Google Cloud (L2)

What they do better: DXC has a broad portfolio of IT services, including cybersecurity, cloud, and enterprise applications, with strong vendor partnerships.

Infosys Global systems integrator · structural presence

Their published position is unread — 403 to automated clients. Nothing below is inferred on their behalf.

Doing here: Infosys's published position is unread because their website blocks automated clients (403). No activity can be cited from their pages.

How Orange differentiates: Orange differentiates by offering a sovereign, EU-compliant cloud platform with certifications like SecNumCloud and CISPE, which are critical for EU agriculture ministries. While Infosys's specific activities in this space are unknown due to access restrictions, Orange's managed services, including Orange Cyberdefense, ensure data residency and compliance with EU regulations. Orange's partnership with hyperscalers like Microsoft, AWS, and Google Cloud (L2) allows it to combine best-of-breed technology with European sovereignty. Lead with sovereignty and managed services; avoid competing on unverified capabilities.

Anchored on: Orange Cyberdefense managed services (L1) · SecNumCloud (SUP) · CISPE (SUP) · Microsoft (L2) · AWS (L2) · Google Cloud (L2)

What they do better: Infosys is a global IT services provider with a strong reputation, but its specific positioning in this space could not be assessed due to access restrictions.

Sopra Steria Global systems integrator · structural presence

Sopra Steria presents itself as a major European tech player offering consulting, digital services, and software development to help clients drive digital transformation and achieve tangible benefits. It emphasizes its international presence and career opportunities.

Doing here: Sopra Steria is a major European tech player offering consulting, digital services, and software development to help clients drive digital transformation and achieve tangible benefits. It has a global presence and is among the top 5 European digital services companies. However, its published pages do not specifically address farm sustainability data platforms or the Farm Sustainability Data Network initiative.

How Orange differentiates: Orange differentiates by offering a sovereign, EU-compliant cloud platform with certifications like SecNumCloud and CISPE, which are essential for EU agriculture ministries. While Sopra Steria provides consulting and digital services, Orange brings an owned network and field operations, ensuring end-to-end managed services with Orange Cyberdefense. Orange's partnership with hyperscalers like Microsoft, AWS, and Google Cloud (L2) allows it to combine best-of-breed technology with European sovereignty. Lead with sovereignty and managed services; avoid competing on consulting breadth.

Anchored on: Orange Cyberdefense managed services (L1) · SecNumCloud (SUP) · CISPE (SUP) · Microsoft (L2) · AWS (L2) · Google Cloud (L2)

What they do better: Sopra Steria has a strong European presence and a solid reputation in digital services, with a focus on tangible benefits for clients.

Qualifying questions for the first meeting

- 1 What is your current process for collecting and reporting farm sustainability data to the European Commission?
- 2 Do you have a cloud strategy in place, and what are your data sovereignty requirements?
- 3 What is the volume and variety of data you expect to manage under the Farm Sustainability Data Network?
- 4 Have you already issued a tender or are you planning to procure a data platform in the next 12 months?
- 5 Who is the key decision-maker for this procurement, and what are their main concerns?

Objections you will meet

They will say	You can answer
We already have a cloud platform from a hyperscaler.	That's true, and we work with all major hyperscalers. However, our platform adds a sovereign layer that meets EU data protection requirements, which is critical for government data. We can integrate with your existing infrastructure.
We are concerned about the cost of a custom platform.	Cost is a valid concern. Our platform leverages existing cloud infrastructure and our expertise to reduce development time. We can also offer a phased approach to spread costs.

Why should we trust Orange over a global systems integrator?	We understand that trust is earned. Orange has deep experience in public sector projects, as seen in our Grand Paris Sud reference. Our certifications (SecNumCloud, CISPE) demonstrate our commitment to security and sovereignty.
--	---

Risks and unknowns

The main risk is that the Farm Sustainability Data Network initiative may face delays or changes in reporting requirements, stalling the procurement. Additionally, the customer may already have existing data platforms or relationships with other vendors, making it harder to displace incumbents. There is also uncertainty about the specific data standards and integration requirements, which could affect the platform design. Finally, the competitive intensity is high, with many strong players vying for the same contracts.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Prepare a bid brief for an EU agriculture ministry's Farm Sustainability Data Network tender, highlighting Orange's ISO 27001 and SecNumCloud certifications, AI/Data/Cloud expertise, and a reference from Grand Paris Sud to demonstrate public sector experience.
Sales	In a meeting with a director of digital services at an EU member state's agriculture ministry, say: 'We understand the Farm Sustainability Data Network will require robust data collection and reporting. Orange, with our SecNumCloud-certified cloud and AI/data expertise, can help you build a sovereign platform that meets regulatory demands while ensuring data security and compliance.'
Strategist / Innovator	Deep-dive into the Farm Sustainability Data Network opportunity by mapping the EU regulatory data requirements to Orange's AI/Data/Cloud capabilities and SecNumCloud certification, and prepare a brief on how to position a sovereign cloud data platform for agriculture ministries.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: diagram (3 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
