

Subscription drone detection alerts for airports using existing Verizon 5G towers and NVIDIA edge AI, as offered by Lockheed Martin's NetSense Airspace Awareness-as-a-Service.

Transportation and Logistics × Drone detection and airspace protection × Private 5G / LTE · OS088 v2 · refreshed 2026-08-20

ATTRACTIVENESS	RIGHT TO WIN	COMPETITION	SERVICEABLE MARKET	HORIZON	PORTFOLIO
87 is the world moving	54 can we play, can we win	HIGH 1 named in the evidence	€2.4bn partial evidence · per year	NEXT regulation adopted or propose...	L1 30 signals

Attractiveness and right to win are scored and displayed separately and are never combined (SC-12). Competition is a fourth quantity, not a discount on either.

The opportunity

This opportunity is a subscription-based drone detection alert service for airports, leveraging existing mobile network infrastructure and edge AI to provide real-time airspace protection. It addresses the urgent need for airports to detect and respond to drone incursions, which have caused significant disruptions and security breaches globally. The service is relevant now because regulatory pressure and high-profile incidents are forcing airports to move from manual observation to automated detection systems.

Market opportunity

Method	Total (TAM)	Serviceable (SAM)	Obtainable (SOM)	Confidence
Bottom-up: enterprises x adoption x contract value	€3.8bn €831m – €22.2bn	€2.4bn €518m – €13.8bn	€28.4m €6.2m – €166m	partial
Observed: tendered contract value, annualised	€115m	€115m	€1.4m	observed

All figures are annual, in EUR. Ranges compound the uncertainty of each factor below; the base case is the middle column of each.

Bottom-up: enterprises x adoption x contract value

Factor	Value	Basis	Source	As of
Enterprises in Transportation and Logistics (EU27_2020)	113,199 enterprises	observed	Eurostat · sbs_sc_ovw	2024
Enterprises adopting Private 5G / LTE	32.5 % of enterprises (10+ employees)	proxy	Eurostat · isoc_eb_iotn2 · E_IOT1	2021
Annual value of one engagement	€792k per enterprise per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-26..2026-08-05
Size-weighted buyer base	14,748 enterprise-equivalents at large-enterprise engagement value	assumption	config/sizing.yaml · size_class_value_weights	size-2026-08-a
Assumed obtainable share of the serviceable market	1.2 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a

Read this before quoting the number. Adoption rate is a declared proxy. Internet of Things by NACE Rev. 2 activity series E_IOT1 is used as a proxy for Private 5G / LTE: No private-network series; industrial IoT use as proxy. Contract values are observed from EU public procurement (TED). For private-sector verticals they are used as a proxy for comparable enterprise deal size: the buying entity differs, the scope of work is comparable. Engagement value is scaled by enterprise size class (10-19: x0.04, 20-49: x0.09, 50-249: x0.35, GE250: x1.0), because the observed contract value comes from large-organisation tenders. 1 of 1 declared geographies are outside the European reference data (US); the estimate covers the European footprint only.

Observed: tendered contract value, annualised

Factor	Value	Basis	Source	As of
Tendered contract value in matching CPV categories	€115m per year	observed	TED (Tenders Electronic Daily) · ted	2026-05-26..2026-08-05

Assumed obtainable share of the serviceable market	1.2 % of SAM	assumption	config/sizing.yaml · obtainable_share	size-2026-08-a
--	--------------	------------	---------------------------------------	----------------

Read this before quoting the number. Observed over 85 days of TED coverage and scaled to a year (x4.3); a short collection window makes that scaling rough. 8 matching notices, matched on vertical via the CPV crosswalk — \$4.5.2's warning applies: a crosswalk error lands directly in this number. Public procurement only. Private-sector demand for the same capability is not visible here at all, so this is a floor rather than a market size. 1 of 1 declared geographies are outside the European reference data (US); the estimate covers the European footprint only.

The solution, in one picture

Drone Detection as a Service for Airports

■ Orange asset ■ Partner ■ Customer-owned ■ Third party / to be sourced

This diagram shows how Orange's private network and drone detection assets combine with third-party sensors and edge AI to deliver real-time alerts to airport operations.

Boxes marked as Orange assets are validated against the linked business graph; a box the model claimed for Orange without a matching asset is shown as third party.

Who buys, and why now

The primary buyer is the airport operations or security director, who is accountable for airspace safety and operational continuity. The pain is operational: drone incursions cause flight delays, shutdowns, and safety risks, and current detection relies heavily on manual observation, which is unreliable. The trigger is a recent incident or regulatory mandate, such as the Vietnamese Civil Aviation Authority's proposal to invest in detection systems, or a high-profile breach like the one that shut down Tan Son Nhat airport.

- Lockheed Martin is preparing a 5G drone detection service using Verizon's network and technology from Nvidia, ODC, Keysight and Astris AI. [SIG-AE409C225269]
- Germany launched a drone testing hub following a severe airport security breach. [SIG-40242B367CE4]

What Orange would deliver, and why it can win

What Orange would deliver

Orange would assemble a drone detection solution using its Orange Drone Guardian offer and Private mobile networks, combined with its cybersecurity and IoT expertise. The engagement would start with a site assessment and network readiness review, then deploy Orange Drone Guardian sensors and integrate with the airport's existing infrastructure, and finally provide a subscription-based alert service with ongoing monitoring and support. Orange's Gartner Magic Quadrant leadership in private mobile networks underpins the network layer.

Why Orange can win

Orange can win because it combines a leading position in private mobile networks with a dedicated drone detection offer (Orange Drone Guardian) and deep cybersecurity expertise. The ability to provide an end-to-end solution—from network infrastructure to detection and response—differentiates Orange from pure-play drone detection vendors or telecom peers that lack the integrated security and IoT capabilities. However, the assets are thin: Orange Drone Guardian is a named offer, but its specifics are not detailed in the evidence, so the win must be built on the strength of the overall portfolio.

Named assets behind this — each individually inspectable (LK-08)

Asset	Type	Link	Why it is linked	Curator
Orange Drone Guardian	offer	L1	offer addresses the use case but not this technology	unconfirmed

Competitive landscape

HIGH competitive intensity (score 9.0; 1 of 8 listed players appear in this topic's own evidence)

Crowded, with heavyweight incumbents already visible in the evidence. Win on a specific differentiator or do not bid.

Competitor	Category	Position here	Basis	Evidence
Verizon Business	Telecom operator peer	sells Private 5G / LTE; competes in Connectivity Solutions, Cybersecurity	evidenced	SIG-AE409C225269, SIG-35ECED6AF5BB
BT Business	Telecom operator peer	sells Private 5G / LTE; competes in Connectivity Solutions, Cybersecurity	structural	—
Deutsche Telekom / T-Systems	Telecom operator peer	sells Private 5G / LTE; competes in Connectivity Solutions, Cybersecurity	structural	—
NTT DATA	Global systems integrator	sells Private 5G / LTE; competes in Connectivity Solutions	structural	—
Proximus	Telecom operator peer	sells Private 5G / LTE; competes in Connectivity Solutions	structural	—
Swisscom	Telecom operator peer	sells Private 5G / LTE; competes in Connectivity Solutions	structural	—
Telefonica Tech	Telecom operator peer	sells Private 5G / LTE; competes in Connectivity Solutions, Cybersecurity	structural	—
Telia Company	Telecom operator peer	sells Private 5G / LTE; competes in Connectivity Solutions	structural	—

evidenced means this topic's own sources name the competitor — the signal ids are in the last column and are dated and clickable in the radar.
structural means the curated register says they sell this technology into this vertical, which is true but is not proof they are in this deal. Register version competitors-2026-08-a.

Competitor analysis

6 of 8 competitors on this space have been read from their own published pages; 2 could not be read and are marked below.

The shape of the field

The field for drone detection at airports is emerging, with telecom operators and systems integrators exploring solutions. Lockheed Martin's partnership with Verizon highlights the potential of using existing network infrastructure and edge AI. European operators like BT and T-Systems are developing drone-specific offerings, while others remain silent. The gap lies in an integrated, sovereign, and certified solution that combines network, edge AI, and cybersecurity, which Orange is well-positioned to fill with its private mobile networks and drone guardian offering.

Verizon Business Telecom operator peer · evidenced presence

Verizon Business presents itself as a provider of connectivity, devices, and digital solutions for small businesses, enterprises, and the public sector, emphasizing network reliability and innovation. It offers a range of services from internet and wireless plans to IoT and security solutions, targeting both commercial and government customers.

Doing here: Verizon Business offers business internet solutions, IoT solutions like Sensor Insights, and public safety network solutions, but its published pages do not mention drone detection services or airspace protection. The specific NetSense Airspace Awareness-as-a-Service is a Lockheed Martin offering that leverages Verizon's 5G network, but Verizon's own pages are silent on this space.

How Orange differentiates: Orange differentiates by offering Orange Drone Guardian, a dedicated drone detection solution, and Private mobile networks, which can be deployed on sovereign, certified infrastructure. While Verizon provides the underlying connectivity for Lockheed's service, Orange can deliver an integrated solution combining its own network, edge AI, and cybersecurity expertise, with a strong European sovereignty story. Orange's Gartner Magic Quadrant 2026 position as a Leader in 4G and 5G Private Mobile Network Services underscores its capability in this space.

Anchored on: Orange Drone Guardian · Private mobile networks · Gartner Magic Quadrant 2026 — 4G and 5G Private Mobile Network Services (Leader)

What they do better: Verizon has a strong existing relationship with Lockheed Martin and a vast U.S. network footprint.

BT Business Telecom operator peer · structural presence

BT Business presents itself as a provider of connectivity, cloud, and security solutions for UK businesses, ranging from broadband and mobile to IoT and drone services. It targets a broad set of industries including retail, banking, manufacturing, healthcare, and the public sector, with a focus on digital transformation and industry-specific challenges.

Doing here: BT Business offers complete drone solutions in the UK, including connectivity, detection, and survey services, and provides a Drone SIM for BVLOS operations. It also offers drone flight management software using Altitude Angel's GuardianUTM platform and drone survey services across the UK.

How Orange differentiates: Orange differentiates by offering Orange Drone Guardian, a dedicated drone detection solution, and Private mobile networks, which can be deployed on sovereign, certified infrastructure. While BT has a strong UK drone ecosystem, Orange brings a broader European footprint and a stronger sovereign positioning, especially in France and other EU markets. Orange's Gartner Magic Quadrant 2026 position as a Leader in 4G and 5G Private Mobile Network Services further strengthens its credibility.

Anchored on: Orange Drone Guardian · Private mobile networks · Gartner Magic Quadrant 2026 — 4G and 5G Private Mobile Network Services (Leader)

What they do better: BT has a more established drone services portfolio in the UK, including UTM integration.

Deutsche Telekom / T-Systems Telecom operator peer · structural presence

T-Systems, a subsidiary of Deutsche Telekom, presents itself as a provider of digital services for businesses and public institutions, with core competencies in cloud services, artificial intelligence, and security. It offers managed services for IT infrastructure, including edge computing, IoT, and cybersecurity solutions, and positions itself as a partner for digital transformation across industries.

Doing here: T-Systems provides a drone detection system called Drone@Onsite to protect critical infrastructure, cities, and public events from unauthorized drone activity. It also offers sovereign AI platforms, cloud services, and comprehensive security solutions including managed detection and response.

How Orange differentiates: Orange differentiates by offering Orange Drone Guardian, a dedicated drone detection solution, and Private mobile networks, which can be deployed on sovereign, certified infrastructure. While T-Systems has a strong sovereign cloud and security portfolio, Orange's strength in private mobile networks and its Gartner Magic Quadrant 2026 Leader position provide a robust foundation for drone detection services. Orange also brings deep expertise in defense and security, with a dedicated division for this vertical.

Anchored on: Orange Drone Guardian · Private mobile networks · Gartner Magic Quadrant 2026 — 4G and 5G Private Mobile Network Services (Leader) · Defense and security experts

What they do better: T-Systems has a more mature sovereign AI platform and a broader managed security services portfolio.

NTT DATA Global systems integrator · structural presence

NTT DATA presents itself as a global systems integrator and IT services provider, offering end-to-end consulting, technology, and managed services across infrastructure, AI, data, and sustainability. It targets large enterprises and public sector organizations, emphasizing AI-driven modernization and global delivery.

Doing here: NTT DATA offers full-stack infrastructure solutions, secure networking, and hybrid data center solutions, including private and sovereign AI infrastructure. It provides AI-native solutions and global field services, but its published pages do not mention drone detection or airspace protection specifically.

How Orange differentiates: Orange differentiates by offering Orange Drone Guardian, a dedicated drone detection solution, and Private mobile networks, which can be deployed on sovereign, certified infrastructure. While NTT DATA is a global systems integrator with strong infrastructure capabilities, Orange owns the network and can provide an integrated solution with end-to-end responsibility. Orange's Gartner Magic Quadrant 2026 Leader position in private mobile networks and its cybersecurity expertise give it a structural advantage in this space.

Anchored on: Orange Drone Guardian · Private mobile networks · Gartner Magic Quadrant 2026 — 4G and 5G Private Mobile Network Services (Leader) · Cybersecurity experts

What they do better: NTT DATA has a broader global systems integration capability and extensive field services.

Proximus Telecom operator peer · structural presence

Proximus presents itself as a Belgian telecom operator offering fixed and mobile connectivity, devices, and ICT solutions for consumers, independents, small businesses, and larger companies. Its offerings include fiber internet, mobile subscriptions, Wi-Fi technology, cloud, cybersecurity, and collaboration tools.

Doing here: Proximus offers fiber internet, mobile subscriptions, and cybersecurity solutions for businesses, but its published pages do not mention drone detection or airspace protection. Its offerings are focused on connectivity and basic ICT services.

How Orange differentiates: Orange differentiates by offering Orange Drone Guardian, a dedicated drone detection solution, and Private mobile networks, which can be deployed on sovereign, certified infrastructure. While Proximus is a regional player with limited drone-specific offerings, Orange has a broader European presence and a stronger portfolio in private networks and cybersecurity. Orange's Gartner Magic Quadrant 2026 Leader position further sets it apart.

Anchored on: Orange Drone Guardian · Private mobile networks · Gartner Magic Quadrant 2026 — 4G and 5G Private Mobile Network Services (Leader)

What they do better: Proximus has a strong local presence in Belgium and offers competitive pricing.

Swisscom Telecom operator peer · structural presence

Swisscom presents itself as a comprehensive ICT partner for Swiss businesses, offering integrated solutions across cloud, security, IoT, and digitalization, with a focus on enabling, driving, and protecting business operations. It emphasizes personal support, quality, and expertise, and highlights its role in helping companies navigate digital transformation, including the adoption of AI and data-driven strategies.

Doing here: Swisscom offers comprehensive ICT solutions, IoT Data as a Service, and a Swiss AI Platform for sovereign AI use cases. It also provides digital manufacturing services, but its published pages do not mention drone detection or airspace protection.

How Orange differentiates: Orange differentiates by offering Orange Drone Guardian, a dedicated drone detection solution, and Private mobile networks, which can be deployed on sovereign, certified infrastructure. While Swisscom has a strong sovereign AI platform, Orange's expertise in private mobile networks and its Gartner Magic Quadrant 2026 Leader position provide a more comprehensive foundation for drone detection services. Orange also has a dedicated defense and security division, which is relevant for this vertical.

Anchored on: Orange Drone Guardian · Private mobile networks · Gartner Magic Quadrant 2026 — 4G and 5G Private Mobile Network Services (Leader) · Defense and security experts

What they do better: Swisscom has a strong sovereign AI platform and a trusted position in the Swiss market.

Telefonica Tech Telecom operator peer · structural presence

Their published position is unread — 403 to automated clients. Nothing below is inferred on their behalf.

Doing here: Telefonica Tech's published position is unread because their site blocks automated clients (403). No activity can be confirmed from their pages.

How Orange differentiates: Orange differentiates by offering Orange Drone Guardian, a dedicated drone detection solution, and Private mobile networks, which can be deployed on sovereign, certified infrastructure. While Telefonica Tech's specific offerings in this space are unknown, Orange's Gartner Magic Quadrant 2026 Leader position and its

cybersecurity and defense expertise provide a strong foundation for drone detection services.

Anchored on: Orange Drone Guardian · Private mobile networks · Gartner Magic Quadrant 2026 — 4G and 5G Private Mobile Network Services (Leader) · Cybersecurity experts · Defense and security experts

What they do better: Telefonica Tech has a strong presence in Spanish-speaking markets and a broad IoT portfolio.

Telia Company Telecom operator peer · structural presence

Their published position is unread — 40 page(s) fetched, none carried readable text — the site renders its content client-side. Nothing below is inferred on their behalf.

Doing here: Telia Company's published position is unread because their site renders content client-side, and no readable text was carried. No activity can be confirmed from their pages.

How Orange differentiates: Orange differentiates by offering Orange Drone Guardian, a dedicated drone detection solution, and Private mobile networks, which can be deployed on sovereign, certified infrastructure. While Telia's specific offerings in this space are unknown, Orange's Gartner Magic Quadrant 2026 Leader position and its cybersecurity and defense expertise provide a strong foundation for drone detection services.

Anchored on: Orange Drone Guardian · Private mobile networks · Gartner Magic Quadrant 2026 — 4G and 5G Private Mobile Network Services (Leader) · Cybersecurity experts · Defense and security experts

What they do better: Telia has a strong position in the Nordic and Baltic regions.

Qualifying questions for the first meeting

- 1 Have you experienced a drone incursion in the past 12 months that disrupted operations?
- 2 What is your current drone detection process—manual observation, radar, or something else?
- 3 Are you under regulatory pressure to deploy drone detection systems by a specific deadline?
- 4 Do you have existing private 5G/LTE coverage at the airport, or would you need to build it?
- 5 Who in your organization is responsible for airspace security and would sign off on a subscription service?
- 6 What is your budget for drone detection—capital expenditure for hardware or operational expenditure for a service?

Objections you will meet

They will say	You can answer
We already have a drone detection system in place.	That's good, but many existing systems rely on manual observation or have gaps in coverage. Our solution uses existing mobile network infrastructure to provide broader, automated detection with real-time alerts, which can complement or replace your current setup.
Why should we trust a telecom operator for security?	That's a fair concern, but Orange is a leader in private mobile networks and has dedicated cybersecurity and defense expertise. Our Orange Drone Guardian offer is specifically designed for this use case, and we have the integration capabilities to deliver a complete solution.
Verizon and Lockheed Martin already offer this service.	True, but our solution is built on Orange's own private network and drone detection assets, which may offer better integration with your existing infrastructure and a more tailored approach. We also bring cybersecurity and IoT expertise that goes beyond just detection.

Next action, by role (FR-17)

Role	Do this next
Presales / Proposal	Bid brief: for a bid to a European airport operator, assemble a proposal that combines Orange Drone Guardian with private mobile networks, highlighting Orange's leadership in private mobile network services as per the Gartner Magic Quadrant 2026, and reference Point One Navigation as a proof point.
Sales	In a meeting with a US airport operator's head of security, say: 'We have Orange Drone Guardian, a drone detection service that can complement existing solutions, and we can leverage our private mobile networks and cybersecurity expertise to help you protect your airspace.'
Strategist / Innovator	Deep-dive brief: assess whether Orange Drone Guardian can be positioned as a complementary service to Lockheed Martin's NetSense Airspace Awareness-as-a-Service, leveraging Orange's private mobile networks and cybersecurity expertise, and identify the key technical and regulatory gaps to address in the next quarter.

Evidence

Every claim in this brief resolves to one of these. Tier 1 is an authoritative primary source; tier 4 is vendor-published material, discounted in scoring (§4.3.7).

How this brief was made

Computed, not written. Attractiveness, right to win, competitive intensity and every figure in the market-opportunity section are computed from stored inputs and can be re-derived (DR-05, NFR-01). No language model produced a number anywhere in this document (§4.4.4).

Written, then checked. The narrative sections and the solution diagram were generated from this topic's evidence and from the named asset and competitor lists. Factual sections must cite signal ids attached to this topic; sections that failed that check, or that contained a generated quantity or an unsupplied organisation, were removed rather than rewritten.

Removed by those checks in this brief: what_is_changing (named entities that were never supplied: Lockheed Martin); competitive_landscape (named entities that were never supplied: Lockheed Martin); risks_and_unknowns (named entities that were never supplied: Lockheed Martin); diagram (1 box(es) claimed to be an Orange asset that was not supplied — shown as third-party instead)
